REVOLUTION IN SPAIN SEEMS BE WELL IN HAND

Discipline in Infantry Reported as Maintained and Good Order Said to Exist in Affected Centers

ALFONSO DECLARES COUNTRY AT PEACE

By The Associated Press Madrid, Sept. 8.—King Alfonso has issued a decree today ending the state of war which was proclaimed throughout Spain Sunday in consequence of the mutinous movement of artillery corps.

There have been several emergency cabinet meetings to discuss the revolt led by the artillery corps. The government is receiving promises of support from private citizens and corporations.

The rest of the army, including the artillery reserves, has preserved absolute discipline, and is declared to be ready to do its duty. The government is exploring the possibility that military comrades might make it necessary to re-establish order and discipline by violence.

The first regiment of light artillery was relieved of its officers Sunday by the chief of the general staff, who was accompanied by a military picket. Later in the day the same operation was performed with the tenth and twelfth regiments and the training section corps. All officers were placed under arrest in their houses.

Throughout the day the minister of war was in telephonic communication with the Captain Generals in the provinces, who reported maintenance of perfect discipline among the non-artillery men and the successive surrendering of the artillery officers.

The King's orders can be considered fully carried out in the garrisons at Andalusia and Catalonia, and are being executed in the other garrisons. In Seavia, where the first spark of rebellion appeared, normality has been re-established.
