

"Champion Blood Merchant" Eats Eighteen Onions A Day

By STEVE HANNAGAN
NEA Service Staff Writer

CHOWAN COLLEGE MAY ADOPT ANNUITY PLAN

Murfreesboro, March 26—In order to increase her endowment and in order to insure a firmer financial basis, with the support of her friends and loyal alumnae, Chowan College hopes to adopt the Annuity Plan.

The purpose of the plan is to advance the financial power of the college as one of the requirements of a standard college. The methods of procedure are as follows: The donor grants to the college a designated sum of money. The college in appreciation of the use of the gift, pays to the donor during his lifetime semi-annual payments at the rate of six per cent per annum, a rate equivalent to that secured by any safe investment and greatly in excess of some, and at the same time the principal is put to an extremely profitable use. At the death of the donor the gift becomes the unconditional possession of the college.

The recent Library Drive has proved to the authorities of the college that the friends and alumnae of Chowan are as loyal and as eager for the advancement of the college as the supporters of any college could be. Since many of the leading colleges and universities of the South have successfully adopted the Annuity Plan, and since the execution of the plan would mean much towards the advancement of the college, the administration and the trustees believe that the friends of Chowan will heartily endorse and enthusiastically support this great move.

the one with the best blood. Ever since then I have been in constant demand. Now I give all of my available blood to private cases."

The least blood Kane ever has had taken from his veins was one-half pint; the greatest amount a full pint. He has been paid variously from \$25 to \$150 for each quantity of life's blood he has had taken from his veins.

Twenty minutes is the shortest time Kane ever has spent on an operating table during a transfusion — but once it required one hour and 40 minutes.

"I lose about two pounds each time they take a pint of my blood. But I regain my strength in a few days. Within ten days I have given blood three times, suffering no ill effects," Kane says.

Kane stands 5 feet, 7 1/2 inches and weighs 175 pounds.

He never is ill. He has been married 10 years—and there are three little Kanes, James 7; Agnes, 6; and Lillian, 4. The children never have been ill.

Kane's arms bear scars of the blood transfusions—for each time he gives blood it is necessary to make an incision on his arm. Once it was taken from a foot—because both arms had been cut only a few days before.

"I don't mind it a bit," concluded Kane, "and it helps suffering humanity as well as helping me to raise my family and see that the children get an education."

Kane has given his blood has died. All the others regained their strength and health, aided by the corpuscles from his sturdy red blood filtration plant.

INTERESTING DEBATE AT SHILOH HIGH SCHOOL

Shiloh, March 26 — A very interesting debate was given Friday evening in the auditorium of Shiloh High School, four members of the eleventh grade participating. The query discussed was: "Resolved that the Government should own and operate the public utilities." The advantages and the dangers were brought out in clashing points by both the affirmative and the negative. The unusual oratorical qualities of the speeches and the sound judgment shown added a decided note of interest to each of the four speeches. Nevertheless, the decision was given in favor of the affirmative.

Another debate was given by members of the Junior and Senior classes of Shiloh High School on Friday evening, March 14. The proposition discussed at that time was: "Resolved that the ex-soldier should receive a bonus." It, also, possessed a keynote of interest, which was heightened because of the fact that the public was inter-

ested at that time in this particular question.

Decides on Best Life Insurance
"Five years ago I was refused life insurance because of my heart symptoms. Doctors said it was caused from a pressure of gas that came from my stomach, but their medicine did not help me and I was getting worse all the time. Three years ago my druggist recommended Mayr's Wonderful Remedy. I took a course of it and believe it is the best life insurance anyone can buy. It helped my trouble at once." It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convince or money refunded at all druggists. adv

**Recipe to Clear
a Pimply Skin**
Pimples Are Impurities Seeking an Outlet Through Skin Pores.

Pimples, sores and boils usually result from toxins, poisons and impurities which are generated in the bowels and then absorbed into the blood through the very ducts which should absorb only nourishment to sustain the body. It is the function of the kidneys to filter impurities from the blood and cast them out in the form of urine, but in many instances the bowels create more toxins and impurities than the kidneys can eliminate; then the blood uses the skin pores as the next best means of getting rid of these impurities, which often break out all over the skin in the form of pimples.
The surest way to clear the skin of these eruptions, says a noted authority, is to get from any pharmacy about four ounces of Jad Salts and take a tablespoonful in a glass of water each morning before breakfast for one week. This will help prevent the formation of toxins in the bowels. It also stimulates the kidneys, thus coaxing them to filter the blood of impurities and clearing the skin of pimples.
Jad Salts is inexpensive, and is made from the acid of grapes and lemon juice, combined with lithia. Here you have a pleasant, effervescent drink which usually helps make pimples disappear.
