EARTHLY THINGS FROM A BALLOON

Things upon the surface of the earth look

very strange from the car of the balloon at

a great elevation. An zeronaut named

Brooks, who ascended last week from Worcester, Mass, to a height of one and a half miles, describes the scene thus. The railway cars looked like baby wagons, and the whistle of the locomotive sounded quite

long drawn out. At one time he saw be

ON HAND FOR A TRADE.

A gentleman was once negotiating with a New Hampshire horse-dealer for the

purchase of a mare, but could not agree by

ten dollars. Next morning, however, ma-king up his mind to split the difference, he posted off to the stable, when the first per-son he met was the groom. 'Muster up, Joe?' he inquired. 'No, master be dead,' said Joe, 'but he left word for you to have the mare.' Yankees never lose a trade.

A little boy had a colt and a dog, and his

generosity was often tried by visitors as

to give them one or both of his pets. One day he told a gentleman present he might have his colt--reserving the dog, much to the surprise of his mother, who asked, 'Why, Jackey, why didn't you give him the dog ?'

MISCELLANY. FOREIGN. THE CZAR'S ESCAPE FROM CAPTURE

The circumstances of the Czar's narrow escape from capture by a British steamer in the Gulf of Finland, are thus stated

While the allied fleets were lying before Cronstadt, an English yacht belonging to Lords Li chfield and Eustan, with Lord Clarence Haget on board, ventured somewhat too near the guns of the place. Suddenly a puff of steam was seen on the Russian side, and a small Russian steamer put out to sea, with the evident intention of cutting off the English yacht. On board of that steamer were the Czar Nicholas his son the Archduke Constantine, the Archduchess his wife, and the Russian Admiral, who all went forth to enjoy the satis faction of an easy triumph over the poor little yacht.

An English war steamer sceing the dan-ger to which the yacht was exposed, adneed with all speed to her relief. Shorty she obtained such a position that the English yacht was safe; and the only juestion that remained for discussion was me between the two small war steamers the one under English and the other under Russian colors. Could the English but have known the valuable freight which that steamer contained-could the captain but have known that by capturing her, or seuding her to the bottom, peace would have been restored to Europe, and probably a million human lives, first and last, be saved, no doubt he would have carried one or other of the alternatives into effect; even ough his own destruction, that of his bip, and of every soul on board of her had sen the inevitable consequence. As it was, he saw nothing before him

but a little trumpery steamer—he had car-ried his purpose of relieving the English yacht into effect—and remembered orders, which certainly had been issued, to the effect that no English ship, upon the mere heroic impulse of her commander, should he thrust into the lion's mouth. We have no doubt that this was so, and that when the English captain gave his orders for put-ting the head of his steamer around, he did so with the feeling that he had very satis-factorily discharged the duty with which

he had been entrusted. Little did he suppose, at the moment, that he had lost probably the greatest opportu-nity for obtaining personal distinction which had ever been thrown in the way of a single man. The English nation vene-rates the name of Lord Nelson for the sake of certain little affairs in which he was enaged off Cape St. Vincent at the, Nile, at Copenhagen, at Trafalgar, and elsewhere, but not all of these wonderful, important and heroic achievements combined would have had such an important influence on the history of the world as the capture of that little Russian ship. It was given to the captain of a small steamer to change

Dr. Peter Smith, of Alexandria, has invented a rifle which is designed for shooting conical slugs weighing eight to the pound. The "Alexandria Sentinel" it drives them with such astonishg force and accuracy, that of ten successive shots fired at a target about 15 inches in diameter, and at a distance of 600 yards, every ball struck the mark, and four of them perforated the centra almost exactly !

PATTERSON, N. Y. 20th, 1851. Messrs A. B. & D. SANDS: Genilemen.-Hav-ing witnessed the most beneficial effects from the use of your Sarapparilla, it gives me pleasure to send you the following statement in regard to my son. In the spring of 1818 he took a severe cold. son. In the spring of 1813 he took a severe cold, and after eight weeks of severe suffering the dis-ease settled in his left leg and foot, which soon swelled to the utmost. The swelling was lanced by his physician, and discharged most profusely; after that no less than eleven aleers formed on the leg and foot at one time. Wehad five different Phy-sicians, but none relieved him much; and the last winter found him so emacinted and low that he was unable to leave his led, suffering the most exerucia-ting main. During this time the bone had become

unable to leave his 1 od, suffering the most excrucia-ting pain. During this time the bone had become so much affected that piece after piece came out, of which he has now more than twenty-five preserved in a bottle, varying from one half to one and a half inches in length. We had given up all hopes of his recovery, but at this time we were induced to try your Sarsaparilla, and with its use his health and annetic becau immediately to improve and expreppetite began immediately to improve, and so rap-d was the change that less than a dozen bottles ef-
