

## Bargain Day for Lesser Violators of Law Seems To Be Working Wonders

United States Attorney Emory R. Buckner Lets Them Off Easy if They Plead Guilty

CLEAR COURT DOCKET  
Object of It All Is to Get the Big Violators and Considerable Success Is Being Achieved

By ROWLAND WOOD  
Copyright, 1925, by The Advance  
New York, Sept. 25.—United States Attorney Emory R. Buckner, author of the "Bargain Day" plan, has given two object lessons in the last 24 hours of what he meant when he told General Lincoln C. Andrews, the new national prohibition enforcement head, that the only way to enforce the law was to go after the big violators.

One was the breaking of a gigantic Times Square liquor ring, alleged to have international ramifications, which has been supplying scores of "night clubs" in the Great White Way with their requirements of liquid joy.

The other was the invocation for the first time of a newly enacted law, which promises to build up the prohibition navy by stripping the rum runners of their own fleet craft and commissioning them in the Federal service.

The writer was seated in Mr. Buckner's office late Wednesday discussing the latter phase of the prohibition campaign when the liquor ring story "broke." The prosecutor answered his telephone, listened intently for a moment, issued a few crisp orders and hung up the receiver with a broad smile of satisfaction.

"That's the best piece of news I have had since I took office," he exclaimed, explaining that his assistants and some 30 prohibition enforcement officers and policemen had just raided the Kleckerbocker Building and the Long Acre Building at Times Square and arrested 13 of 27 alleged members of the city's biggest rum runners. Agents were out Thursday with warrants for the arrest of the other 14 on charges of conspiracy to violate the Volstead Act. Irving Wexler, alleged master mind of the conspiracy, slipped away to Europe a few days ago, but it is believed he can be brought back for trial.

The arrests are the result of a tedious investigation begun by Mr. Buckner, shortly after he took office, to learn the best method of going after the "big fellow." It started with the seizure of the steamer Nanticoke, which sailed brazenly into harbor last April with 500 cases of liquor concealed beneath a cargo of laths. Little was said at the time about the Nanticoke's capture, but Mr. Buckner directed an under-cover investigation, which he now declares, resulted in disclosure of the operations of the ring. The raiders captured long lists of customers in the bright light zone, together with much information. The new plan of turning over to the Treasury Department for use against the rum runners boats which have been captured with illicit cargoes, was made possible by a law adopted by Congress last March. It was invoked for the first time Wednesday when United States Marshal Hecht, under a court order obtained by Mr. Buckner, turned over to the Government the gas screw runner Frances P. Richie.

Heretofore, capture of a rum running craft has been a matter of small concern to the Government had no alternative but to sell confiscated boats. And as these boats, with their high speed motors and their great, empty holds, were of little value to any but rum runners, it always was a simple matter to buy them back.

Apparently there was a sort of gentlemen's agreement among the runners that they would not bid the craft up and in most instances the original owner—usually working through an intermediary—got his boat back for a fraction of its original cost. Probably half of the craft now plying between rum row and shore have been sold back to the "trade" for a song. From now on they may be turned against their fellows.

Meanwhile, Mr. Buckner is conducting his bargain day for small offenders as usual. Waiters and single bottle peddlers can get off with a light fine if they plead guilty—the idea being to clear the court dockets—already nearly two years behind—for the higher ups the authorities hope to net.

COTTON MARKET  
New York, Sept. 25.—Spot cotton closed steady today, middling 23.90, a decline of 25 points. Futures closing bids: Oct. 23.60, Dec. 23.30, Jan. 23.15, Feb. 23.40, Mar. 23.70.  
New York, Sept. 25.—Cotton futures opened today at the following levels: Oct. 23.50, Dec. 23.25, Jan. 23.23, March 23.45, May 23.72.

## STRESS VALUE ROUTE THIRTY

Meeting at Washington Enthusiastic Though Not Largely Attended

Washington, N. C., Sept. 25.—The meeting of Route 30 Coastal Highway Association held Thursday in the New Theater was not as largely attended as it should have been, but nevertheless there was much interest manifested. Judge Chas. Whedbee of Hertford, President of Route 30 Association presided while with him on the platform were Senator Williams, State President of the Association; Fred G. Warde, secretary of the Atlantic Coastal Highway Association, Brunswick, Ga.; R. C. Job, Elizabeth City; D. W. Bagley, Moyock; F. C. Kugler and Hon. L. C. Warren of Washington.

The High School orchestra played several selections prior to the opening which were much enjoyed. President Whedbee opened the meeting in a short address in which he stressed the importance of Route 30 to this section. He then called on F. C. Kugler, vice-president of the association who in a short speech welcomed the visitors to Washington, and stressed what good roads were doing for the county and what Route 30 meant to this part of Eastern Carolina. He then called on Congressman Warren who in his usual happy manner preached the gospel of good roads and the building up of all the links on Route 30, now a Federal highway and one of the most important parts of the great Atlantic Highway system. Mr. Warren said tourists could travel here 365 days in the year in comfort. He also wanted to go on record as unalterably opposed to building 9 feet roads and wanted to tell Commissioner William Hart that this section would not stand for more roads of this type. He then introduced Fred G. Warde, secretary of the association. Mr. Warde at once went right into the importance of advertising Route 30, so as to get our share of the 100,000 tourist cars that will go to Florida this winter. He suggested as a marker a duck in orange and black on enameled tin placed at short distances apart to show tourists they were on the right road. He made a number of other valuable suggestions and asked one and all to co-operate together and make Route 30 the most popular highway between the north and south.

A committee on organization was then appointed by the chair and while they were out R. C. Job of Elizabeth City made an interesting address on Route 30 and its connection with Virginia. The committee on organization reported that new officers be elected and finance and membership committees be appointed. Report was adopted. Officers elected were: President Chas. Whedbee, of Hertford; 1st vice president, J. H. Matthews, Windsor; 2nd vice-president, F. C. Kugler, Washington; 3rd vice president, Ed Clarke, New Bern.

The finance committee officers of the association and chairman of County Board of Commissioners in each county Route 30 passes through.

The visitors and members attending were then invited to the Country Club where a splendid barbecue was served by the ladies under the direction of Frank C. Kugler.

The next meeting will be held in Moyock and the date to be designated by the president.

## EDENTON RESIDENT HELD IN HERTFORD

Charged with passing seven worthless checks, H. W. Francis, of Edenton, known as "Hankey," Francis, was lodged in Hertford jail Wednesday in default of \$550 bond after a hearing before Justice Darden. Six of the checks were drawn on Hertford merchants, and the seventh on one in Elizabeth City.

According to Hertford authorities, Francis' scheme was to go to a filling station in his automobile, buy a few gallons of gas and possibly a quart of oil, and tender a check for several dollars in payment, receiving the difference. All the checks were in small amounts. It is said. He will face trial at the November term of Perquimans Superior Court.

## FRENCH FORCES ON WAY KRIM'S CAPITAL

Fes, French Morocco, Sept. 25.—It is officially announced today that the right wing of the French forces carried out successful operations to the east of Kifane and in the general direction of Adjir. Abd El Krim's capital, occupying positions at Djebel Kounson and Djebel Bochum.

## MRS. ANNA LEWIS WILL RESIGN JOB IN THIS COUNTY

Welfare Officer Accepts Position at Higher Salary With Similar Duties in Wake County

HAS SON IN RALEIGH

May be Offered Increase in Pay to Reconsider Action; Has Done Much Efficient Work Here

Mrs. Anna Lewis, County Welfare Officer of Pasquotank for more than four years, will present her resignation to the Board of County Commissioners at their regular meeting Monday week, it became known Friday. It is anticipated that the resignation will be effective November 1.

Mrs. Lewis informed W. T. Love, Sr., chairman of the Commissioners, of her intended action Friday morning, explaining that she had decided to accept a similar position in Wake County at a large increase in salary. In commenting upon it, Mr. Love stated that he regarded Mrs. Lewis as a highly capable worker, and that he believed that her activity in these and other cases has proved a powerful factor in reducing the number of such offenses.

A telephone call to Mrs. Lewis' home Friday afternoon, with reference to her intended resignation, elicited the information that she was ill in bed.

Among her other activities here, Mrs. Lewis was a leader in the establishment of the Detention Home for delinquent and underprivileged children, which was established at Nixhton about a year ago. The work carried on at the home, under her general supervision, has attracted widespread favorable comment.

There was some discussion on the streets Friday as to whether Mrs. Lewis might be persuaded to reconsider her forthcoming resignation if she were offered a reasonable increase in salary. Those advocating such an effort to retain her pointed out that she was thoroughly familiar with conditions here, and therefore was in a position to do far more effective work, probably than any one who might be available as her successor.

Mrs. Lewis has a son living in Raleigh, and this is believed to be a factor in her decision to remove to Wake County.

## JAPANESE VISCOUNT DIES OF HIS BURNS

Tokio, Sept. 25.—Viscount A. Haman, president of the privy council, who was severely burned yesterday when his clothing caught fire from a bonfire in his garden, died today.

## MAIN SHOWS ARE HERE IN OCTOBER

Arrangements were made today for the appearance of the Walter L. Main shows in Elizabeth City Friday, October 16. The announcement of the coming of this famous tented organization, now in its forty-sixth year, is attracting interest.

"During the almost half a century the Walter L. Main Shows has been on the road," said L. C. Gillette, the general contracting agent, "has grown and prospered until today the equipment and paraphernalia has set a standard by which many other organizations are patterned."

"A special train of double length railroad cars will bring the big show here. The paraphernalia and equipment represent an expenditure of more than three quarters of a million dollars. There are upwards of 500 men and women and 200 horses with the show; almost ten acres of tents; a herd of elephants, a caravan of camels from the great desert. The manager will be fully up to the standard maintained by Walter L. Main in other years. The performance this season will see scores of added European features and novelties. The champion riders, acrobats, aerialists, gymnasts and equilibrists of Continental Europe and America will be seen."

"There will be two performances at 2 and 8 p. m., the doors opening an hour earlier to permit a visit to the zoological collection or to enjoy a concert by the military band. An immense street parade will be seen on the downtown streets at noon on show day."

## FLOUR TO ORIENT

Portland, Ore., Sept. 25.—More than 9,500 tons of flour will be shipped from the Columbia River to the orient the middle of October, exporters announced today.

## Why Young Men Go West

Dolores Conrad of Sterling, Colo., has been chosen as Colorado's prettiest girl. She will represent the state at the International Petroleum Exposition at Tulsa, Okla., next month.

## Says Only By Segregation Criminals Can Crime Ever Be Actually Stamped Out

Founder of Psychopathic Laboratory Believes Criminals Born, Not Made, and Cure Subject Largely to Breeding Out of the Strain

By OWEN L. SCOTT  
(Copyright, 1925, by The Advance)

Chicago, Sept. 25.—Scientific examination of 40,000 criminals over a period of eleven years in this country's only real laboratory for study of crime, bring the conclusion that only by segregation of the criminal class can the problems it raises be stamped out.

In its report today, the psychopathic laboratory of the Chicago municipal court, emphasizes that its little known but extensive investigation shows crime to be a disease, with its tendencies inheritable, and its cure subject largely to a breeding out of the strain from the human stock.

Dr. William J. Hickson, founder of the psychopathic laboratory and its director during the eleven years of its operation, who has examined more criminals than any other scientifically trained man in this country, says that any other study of crime, finds that inherent emotional and mental troubles are in a large measure responsible for crime. "Crime," his report explains, "is seen to be a social defect based upon mental defect, and the mental defect is seen to be a typical of the two great divisions of the mind—the intelligence and the emotion divisions. And instead of being a sporadic thing, appearing by chance in individuals, the accumulated case records show that like all physical and mental traits, it runs in family stocks and is subject to the laws of genetics like other characteristics."

The thousands upon thousands of criminals examined in Dr. Hickson's laboratory, as the only place in the country where they are really studied, have borne out the findings he has made. Scores of famous murder cases, which have commanded numberless columns of newspaper space, have been found by Dr. Hickson to have been caused by emotionally unbalanced individuals.

As the work of the psychopathic laboratory gradually becomes known, it is attracting increased attention from judges and scientists from all parts of the country. The study, Dr. Hickson believes, opens the way to a real understanding and solution of the crime problem.

## SOUTH RAPIDLY SUCCEEDS WEST

National Foreign Trade Council Makes Interesting Announcement

New York, Sept. 25.—The South is succeeding the West as the most rapidly growing section of the United States in originating foreign trade, the National Foreign Trade Council declared today, announcing that the 130th annual convention will be held in Charleston, South Carolina.

The convention will be in session from April 28 to April 30, 1926. It will mark the first important national convention held in that city since the Democratic convention in 1850 which refused to nominate Stephen A. Douglas.

## SECRETARY SURROUNDS DEBT NEGOTIATIONS

Washington, Sept. 25.—Complete secrecy surrounded the nature of the settlement offer which France submitted as it engaged the second day of the debt funding negotiations with the American commission.

## ALL CAR OWNERS URGED TO ENTER PARADE AT FAIR

Merchants, Particularly, Should Avail Themselves of Valuable Opportunity, Says Buxton White

GOOD ADVERTISING

Great Albemarle District Fair Expected to Prove Biggest and Most Entertaining Held Here

One hundred dollars or more in prizes will be offered for the best decorated automobiles and floats in the parade ushering in this year's Great Albemarle Fair on Tuesday week, October 6. The fair will continue through the following Saturday, October 10, and will have a wider array of amusement and other attractions than any similar event of the kind here, according to Secretary G. W. Falls and his co-workers.

Milos L. Clark, chairman of the parade committee, urges every merchant in the city, along with everybody else, to decorate an automobile or float for the procession, which he says, should prove one of the most entertaining features of the fair, and valuable advertising for the firms participating.

"Enter a car in the parade, to help make it worth while," he urges, "as a means of helping your city, and most of all, as a means of helping yourselves. It is thoroughly worth while from an advertising standpoint alone, to say nothing of the opportunity to win valuable prizes."

Arrangements for the fair fast are assuming final shape. There are definite prospects that the agricultural, livestock and home exhibits will surpass those of all previous years, and that the amusement features will be the best in the history of the fair. There will be free acts in front of the grandstand twice daily, and a free fireworks exhibition each night. The Tip Top Shows, which will hold forth on the midway, are the same that constituted the midway of the Norfolk fair, held during the week of September 7.

## OBREGON VISITS IN LOS ANGELES

Former President Mexico Is Farmer and Promoter of Co-operation

By HARRY C. ELLER  
(Copyright, 1925, by The Advance)

Los Angeles, Sept. 25.—Just a hard-working and tired bean grower on vacation—such is General Alvaro Obregon, hero of Colima, conqueror of Francisco Villa and former president of Mexico, who is now a visitor to La Ciudad de Los Angeles.

"I am just a farmer now," says the famous Mexican. "A grower of beans (garbanos) and have no ambitions other than to help my fellowmen by forming bean growers' associations that will be to our mutual advantage. There is no other significance to my visit here than as a hard working bean rancher. I needed a rest, a vacation."

A Mexican laborer, loitering at the station when General Obregon arrived, glanced up from his cigarette just in time to recognize the great president.

"Viva La Mexico! Viva El General Obregon!" he shouted, clutching at the sleeve of the former chieftain of the Mexican republic in his excitement. The general smiled gently, causing his iron gray moustache to curl back and reveal bright white teeth, but spoke not a word to his humble countryman as he proceeded with dignity to a waiting taxicab.

"Maybe the general can tell us about this year's crops in his country," a reporter suggested at the hotel.

"Bueno," shot back the one time war lord without waiting for his interpreter to answer.

"General conditions in Mexico?" "Bueno" and the administration of President Calles?" "Bueno," with the same smile.

Declaring that Mexico is tranquil and will so remain, the general continued:

"I retired from politics when I left the presidency and have stuck to my 10,000 acre ranch at Navojin in Sonora. The work of installing irrigating projects and of cultivation has been arduous but I enjoy it," he stretched forth his left hand as a good-bye expression.

Stepping up to the hotel desk the general spoke a few words to his secretary and then handed the clerk two samples of cloth. Through his secretary he made known that he wished two suits of clothes made without delay.

"Bueno," was his parting word to the clerk when the order was given.

## EX-SHERIFF BRAY IS SERIOUSLY ILL

Former Sheriff B. F. Bray, of Perquimans County, is seriously ill at his home at Hertford as a result of a heart attack early Monday morning. He came downstairs on a small errand, and fainted on the way back, falling near the head of the stairs. His wife found him in that condition, and managed to get him into bed. Restatives were administered, and he regained consciousness after a short time, but has been in a serious condition since.

Former Sheriff Bray is a native of Pasquotank for a time before moving to Perquimans. He celebrated his seventy-ninth birthday about a month ago.

## SUPERIOR COURT TERM NEAR END

Many Relatively Unimportant Cases Disposed of During Week

Drifting along toward the hour for adjournment, the September civil term of Superior Court, which opened here Monday morning with Judge Thomas H. Calvert presiding, thus far has been virtually devoid of interest, as far as the general public is concerned. Minor damage suits and the like have dominated the docket all week. The term is scheduled to end some time Saturday.

In the case of W. W. Newbern vs. D. W. Snow, the jury found that Snow was indebted to Newbern in the sum of \$553.76, the face value of a note held by the latter, together with interest at six per cent from September 4, 1922, and the costs of the action. A verdict in favor of the defendant was brought in a suit of the Virginia-Carolina Rubber Company, against the Auto & Gas Engine Works, of this city, involving an alleged breach of contract.

J. S. Rogers was granted a divorce from Mrs. Filena Rogers on statutory grounds.

The case of the Farmers' Ginning & Produce Company against Frank Anderson, a member of the "Elizabeth City" police force, came near ending in a "dogfall," termed colloquially a "dogfall," of the plaintiff being awarded a judgment of \$197.48, and the defendant being given a judgment of \$146.55 on a counter-claim.

In the case of Walter L. Cohoon, attorney, against Donnie Baker, Mr. Cohoon won a judgment of \$50 as a fee due him for legal services.

R. E. Flora was winner in a suit against A. E. Cohoon for recovery of a mortgaged horse, the jury awarding him the horse in dispute, or an alternative judgment of \$70.

The case of Herman Newbern vs. Joseph H. Baker & Company, French brokers, was continued. Attorneys for the defendants made a strong fight to have the case dismissed on the ground that it had been tried in Virginia, and had been carried to a higher court on appeal.

At the beginning of the Friday afternoon session, the court took up the case of W. W. Woodley against Caleb Walker, in which the plaintiff seeks to recover damages for injuries alleged to have resulted from an automobile accident.

## AMERICAN VIEW IS GIVEN TO FRENCH

Washington, Sept. 25.—The American viewpoint was given the French Debt Mission today in a meeting at the Treasury between the negotiators of the two nations seeking a basis for settlement of the French war debt of \$4,000,000.

Hardly more than ten minutes were required for the second joint conference between the debt missions which was described as having "made the progress usual in such negotiations."

Today's joint conference was called after President Coolidge had gone through the regular Friday cabinet meeting.

## ROTARIANS WILL TAKE CENSUS OF GREENVILLE

Greenville, Sept. 25.—A committee from the local Rotary Club is now busily engaged in perfecting its plans for the census taking of Greenville. Having secured the services of a representative of the Government, which steps are essential to make the census official, the Rotarians with the aid of the city officials and under the direction of the Federal agent expect to begin the work within a few days.

## GRIFFIN BEGINS TO SERVE HIS SENTENCE

Raleigh, Sept. 25.—Henry Dennis Griffin, convicted mob leader, today began service of a 30 year sentence for alleged mutilation of Joseph Needleman last spring. A new trial was denied him Tuesday.

## TEXAN COTTON CROP MILLION BALES SHORT

Houston, Sept. 25.—Latest reports on the Texas cotton crop, independent of government figures, indicate it will be at least a million bales less than that of 1924.

## HEATED WORDS OVER EVOLUTION AND DR. POTEAT

Chowan Baptist Association Starts Fireworks When Dr. G. W. Paschal of Wake Forest Speaks

THE STORM BREAKS

Dr. Paschal Vainly Endeavors to Explain That No Personal Beliefs by Any Teacher Are Advanced

## COLUMBIA, SEPT. 25.—THE CHOWAN BAPTIST ASSOCIATION ENDED ITS session here at 3 o'clock Wednesday after two days and one night of interested discussion and heated debates. Out of the ordinary routine of business and hearing of reports nothing of extra interest happened until Tuesday night when Dr. G. W. Paschal, of the Wake Forest College Greek Department, made a talk on Christian Education and in particular education at Wake Forest College.

Then the fireworks began, when he touched the subject of the teaching of particular subjects at Wake Forest.

As soon as the subject of evolution was mentioned the storm broke in all its fury. Dr. Paschal in his discussion of the subject of Wake Forest suggested and contended that the subject of Evolution was concerned only in the courses in Biology at Wake Forest and only studied by the students in connection with that subject, and that there no theories or beliefs by any members of the faculty of the College were advanced; that the facts and results of research in this line were presented in their truthful and unbiased form, and that the student was left to form his own opinions, and many of them had their own opinions and were free to state and advance them, both pro and con. He said that a student under Dr. Paschal in his discussion of the subject of Wake Forest suggested and contended that the subject of Evolution was concerned only in the courses in Biology at Wake Forest and only studied by the students in connection with that subject, and that there no theories or beliefs by any members of the faculty of the College were advanced; that the facts and results of research in this line were presented in their truthful and unbiased form, and that the student was left to form his own opinions, and many of them had their own opinions and were free to state and advance them, both pro and con. He said that a student under Dr. Paschal in his discussion of the subject of Wake Forest suggested and contended that the subject of Evolution was concerned only in the courses in Biology at Wake Forest and only studied by the students in connection with that subject, and that there no theories or beliefs by any members of the faculty of the College were advanced; that the facts and results of research in this line were presented in their truthful and unbiased form, and that the student was left to form his own opinions, and many of them had their own opinions and were free to state and advance them, both pro and con. He said that a student under Dr. Paschal in his discussion of the subject of Wake Forest suggested and contended that the subject of Evolution was concerned only in the courses in Biology at Wake Forest and only studied by the students in connection with that subject, and that there no theories or beliefs by any members of the faculty of the College were advanced; that the facts and results of research in this line were presented in their truthful and unbiased form, and that the student was left to form his own opinions, and many of them had their own opinions and were free to state and advance them, both pro and con. He said that a student under Dr. Paschal in his discussion of the subject of Wake Forest suggested and contended that the subject of Evolution was concerned only in the courses in Biology at Wake Forest and only studied by the students in connection with that subject, and that there no theories or beliefs by any members of the faculty of the College were advanced; that the facts and results of research in this line were presented in their truthful and unbiased form, and that the student was left to form his own opinions, and many of them had their own opinions and were free to state and advance them, both pro and con. He said that a student under Dr. Paschal in his discussion of the subject of Wake Forest suggested and contended that the subject of Evolution was concerned only in the courses in Biology at Wake Forest and only studied by the students in connection with that subject, and that there no theories or beliefs by any members of the faculty of the College were advanced; that the facts and results of research in this line were presented in their truthful and unbiased form, and that the student was left to form his own opinions, and many of them had their own opinions and were free to state and advance them, both pro and con. He said that a student under Dr. Paschal in his discussion of the subject of Wake Forest suggested and contended that the subject of Evolution was concerned only in the courses in Biology at Wake Forest and only studied by the students in connection with that subject, and that there no theories or beliefs by any members of the faculty of the College were advanced; that the facts and results of research in this line were presented in their truthful and unbiased form, and that the student was left to form his own opinions, and many of them had their own opinions and were free to state and advance them, both pro and con. He said that a student under Dr. Paschal in his discussion of the subject of Wake Forest suggested and contended that the subject of Evolution was concerned only in the courses in Biology at Wake Forest and only studied by the students in connection with that subject, and that there no theories or beliefs by any members of the faculty of the College were advanced; that the facts and results of research in this line were presented in their truthful and unbiased form, and that the student was left to form his own opinions, and many of them had their own opinions and were free to state and advance them, both pro and con.
