

# Less Liquor Drunk At Commencement This Year

## The Move to "Dry Up" Eastern Colleges' Graduation Days Meeting With Success and Columbia University Falling in Line With Prohibition Forces

By ROBERT T. SMALL  
(Copyright, 1924, By The Advance)

New York, June 2.—Efforts to "dry up" commencement week at the Eastern universities and colleges are meeting with success almost daily now as June arrives and the chances are that less intoxicating liquors will be drunk at the graduation exercises and the class reunions than at any time since the Volstead Act took effect.

The move to make the commencement dry is a tacit confession that they have been anything but that in the past, despite the fact that the constitutional prohibition amendment came into full force more than four years ago.

There has been a fairly well authenticated report in circulation for some time that at one prominent university commencement last year, the revenue agents made a descent and did not find things at all to their liking. The agents threatened to stop all the reunions, arrest all the alumni and possibly put a padlock on all further proceedings.

Affairs were smoothed out, however, without drastic action, but there was a promise that this year every precaution would be taken to make the campus as dry as the mid-Sahara. Consequently there will be no cocktails or beer or punch or any other kicking substance served in the class tents or marquees which may be erected for the accommodation of the visiting "old grads."

In the fight to make the Eastern commencements safe for prohibition, many eyes naturally have turned toward Columbia University here in New York City because Dr. Nicholas Murray Butler, revered head of the big educational institution, recently has been hitting some hammer blows at prohibition as it is practiced in the present day and time.

Dr. Butler frankly has let it be known that he regards no prohibition at all as better than the evil conditions which he says have grown out of the attempts to enforce the Volstead Act as written at Washington. What Dr. Butler really has advocated is a Government monopoly or control of alcohol as practiced in one or two of the provinces of Canada.

Columbia, however, has promptly fallen into line with the dry movement, the commencement day committee issuing an appeal to the old grads not to "bring their own" or to permit any others to supply them "on university property." The committee has argued that it does not matter what the individual may think of prohibition, there should be strict compliance with the law during commencement week and that each alumnus should personally discourage anything like a breach of the laws on commencement day. The committee is seeking "to protect the good name of Columbia."

It has been made known at Columbia that the action of the commencement day committee of course has the sanction and support of Dr. Butler. The students at the university, while supporting Dr. Butler in their college paper and class discussions, have resented the inference of some of the more drastic of the dry advocates that Columbia had become as wet as the Atlantic Ocean. They have insisted that perhaps there has been less drinking at Columbia, per student, than in any of the other large universities.

Officers of some of the classes which are planning reunions this year at the various Eastern institutions, while deprecating any public use of intoxicants are frank enough to say they are not attempting to exercise any censorship or control over the actions of individuals. They want to make certain, however, that there shall be no countenance of the use of liquors by the class organization.

Just before prohibition became effective some university alumni organizations bought their "booze" and stored it away for future use at reunion festivities. They thought at the time this would be perfectly proper and all apparently went well until last year. Now the wet end of the festivities is to be cut out for all time.

### CLAYTON C. THOMPSON DEAD

Clayton C. Thompson fell dead at his home, 608 Southern Avenue, Sunday afternoon about 6 o'clock. Mr. Thompson had suffered a heart attack several months ago but had seemed to have regained his strength and was feeling especially well Sunday. He had been out as usual, and went for an automobile ride in the afternoon. He was in the dining room getting milk for a child when he suddenly fell dead.

Mr. Thompson was 69 years old, a native of this County, a farmer and an enthusiastic turfman, having owned and trained a number of race horses in this section. He is survived by his wife, and two sons, Jasper Thompson of Route 2 and Herbert Thompson of this city.

The funeral will be conducted by Dr. N. H. D. Wilson, pastor of the First Methodist Church, at the home Tuesday afternoon at 4 o'clock and interment made at Hollywood Cemetery.

## CLEVELAND SET FOR CONVENTION

### Provision Being Made Not Only to Entertain Those Actually in Convention Hall but Also Whole Nation.

By GUY T. ROCKWELL  
(Copyright, 1924, By The Advance)

Cleveland, O., June 2.—Cleveland is all set to entertain the Republican National Convention—and the nation. Provision has been made to accommodate 40,000 to 50,000 visitors and millions more will be able to "attend" the convention and hear the speaking and cheering by radio.

Deliberations of the great Republican pow-wow will be relayed to 14 broadcasting stations throughout the country and there put on the other so that owners of radio sets in the most remote corners of the country will have an opportunity—for the first time in history—to listen in on a national political convention.

Public Auditorium where the convention will be held can accommodate 12,000 persons. Loud speakers,

which are being set up outside, will make it possible for 100,000 more to follow the doings within.

From the instant of the arrival of the first special trains, on Sunday, June 8, to the departure of the delegates Thursday night, there will be something doing every minute. One of the high spots of the entertainment will be a fireworks display on the lake front, which will feature sky pictures of President Coolidge and other Republican notables.

An elaborate program has been arranged for the women visitors. The committee will station hostesses at each hotel who will act as information bureaus for the women guests.

On Monday a reception and musicale at Shaker Heights Country Club has been arranged for the women, while golf and caucuses will occupy the attention of the men.

Theodore E. Burton, temporary chairman, is slated to deliver his keynote speech at the opening of the convention on Tuesday. An automobile ride and golf has been arranged for the afternoon, with a reception for the women at the Woman's Club, followed by theater parties in the evening.

Platform adoption is scheduled for 1 p. m. Wednesday. At 2 p. m. a

## Will Chiropractic Cure Stomach and Intestinal Troubles?

Possibly there are no diseases so prevalent as those of the stomach and intestines, no organs so subject to disease. This is accounted for by the fact that these organs are so frequently abused and not properly cared for.

The stomach is the receiving plant for the rough food materials from which the body is built and repaired.

It is in this plant that the food undergoes certain digestive changes preparatory for the refining factory, the intestines, where all the nutritive ingredients are abstracted and sent out through the serious circulation to the tissue cells to be built into living flesh. It is upon the stomach and intestinal tract that the entire body is dependent for strength and nutrition. An arm or a leg might be eliminated without materially affecting the rest of the body, but to eliminate the stomach or the intestines would be to destroy the entire body.

It is in these organs that we find Nature's most wonderful chemical laboratories. The proper digestion of food being dependent upon certain digestive fluids in their proper amounts, and these organs being the laboratories where such fluids are manufactured, it is very obvious that interference with them will cause digestive troubles.

Another condition that causes severe stomach and intestinal troubles is a slowing up of the peristaltic motion, which is a function similar to the working of the heart. This is caused by a slight paralysis of the motor muscles in the stomach and intestinal walls which results in the waste matter lying in the intestines too long. Not passing out as rapidly as it should the poisons that are being thrown out through the bowels are reabsorbed, thrown back into the circulation and what the kidneys are unable to dispose of necessarily settles in the weakest tissues of the body.

It is indeed unfortunate that we should pay so little heed to these important organs. Whether we have a pain in the head or in the foot, the stomach and intestines are made to suffer. The first thing we do is to fill them with poisonous medicines which not only eat out their linings but spur them to exhaustion in an attempt to save the life of the body by eliminating the poisons as quickly as possible. It is never the medicine that moves the bowels but the bowels that move the medicine.

Knowing that medicine did not build the body in the first place; that it will not heal a broken bone, a cut or a burn, it is more than foolish to grant that it would permanently heal a diseased organ. But for the sake of argument, granting that it will give temporary relief, is it not logical that the medicine that will heal a diseased organ will cause disease in organs that are well? And remember that it's only means of getting from the stomach to any other organ is through the blood and serous circulations which must needs distribute it throughout every organ and tissue cell in the body.

And then when the bowels are not regular in their eliminative function we try to save time and trouble by stuffing them with some kind of poisonous purgative. To eliminate the poisons the bowels react as a horse would to a spur, only to lapse back into a worse state than ever as soon as the poison is all out. This is kept up month after month until we find ourselves suffering with chronic stomach and intestinal trouble.

Had we only searched for the CAUSE of our trouble in the first place we would have found that the organs affected were suffering from a lack of proper nerve force, due to an impingement upon the nerves supplying them. In the beginning an efficient Chiropractor could have easily corrected the CAUSE and much suffering and expense been eliminated.

Yes, Chiropractic will cure stomach and intestinal troubles. Even though you have abused and neglected these organs, you still have a good chance of recovery through Chiropractic. We are curing thousands yearly where everything else has failed.
