Small Felt

The small felt hats which refuse to leave the fashion field are developing all sorts of whims. This one, from Rehoux, Paris, shows what happens when felt decides to drape itself instead of conforming to the strictly tailored lines that it used to follow. It is of a curious shade known this season as phantom red.

Very New

Here is another variation of the small hat as it is worn this winter. This model, in black and gray carries all the assurance of Park Avenue day on business.
