THE RIGHT WAY TO KILL GERMS

Here is a powerful and recognized disinfectant which kills the germs.

Is your cellar sanitary? Germs will multiply by the million overnight in a damp, musty cellar. Make a solution of Red Seal Lye and sprinkle into all the dark corners and all passages will immediately disappear, leaving your cellar fresh and sweet smelling.

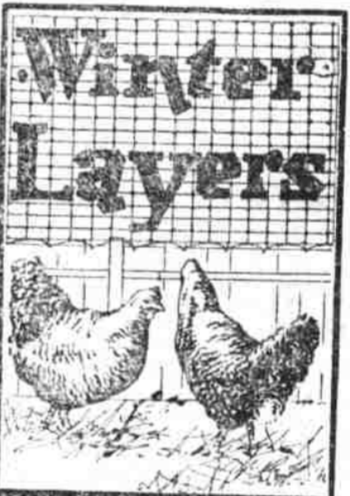

If your kitchen sink does not drain quickly, here is an immediate remedy. Fill a little Red Seal Lye into the pipes. The lye will combine with the grease and dirt, forming a solution which will be carried out quickly by the water, leaving the pipes free and clear.

There is a way to save money by making their own soap. All that is needed is one can of Red Seal Lye and a quantity of water. One or two small amounts of Red Seal Lye will make ten or more cans of soap. The soap will be carried out quickly by the water, leaving the pipes free and clear.
