AN agreeable Refrigerant and Laxarive. This A preparation is extensively used in the form of Solution or liquid Curate, and has given very general satisfaction. Frequent applications for a preparation in the form of Powder, of similar nature, and properties, have suggested the advantages that might result from its introduction, in that form, especially when the rulk and weight of the liquid Citrate, (an article so justly extremed both by physicians and in private families wherever it has been used,) would intertere with its being sent to great distances; it is destitute of interners, and by its pleasant acidity of faste and its effervescing character, is rendered a very agreeable and refre hing drink, at the same time, that it is a good substitute for Epsom saits or other saline purgatives. Sold by Dr. A. O. BRADLEY. PREPARED CITRATE of MAGNESIA.
