The amount of work due during the past exceeds that of the previous year 133.385 cubic yards, equivalent

to the average required on ten miles of Road; and the amount executed at the ex-

piration of the year is equal to one-half of the total amount required in the Graduation of the whole Road-The high price of cotton during the year, and the consequent increase in the demand and price of labor, induced, some of the contractors to withdraw a large number of their hands, during the summer months, than was anticipated when the contracts were made. and when cotton was selling much below its present value; while others have abandoned their contracts, preferring to forfeit the re-

As the Iron for this portion of the Road will soon arrive in Charleston, some provision should be made for the expenditures required to put it in operation, which are more particularly explained instatement marked D hereunto annexed. Included in this estimate is the cost of one Locomotive, one Passenger coach, one Baggage, and ten Freight cars, which will be sufficient to work the line until its completion to Dur-
