my choler down. I will set that down at one bundred on the debit side. But my daughter, who went to Charleston and had a two weeks' vacation from the care of her children, returned safe and refreshed. I set that down at one hundred to balance off the old mare's trespass on my garden. Another married daughter, who has been sick for a month, has recovered and can now take up her bed and walk. She came up to spend the day and brought her children. Put that down at two hundled. A dear sister who lives at College Park is coming to see us tomorrow. That news is worth a credit of fifty. The mail has brought good, cheerful letters from two of the far-away-boys. That is worth fifty. A good neighbor sent me some fine tomato plants; that is twenty-five; and it is worth twenty-five to look at my strawberry garden, and I look several times a day. A visiting friend said it was worth twenty-five a day to see the long trains go by with their double engines. I can sit on my verands and count the cars, from forty to sixty on every train, and not strain my mind. Every evening after school is out a dozen or more children gather

WASHINGTON, May 6.—Rear Admiral Sampson. The immediate cause of his death was a severe cerebral hemorrhage. He had been in a semi-conscious state for several days and his afternoon suffered a severe cerebral hemorrhage. He had been in a semi-conscious state for several days and his afternoon suffered a severe cerebral hemorrhage. At the bedside when admiral breathed his last were Mrs. Sampson, Mrs. Lieutenant Cluverius, the admiral's married daughter; Admiral Sampson is two young sons, Ralph and Harold Sampson, Dr. Dixon and the attendants. Mrs. Sampson had broken down under the severe strain, and was quite ill all during the day. But for the critical condition of the admiral she would have been confined to her bed.

but even if they are right there is one portion of the will that deserves to be studied. The number of scholarships is limited and the methods prescribed for giving them to applicants is the most will. No method of selection for positions in the civil service, in the naval of the will. It is safe to say that no perfect plan can be devised or any plan that would be free from criticism. But Mr. Rhodes has outlined a plan for giving out the scholarships, which possesses much merit. The wisdom of the plan depends largely upon its execution. Here are the requirements for securing these scholarships.

1. "Literary and scholastic attainments"—to count for four-tenths in the rating.

2. "A love for success in manly outdoor sports"—to count for one-tenth in the rating.

3. "Qualities of manhood, such as truth, courage, devotion to duty, sympathy for and protection of the weak, kindliness, unselfishness and fellow-ship"—to count for three-tenths in the rating.

4. "Exhibition of moral force of character and instincts to lead and to take an interest in one's fellows"—to count for two-tenths in the rating.

A life-time of experience taught Mr. Rhodes that these combined qualities make the strongest of men, and he wishes the youths who are to be educated by his munificence to possess them before they are admitted to Oxford. If a genius like Cecil Rhodes could apply the tests he has required, his plan would have a fair trial under favoring circumstances, but as the tests are to be applied by many men of widely differing views, its application is one of great delicacy and difficulty. It will be a comparatively easy matter to ascertain the "literary and s
