Several improvements have been made around the school, and the inside of the building has been treated with two coats of white paint and the lower portion of the walls painted dark. The paint was bought with money raised at a social given by the teacher, and the painting was done by the members of the Fortynine Club which has proved of considerable help in the community during the winter and spring.

FARMERS SHOULD SPRAY TREES NOW

County Agent Falls Gives Formula And Directions For Prevention Of Insect Damage

"Every farmer in Pasquotank County should spray his fruit trees this week," says County Agent Falls, "to prevent the curculio from destroying his peaches and the codling moth from destroying his apples. The spray material should consist of two pounds of powdered arsenate of lead and four pounds of water and should be repeated in ten days. The above solution will prevent your peaches, apples, and plums from being destroyed by the above insects and therefore will increase your food supply by increasing your production of good fruit."

GIVEN TEN MONTHS ON THREE CHARGES

Beaulac Placed In Jail With No Trouble, But Police Had Difficulty In Getting Him Out

An aggregate sentence of ten months in jail, to be served upon the roads, was imposed upon O. A. Beaulac, formerly janitor of the Chamber of Commerce and collector for the Pasquotank Hospital Association, at a hearing in recorder's court here Tuesday morning.

Beaulac was found guilty of beating a board bill at the Southern Hotel in the amount of \$5.50 and was given two months on that charge. He plead guilty of the embezzlement of \$41 from the Hospital Association, and of passing a worthless check in the amount of \$5 on Norman Elliott, of this city, and was sentenced to four months on each of these indictments. He entered notice of appeal to the September term of Superior Court and was placed under \$500 bond in default of which he was taken to jail.

Brought from Washington Monday where, while enroute to Raleigh, he was arrested Sunday night upon warrants sworn out at this city, Beaulac spent Monday night in the local jail. The police had great difficulty Tuesday morning in getting him out to appear at court by reason of the jamming of the lock on his cell door. At one time it appeared that there was no way to extract him except by sawing out several of the bars, but finally the lock yielded. Other warrants against Beaulac here were not pressed. When the local courts are through with him, Beaulac will be tried at Edenton on charges of passing worthless checks at that city, it is stated.

NEWBEGUN CLUB MEMBERS SPEND BUSY AFTERNOON

Members of the Newbegun Home Demonstration Clubs spent a busy afternoon Tuesday at the home of Mrs. Seth Brothers. First, the making of rolls was demonstrated, then while the rolls were rising, some of the members cut out patterns for making children's clothes, some made potato salad, while others made salad dressing of the cooked and uncooked kind.

The young girls made organdie, taffeta and ribbon flowers for their hats. Even the tiny tots were busy, for outdoors in the big backyard they built sand houses.

The home demonstration agent was present, directing the various phases of the work. Everybody was so busy learning to do new and interesting things that the hours flew, and soon it was time to go home. But the delicious salad had to be eaten first, and there was much discussion over the merits of the two kinds of salad dressing. At the next meeting every member will make an organdie hat for summer wear.

EDGAR WILLIAMS GIVEN RIGHT TO RUN JITNEYS

That Edgar Williams is free to operate upon the license issued him last September, in spite of the action toward the annulment of it which was taken last December by the special Welfare Committee, was the decision of a majority of the City Council members present at a special meeting held at the Chamber of Commerce assembly rooms Monday night.

Councilmen Williams, Twiddy, Anderson, Stevens and Weatherly—five of the eight Council members—and Mayor Goodwin were present at the meeting. Williams was represented by Attorney E. F. Aydtlett, and brought numerous character witnesses who, however, were not called upon to testify. Upon motion, Messrs. Anderson, Stevens and Weatherly voted to permit Williams to operate under his September license and Messrs. Williams and Twiddy voted against it.

Edgar Williams, after his license was revoked by the Welfare Committee, appealed the decision to Superior Court, and the case came up at the last special term. It was ruled out of court by Judge Bond on the ground that Williams had not been called before the Council to show cause why his license should not be revoked; and the hearing Monday night was set by the Council at its last meeting in order that this technicality might be complied with.

Apparently the Monday night decision of the Council settles the case and gives Williams the right to operate a jitney business here.

Shippers Are Urged To Attend Meeting

A movement of vital significance to shippers and receivers of freight in every part of North Carolina, according to Secretary Job of the Chamber of Commerce here, is the effort of the railroads and certain shipping interests to have the Interstate Commerce Commission authorize increases in intra-State freight rates on a scale of from 25 to 40 per cent.

Every shipper in Elizabeth City and the surrounding section, and everyone interested in freight transportation costs, is urged to be present at a meeting to be held Wednesday afternoon at four o'clock at the Chamber of Commerce quarters. Methods to fight the proposed increases will be discussed, and a delegation will be appointed to meet with the North Carolina Traffic Association at Raleigh on Thursday, April 20.

With reference to the increases for which the shipping interests are working, M. R. Beaman, secretary of the North Carolina Traffic Association, says: "The agricultural, industrial and commercial interests of North Carolina have never in their history faced so serious a matter. If the plans of the railroads, co-operating with certain shipping interests in the Southeast, are adopted, it means, bluntly speaking, that North Carolina shippers and receivers of freight must discontinue buying or selling in the territory west of Pittsburgh."

Germany Bids For Business Of Austria

Vienna, April 11 (By The Associated Press)—Germany's bid for business is illustrated by the fact that the Austrian railway administration announces it is sending locomotives and other rolling stock there for repairs. Although the state owns splendid and extensive repair shops the Minister of Railways says the work can be done cheaper in Germany.

MILLIONS OF HERRING AND MORE COMING

Millions upon millions of herring, the largest numbers in ten years or more, are coming up into the creeks and rivers of Northeastern North Carolina this spring. In Newbegun creek, eight miles below this city, fishermen with boats and nets are catching thousands every day. Herring just out of the water can be bought for a cent apiece at Weeksville now. The season is not yet more than half over.

The herring, of which there are more than sixty different species known in various parts of the world, spends most of its life in salt water. At spawning time, however, the fish comes into fresh water to deposit its eggs in shallow water, preferably on rough, gravelly ground. The herring grows very rapidly, ordinarily reaching full maturity in four or five months.

STRADIVARIUS SELLS FOR \$9,000

In 1735 Violin's Maker Let It Go For Small Sum Of 80 Francs

Paris, April 11 (By The Associated Press)—A Stradivarius violin for which the maker, Antonius Stradivarius, received 80 francs when he made it at Cremona in 1735, has just been sold here for 103,400 francs including the war tax. This is equivalent at current rates of exchange to about \$9,000.

The violin was for a long time the property of the late Charles Lamoureux, founder and conductor of the famous Lamoureux orchestra.

The recent tests which seemed to establish that modern-made violins cannot be distinguished from ancient ones by their tone do not seem to have affected the price of ancient instruments, if this sale can be taken as a criterion.

Navy Department Develops New Device

Washington, April 11 (By The Associated Press)—A new device just developed by the Navy Department and which makes possible the accurate measurement of any depth of the ocean, possibly will result, hydrographers said today, in the chartering of spots in the sea which have never been measured because their depth was too great for the old methods of sea sounding work. The new device was said to employ sound apparatus similar to that used during the war for detection of submarines. The principles of its use is that of creating a sound on the ship and listening for the echo of this sound from the bottom of the ocean, measuring the time between the creation of the sound and the return of the echo.
