Newest Millinery Made In Pasquotank

Home Demonstration Work Does It And Even Friend Husband Looks Happy

Millinery made in Pasquotank is the very latest. It's colorful, pretty, and stylish, and also inexpensive. For something like \$1.25 the wearer has a new spring chapeau to match her Easter suit which looks like \$25, literally speaking.

This comes to pass through the home demonstration work of North Carolina, and this week particularly, it comes to pass in Betsy and Pasquotank County.

Miss Pauline Smith, who is very attractive as well as exceedingly energetic, is leading the women in this inspiring spring millinery brigade. Miss Smith is the home demonstration agent for this district, and she is assisted by Miss Marcell Albertson, home demonstration agent of Pasquotank County.

Now, "Miss Marcell," bless her, isn't deep down in her heart as absolutely crazy about making millinery as she is about cooking, proper feeding of babies and children and grownups, home making, and such like. But she's a dead game sport and she never lets on that hats aren't her chief aim in life, but sees the making of 'em through with untiring patience, ready assistance, and capable aid.

The millinery school was held Wednesday at the Chamber of Commerce rooms in the Community Building from 10 in the morning to 4 in the afternoon. Besides Miss Smith and Miss Marcell, there was a constant attendance of women, and about 15 hats were made on the spot. Many went in at various times of the day and got suggestions and materials and went home to make their hats in their spare time.

Thursday at Weckville High School the program was repeated, thus giving the women of town and country a double opportunity to learn the gentle art of millinery making.

The hats were lovely, too, made of colored braid on rather small frames and trimmed with gay flowers. There were soft green ones, blue ones of several tones, black ones, white ones, and one of the prettiest made Wednesday was a lavender braid with flowers that blended from the bluest tones of heliotrope to an ashen of rose tone with all the intervening harmonies.

As the term "school" implies, it's hard work, but it's very interesting and the results are so pleasing that even Friend Husband, who probably doesn't particularly appreciate millinery in general, is bound to take notice of that "Made in Pasquotank," especially when he sees the substantial saving achieved.

TEA ROOM WILL BY NO MEANS CLOSE

The furniture used for some time by the Linden Tea Room but which was not the property of the Woman's Club was involved in court proceedings and sold at public auction in front of the County Court House Wednesday morning. The Woman's Club bought in the furniture for the tea room and will use it in the future. On account of the shifting of furniture some believed that the tea room was about to close but this is far from the truth, according to Mrs. C. P. Brown who requested that this announcement be made.

Paris, March 20 — Gold lace today is being made into sumptuous garments. Gaufered, it is treated by polret with a scarf like effect gives a distinctly Hindustanee touch to the costume.

Paris, March 20 — That shade of brown tan known as bamboo is being combined today with a bright shade of red. Costumes of bamboo rep have vestees, belts and pipings of the red, which goes surprisingly well with this attractive brown.

New York, March 20 — Among the new wool fabrics shown here today is one which resembles elderdown in its softness, though it is of deeper pile. Instead of being lustrous, many of the newer woolen materials have a dull but rich finish.

New York, March 20 — The more she looks like an awning, the better the sports frock debutante will be pleased. Very wide stripes in such combinations as green, cream and black, or yellow and red, are favorites at present for the little frock of cloth.

New York, March 20 — Shoes of one color popular today have very perk little bows of another. Thus a pair of pumps in dull red leather are smartly set off by black patent leather bows.

New York, March 20 — The orange tints are growing today in fascination and variety. They usually have a rose shade in them, which, oddly enough, makes it possible to combine them with certain shades of pink.
