GREAT POTATO.

We had on our table a sweet potato which weighed eleven and a half pounds, the largest we ever saw. It was raised on the plantation of Mr. D. M. BRYANT, at Wrightsville, on the Sound. We have sent it to the Carolina Hotel, for "general inspection and review."

MILITARY PARADE. The two companies of Infantry, the German Volunteers, Capt. WESSEL, and the Wilmington Light Infantry, Capt. Cantwell, paraded in fine style on Saturday last.

A flag was presented to the German Volunteers, on behalf of the citizens of Wilmington, by Et. W. Hall. Esq., between twelve and one o'clock from the steps of the Cape Fear Bank. Captain Wesset received the flag, and made a very handsome reply to Mr. Hall.

At about the same hour and at the same place, a flag was presented to the Wilmington Light Infantry, by Robert Strange, jr., Esq., in behalf of the Ladies of Wilmington. Capt. CANTWELL re-

ful, and the ceremony of their presentation as very Capt. Cantwell's company partook of a dinner

at the Carolina Hotel, at which were a number of invited guests.

PRESBYTERIAN SYNOD. To the Editor of the Wilmington Commercial:

Sir: I send you for publication, the following Resolutions, passed by the Synod of North Carofina on Saturday evening the 12th inst. Very respectfully, your ob't serv't.

DRURY LACY, St'd Clerk. Wilmington, N. C. November 14, 1853.

1. Resolved: That the thanks of the Synod are due, and are hereby tendered to the citizens of Wilmington, for their generous hospitality to its members during the present session; and to the Worship, for religious services on the Sabbath.

2. Resolved: That the grateful acknowledgments of this Synod are due to the President and Directors of the Wilmington and Raleigh, to the Wilmington and Manchester, to the Raleigh and Gaston, to the Petersburg and Roanoke, and to Charlotte and Columbia Rail Road Companies respectively, and also to the Proprietors of the Steam Boat Companies on the Cape Pear River, for their liberality in aiding the members of Synod to and from Wilmington.

4. Resolved: That the foregoing Resolutions | died of disease of the heart. be published by the Stated Clerk in the papers of this city

AN EXPOSURE.

The coalition democratic papers of Massachusetts are republishing editorial articles, written for the leading democratic papers in 1850, which they assert are from the pen of the Hon. Caleb Cushing. These articles zealously argue in favor of a coalition between the Democrats and Freesoilers on State matters. There is said to be proof positive of Mr. Cushing being the author of

This exposure of the Attorney general is very unkind, because certain politicians, like the moon will have their changes. Mr. Cushing has now come out against this coalition, because to do so is consistent with the present views and policy of the President and his Cabinet, and certainly intended nothing personal or offensive towards those with whom he was in league and love in 1850 -We should like to know how these politicians observe and calculate. Would you expect the moon in its second quarter to look as she does in the full? Certainly not. Then how can you expect Mr. Cushing to look and seem like he was when he was not half so great a man as at present ?-Besides, the course of his former friends would indicate that they expected political consistency in Mr. Cushing. They ought to know that he has a right to be inconsistent or any thing he pleases, in virtue of his office-and when Mr. Pierce says "all is right," the people have nothing else | Havana, Nov. 7th :to do but simply to respond "all is well."-What presumption, to suppose that the President and Mr. Marcy do not know how to take care of the gentlemen of the Cabinet, and see that they talk by the Book.

POLITICAL NAMES.

The New York papers speak of the Hards and the Softs, of the democratic party in that State. The Hards are the Union Democrats of the old Line and the Softs are Freesoilers. The Seward and Greely Whiggery having carried the State, by the help of the Softs, New York is a Freesoil State, for the time being.

With the Editor of the Day Book, we hoped and believed that the election of Gen. Pierce had given such a blow to freesoilism as would effectually destroy it in New York and elsewhere, or, at any rate, drive it back into the ranks of abolitionism; but we were unfortunately deceived .-As the Editor says: "Unwise councils prevailed with the new president, and he adopted a course of policy that warmed the trescherous snake into life again, and brought him forth more venomous and vigorous than ever."

If the contemptible technicalities of party could be thrown aside, and the men of the South could be prompted to give up the poils for the sake of the public safety, their own interest and honor, and the Union, then might Whigs and Democrats here unite with those of the same names in other sections, and an open field and a fair fight would be had between the friends of the Union and the Abolitionists-and agitations and intrigues fostered by the league of southern people with their worst enemies, would yield to parties with distinct and well designated features. As it is, political iniquity and treason to the South and the Union. are hid beneath the cloke of a party name-and the people are so well drilled to party obedience, that the men of one party will nor touch anything called under the name of the other. A democrat must have every thing called democratic-a whig requires the name of his party to be given to every thing he is called upon to approve. The posttion of our friends is somewhat like the child who was very fond of "chicken." One day another edible was offered to the little one, of which he was fond also-but it was not "chicken" and so he refused it. Being very earnestly pressed to cat the article, he cried out, " Well say it is chickca, or I won't eat it." After all the child was as Arnold Wentworth, charged with forgeries and reasonable and considerate as many of us grown frauds on the Pension Department, committed su-

THE PACIFIC SCHEME. We have already alluded to the scheme of th Pacific Rail Road, in which Mr. Secretary Walker has taken so conspicuous a part. The following from the St. Louis Democrat is pretty sharp upon the gentlemen engaged:

"But, if Congress gives the land, alternate sec-tions, ten or fifteen miles on each side, and the Company to locate the land where it pleases, then the stock will immediately have a market value and every holder of stock can sell and pocket so many dollars for each share, (perhaps 50,) without having paid a cent or risked a cent. This accounts for millionary subscriptions on the part of men who have no visible means of paying a dime on the dollar of what they subscribe. But the great point of view in which the public is to look at this movement, is an attempt to create a corropt influence in Congress to get capital for their bank, by operating directly upon the members, or indirectly through their constituents. It is the ommencement of the immense bribery operations which are to be carried on at Washington this Winter, and in which the Yazoo fraud, the South Sea bubble, and the John Law Mississippi scheme, are to serve as examples of what is to be done." And again the same paper says:

"We are credibly informed that our felow-citi zen. Hon. James B. Bowlin, when in New York. recently, was invited to subscribe for a million of dollars worth of stock in the wholesale swindling operation proposed by this company. This would have been a very moderate subscription on the part of Judge Bowlin, compared with that of Robert J. Walker, taking into consideration the means of the respective parties, for the former bas property, worth we believe, from thirty to forty thousand dollars. Notwithstanding the temptations pressed upon Judge Bowlin, in the shape of immense speculations and the assurance that he would not be required to pay any money ceived the flag, and made some very appropriate he declined, greatly to his credit, to have snything to do with it. Such a subscription from him Both Flags are represented to be very beanti- would of course have been absurd. But this proposition from the company to him, shows very clearly the game they are attempting to play off upon the public. Notwithstanding the millions already subscribed, there is not a man connected with it who can be called a capitalist."

BOSTON NOTIONS.

The following Resolution adopted at a "great ratification Democratic meeting at Fanuel Hall Boston," is in the most sublime style of Young America. We will not detain the reader by comspecimen of folly and nonsense:

" Resolved. That the annovances to our hards nd enterprising fishermen at the East; the diffi culties and expense of establishing boundaries and running lines at the North and West; and the disregard of treaty obligations by slave traders in the Gulf of Mexico, indicate that the happiness and prosperity of the whole people would be officers of the Methodist and Baptist Churches of greatly advanced by spreading the stars and stripes the city for the offer of their respective Houses of of the Union and the shield of our Constitution and laws over the whole North American Continent and its adjacent Islands and that in our opinion this is a 'consummation devoutly to be wished.'

THE EXECUTIVE MANSION. The Washington Uunion announces that the repairs of the White House authorized by the last Congress are now nearly completed, and that in the course of this month the building will be thoroughly renovated as far, at least, as the appropriation will allow.

THE NEW JERSEY ELECTION.

The newspapers confirm the telegraphic reports of the complete triumph of the Democracy of New Jersey at the election in that State on Tuesday last. Rodman M. Price is chosen Governor by a large majority, and his political friends will have a large majority in both branches of the Legislature. Joel Haywood was the Whig candidate for Governor. Questions of Temperance and

The Whig party will scarcely have a respectable show in the Legislature. The "Liquor Law" has used them up in New Jersey.

FORGERY AND SUICIDE. At Portland, Mo., on Thursday morning last

New York Correspondent of the Commercial. Sale of North Carolina Copper Mine—The first Snow of the season—Bifeminacy vensus hardn-hood—Five and Three cent pieces—Contrivances New York, Nov. 12th.

Notwithstanding the rumored pressure of the mey market, there are always funds forthcomng, when any good speculation presents itself, and New York is the universal mart for all kind of exchanges and traffic. A gentleman last week from Ash county, North Carolina, effected the sale of half of a copper mine on favorable terms It has been usual for the North Carolinians to reain an interest in their mining property, when making a sale here, which ensures the confidence of buyers, and secures a portion of the future profits to the vendors. Specimens of ore are brought on and submitted to examination, and a conditional sale is effected, the parties here agreeing-to send out a practical geologist or miner to examine the deposits, and see if they correspond to the representations made. By these transactons or similar ones. it is easy to see how this city s bound up in the interests of the whole country, as a grand centre of capital and power. N. York is indeed the whole union epitomised.

The first Snow of the season occurred on the 0th of this month. It comes pretty regularly, always between the 10th and 15th of the eleventh onth, which, as its name indicates, used to be the ninth, when the year began with March instead of January. Nothing shows the effeminacy and want of hardihood among people more than o see them rush to their great coats and parlor is a want of bravery and manhood in the habitthe heats of summer are over, the cold of antumn | count." and winter are bracing and strengthening, but the nvigorating effects of it are impaired by too much hick clothing and by over heated rooms, and all our other excessive precautions against a little hysical suffering and endurance.

The North sets the example of more and worse abuses in this respect than the South, for the poor here are driven to the use of stoves, the heat of which is so extremely debilitating and injurious, and the wealthy discard open fires in their dwellings, and depend upon subterranean furnaces to warm their mansions from cellar to garret The consequences of all this artificial temperature in excess is apparent in the pale and sickly look. and consumptive constitutions generally of the ment, but let him at once come at this precious Northern population. The finest physical developments of our country are seen in the West and South West, where there is more out door life, and more robust way of living. In Eastern North Carolina the climate is relaxing, and hot bread sweet potatoes, and feather beds are quite enough to engender a feeble and sickly race. It is necessary to advert to these things for, as we are going to annex all creation, and have not yet more than a third or fourth part of it, we need stout reform, and the bravest and boldest always get Savannah, by the shortest practicable route.

Five and ten cent pieces have of late become quite scarce. It is very rare that they are seen in this quarter. The money changers, who sit at the receipt of custom, have a custom of buying up all oins which are sought for in other parts of the world. Perhaps these little pieces have gone California-wise to Louisiana, to the Sandwich Is-She was 33 years of age, and is supposed to have lands, or some other regions where dealers are the Lowell American) Gen. Cushing for his antiver change is more abundant than it was, and few complaints and sacrifices are now made in New York on that score.

In every large city, there are occasional displays of ingenuity in the many contrivances resorted to to gain a penny. At the expense of a little wit, some toyish invention is hit upon, and then brought out for exhibition and sale in some thoroughfare where the crowd is greatest, and as little time as possible is allowed for examination and reflection. The catchpennies pass off readily in this way, and a successful run upon the merest rifles, for a few days, gives to the mountebanks a snug little capital of ready money. Wall street and Broadway are selected here to palm off all kinds of monstrosities and couriosities, including fast horses, Shanghae Fowls, Angora Cats, and

Yesterday, a man took his stand in Broadway and exhibited a kind of fly-balloon, of colored cut paper, and very pretty. When unfolded, a little artificial bird of red and yellow colors, was seen suspended from the top, and the whole contrivance was quite pleasing, but useless for this rapid sale however, for six-pence a piece, and upon the strength of this success, the inventor will perhaps bring out some other novelty ere long. and address himself to that large class of people in this world, who are tempted by any trifle, and easily seduced by any folly.

It may be that this collision is another version of the report brought by the Franklin, and published yesterday, of the firing into a Russian engineer corps, at the mouth of the Danube and the killing of its major. It may be, however, an entirely different affair. But our dispatch is insatisfactory, and it is therefore almost useless to speculate. THE LATE PRIZE FIGHT.

Great was the excitement among the fancy gentleman of New York, on Monday afternoon, on the announcement that warrants had been received from the authorities of Massachusetts, demanding the arrest of some fifty or sixty of their number, who were speciators of the brutal fight between Sullivan and Morrissey; and greater still was the fluttering, when the Phillstines of the law did actually arrest several of the aforesaid gentlemen. The action of Massachusetts has thus far been very creditable, as she not only makes a requisition for the principal parties in the bruta encounter, but all who were present, and gave their assent, thereby aiding and abetting in the

COUNTERFEIT COIN. The New York papers state that the new American twenty-five cent pieces have been extensive-ly counterfeited, and large numbers of them are in eirculation. When not much worn they are a good imitation, with one exception; the mil on the outer edge is badly done. They are run in moulds and the creases are not clear, and show, or particular examination, that they are not made in the manner of genuine. After use they become dark almost as copper; but a large num them are in circulation that look well, and all nev
