## Practical Economy

Baking powders made from alum or phosphate may be bought for a trifle less than Royal Baking Powder, which is made from cream of tartar, derived from grapes.

Alum powders are not only cheap, but they differ greatly in leavening power.

If a cheap baking powder is used for a fine cake and the cake turns out a failure there is a waste of costly materials worth more than a whole can of the cheap baking powder

Royal Baking Powder produces the finest food, and its use therefore, results in an actual saving.

Poorly ventilated, drafty school rooms are a frequent source of colds. Contact with children who have colds is another cause.

Damp clothing and wet feet are often responsible for that croupy cough, sore throat and tight chest.

Dr. King's New Discovery is the remedy for your children when they catch cold. Crown-ups like it too. For nearly 50 years it has been used in bronchial affections with satisfactory results. It quickly loosens the cough and checks the cold.

Your druggist has sold it for years. Try it.
