nomical and Philosophical Apparatus is not sur- P passed by that of any similar Institution in the South. The Literary Society of the Institute sus-tains a Monthly Periodical, which is read at the regular meetings of the Society. Extensive courses of lectures are delivered, accompanied with experimental illustrations. The Music Department is furnished with ten new and very superior In stuments, and is conducted by a gentleman Teacher, aided by four lady Colleagues. Musical Solces are held monthly. There is also a large and valuable Organ for daily religious services. The

Bible is regularly studied, and throughout the whole course, regard is had to the moral culture of the Student. The young ladies do not visit the stores nor Post Office, but make all purchases through the agency of friends. All letters receiv-ed pass through the hands of the Principal, and where there is suspicion of a clandestine correspondence, the letters are sent unopened to the Parent or Guardian. The Students do not go abroad without a proper attendant. 'I hey are not allowed to visit, nor to receive calls, nor to attend any exhibition without permission from the Principal. They attend divine service on the Sabbath at such place as the Parent or Guardian may direct. To prevent rivalry in dress, a simple uniform is prescribed. There are two seasons commencing on the 2d Wednesdays o' October and March. The

vacation is from the last Thursday in July to the 2d Wednesday in October. Students can enter at any time and are charged accordingly. No deduction for tuition will be made after entering, except in cases of protrected illness, when one half the bill will be deducted. Parents and Guardians are ladies on the Sabbath. To those living near the railroads, Marfreesboro' is most accessible by the way of Beykin's Depot, on the Staboard and Roanoke Road, 12 miles from the lustitute, where a regular conveyance will always be found. THROW PHYSIC TO DGGS!

PULVERMACHERS

The Institute has a Library, a Reading Room, Hydro Electic Volcanic Chains. olucing instant relief from the most acute pain, and permanently curing all Neuralgic Diseases.

) HEUMATISM, painful and swelled joints, nete-R ralgia, of the face, deafness, blindness. St. Vi-ustdance, pripitations of the heart, periodical head ache, pains in the stomach, indigestion, dyspepsia. uterin: pains.

These chains were first introduced in the city of New York less than one year since, and after being subjected to the most thorough trial in every hospital in the city by Drs. Valentine Mott, Pos Carnochan, and Van Buren, it was discovered that they possess strange and wonderful power in the relief and cure of the above class of diseasers, and they at once recommended, through the papers of. the city, their general use, and their safe and the success that has attended their use, is unparalleled Previous to their introduction into this country, they were used in every hospital in Europe, and are secured by patents in France, Germany, Prussia, and England; and also in the United States. "Think close and ponder well."

The principles upon which it is claimed that the Chains produce their marvelous cures are, firstthat all NERVOUS DISEASES are altended and produced by a deficient supply of nervous fluid and an agent that resembles cloesly electricity or electro magnetism ; and second-that the electio magneticchains, by being worn over and upon the part and organ diseased, furnish to the exhausted nervous system, by its powerful stimulating effects, the throrous fluid which is required to produce a healhey action through the entire system. No disgustcarnestly requested not to bring nor remove young ing nostrum is allowed to be taken while using the chains, but a rigid observance of the general laws of health are required. Brisk friction upon the part diseased adds much to the effect of the chains, by increasing their magnetic power.

1000 DOLLARS will be given to any person who will produce so

many well authenticated certificates of cures, both from intelligent patients and scientific physicians, as have been affected by Pulvermache's Electro Chains. They never fail to perform what they are advertised to do, and no person has ever been dis-satisfied who has given them a trist. In Female Diseases,

more than one hundred permanent currs of prolapsus uteri have been effected within the last year by the use of these chains By applying one end of the chain over the region of the ablomen and t e other upon the spine, just above the hips, the usual severe symptoms incident to that disease are at once removed.
