The Perfect Thirty Six — "Them Days Gone Forever"

Standard of Feminine Pulchritude Has Been Raised to the Perfect Thirty-eight Because Sports Have Made Women's Lungs Bigger and Their Shoulders Broader

By AILEEN LAMONT
(Copyright, 1924, By The Advance)
New York, Feb. 28. — The day of the "perfect thirty six" is over, according to American merchants and designers. The standard which for years represented the ideal of feminine pulchritude so far as fashions are concerned no longer applies, they say. What designers and dealers are looking for are models for a "perfect thirty eight."
The demand for the larger sizes, they assert, is due in part to the present day styles and in part to the fact that outdoor sports have gained such vogue among women that lung capacity has been increased and shoulders broadened. It is true that the prevailing silhouette is slim, but it is essential that it must not be tight or scrimped, especially in view of the abandonment of the corset by many women.

The ideal of the French designers always has been of the svelte type. Moreover, since the fall in franc exchange, the French cloth manufacturers and dress makers have been loth to put any more material than necessary into a frock. In fact, it is charged some silk manufacturers now are selling their goods on a yard basis although they continue to charge the same as when they used the meter as the standard of measurement. In this way they save 3.37 inches on each meter of cloth sold.

Mannequins with thirty eight figures are in increasing demand, not only in Paris but in London and New York for the showing of the larger gown models.

The approach of Lent has turned feminine attention not away from clothes but toward the less elaborate models. Suits and coats for spring undoubtedly are the features of the smart shop displays at present. The boyish slenderness and tailored smartness of fit and finish necessar-

ily make the new models simple in design but the wide range of materials effectively prevent them from lacking individuality. The twills, tweeds and worsteds are most popular with both stripes and plaid effects artistically employed.

The purchase of such a suit naturally turns the attention of the owner to the spring furs. Neck

pieces give every evidence that they will be tremendously popular this spring, although it is probable that the fur jackets will by no means be abandoned. Sable and fox so far are leading their rivals in popularity for the scarfs.

Furs are also being extensively used on the new spring wraps for both the cloth and silk models. Many of these have clever adaptations of the cape back and of the scarf collar. The black and white vogue continues to prove its hold on

the public fancy in the wraps on which ermine frequently is employed.

Some of the shops are stressing the use of suede and lizard leather both for entire coats and for the purpose of furnishing contrasts of color and material on a mere sober background.

George Brice of Powells Point was in the city Monday on business.

COTTON SEED

Mexican Big Boll Cleveland Big Boll
Extra Early King

We have in stock the three above named varieties of cotton seed, grown and saved especially for seed purposes. The Mexican and Cleveland stand at the head of the list as the earliest big boll varieties, and the best for our state. The Mexican is said to be about two weeks earlier than any big boll variety yet introduced and best for this section, and is being offered as one of the best to plant under boll weevil conditions. The Mexican and Extra Early King are North Carolina grown, from genuine seed in the central northern part of the State.

Our Cleveland Seed are Virginia grown from pedigree seed last year and we have no hesitation in recommending these seed to any one that wishes the best. They are open for inspection by any one who wishes to see them, at our store. Why pay \$2.00 or more for seed no better than ours.

We do not claim our seed to be better than many others offered for seed, but we do know that we have bought in quantities large enough to guarantee to save you money on these varieties.

Upon request we will quote you our low price, and all we ask is that you give us a trial for at least a few bushels of your requirements for this year's planting.

NEW GERMAN OIL FORMULA RUBS OUT RHEUMATIC PAINS

Remarkable discovery promised quick, soothing relief for rheumatism, gout, neuralgia and neuritis sufferers.

German Chemistry that has given to the world the boon of Aspirin for the relief of headache pain, and Novocain for painless dentistry, has now come forward with another scientific discovery that promises to make nerve, joint and muscular pains a thing of the past for thousands who have suffered terrible tortures.

A new combination of certain oils has been discovered which produces a clear amber liquid that affords immediate relief from pain in many instances. It is so penetrating that it disappears within a few seconds, so that it must be entirely absorbed by the body tissue. Even in the most advanced and stubborn cases the use of this remarkable oil has shown astonishing improvement at once in many cases. First, muscles regain life, creaking joints with the pain all gone become supple, the nerves are quickly soothed and the annoying twinges cease.

Rheumatism, gout, neuralgia and neuritis are due to internal infections which throw off poisons. These poisons are carried by the blood to the nerve tissue where they inflame and irritate the nerve sheath. The New German Oil is designed to neutralize these pain-causing poisons, bringing almost instant soothing relief.

So astonishing have been the results from the use of this oil that the American distributors have authorized local druggists to dispense it to rheumatic, gout, neuralgia and neuritis sufferers in this city with a positive written guarantee, signed by themselves, to return the full purchase price of the first bottle if the pains are not wonderfully relieved. All sufferers should take advantage of this liberal offer. Unless you get relief from the very first bottle, your druggist will return your money. It is called Buhier Oil, and can be had at most good druggists, such as
