SOUTH CAROLINA COLLEGE. The Columbia Carolinian says: "We understand that the exercises of the College will be resumed on Wednesday, 12th inst., with a full Faculty, Prof. Rivers and Prof. LeCompte having accepted the appointments by the Board. A notice has been sent to the parents and guardians of the tudents to this effect, and we trust they will return to their Alma Mater with the determination to do justice to themselves and her."

We see several articles on this subject by editors and correspondents, in which there is evidently a disposition to stretch the mantle of charity to its utmost tension, over the conduct of the Stu denta. It is due to the public that the Faculty publish a full and true statement of all the facts, and that they " Nothing extenuate nor set down aught in malice." We have no idea that any classification of Society should afford any portion an immunity for ruffianism.

POLITICAL INFATUATION.

There is a notion very honestly entertained by by partles who had previously protested against many people, that a party name gives them an dentity, which no times nor circumstances may change. Hence, we frequently hear those who are among our best and most intelligent citizens, talk in this wise: "I was born a whig, I will live a whig and will die a whig "-or any other party name, as the case may be. My dear sir, the Goose that struls about your yard, was born a Goose, will live a Goose and will die a Goose, from the very sternest necessity-the law of his nature,-But we cannot see the parallel when applied to the immortal mind of man.

THE CLINTON INDEPENDENT. We have received the first number of a neat paper, published at Clinton, N. C., under the above title, at \$2 a year, by EDGAR L. PERKINS, Editor and Proprietor. The Editor states that his paper shall be "independent in every thing and neutral great joy by the Seward press. in nothing.". This is a capital basis, and should be more generally adopted, so that so many individuals may not suppose that the Newspaper they subscribe for must be printed especially for them.

"BORN IN AMERICA."

We do not intend to be personal, because these are troublesome times, and we are one of those persons who can neither fight nor run, and will not, therefore, place ourselves in a "predicament." But we take leave to say, that there are a num- ble fruits. ber of politicians with whom we have been acquainted for the past 80 years, concerning whom we have been unable to observe anything pecuas well as other fowl; besides an innumerable list of "natives," ourselves among the number. Yes, we were all " born in America."

AN OBEDIENT CHILD. At the Ulster (N. Y.) Circuit Court last week a suit for breach of promise was tried between a Miss Jordan and Mr. Jenkins, residents of Gardener, in that county. The contract of marriage and its breach were clearly shown, and the jury gave the plaintiff \$5,000 damages. Both parties are said to be highly respectable, and the only cause assigned for the failure of Jenkins to fulfil his engagement was the opposition of his mother. He is a boy about thirty years of ago. CRUELTY PUNISHED.

We learn from the Chicago Press, that Julius Burth was recently tried in that city, and convic-ted in the Court of Common Pleas on an indictent for malicious mischief. The mischief con roke into his enclosure. Three of the horses had their eyes abot out, and two others were seriou ly injured. The court sentenced the prisoner to three month's imprisonment in the county jail and a fine of \$100—the full extent of the law.

THE PROGRESS OF MEDICINE one of the most eminent men of the age, the Eng-lish physicism, Professor TROMAS HOLLOWAY, R gentlemen who has done more for the advancement of medical science than any other that can which the contest for the Presidency may take be named, not excluding such renowned "savans" AS ABERCROMBIE, RUSH, CLARK OF MAJENDIE. The Professor has been recently travelling in the Unifor the most part for Live Oak George Law, the ted States, having visited this country for the purpose of establishing a depot for the sale of his medicines in New York. It is true that our public have long been familiar with his great reputation, but partly owing to the heavy duty imposed upon imported medicines, and partly to the unwillingness of physicians and druggists to advance the interests of a professional brother, whose superior knowledge and skill threatened to cast their own pretensions into the shade, the sale (although great) in America of his wonderful remedies has not yet equalled the enormous demand which exists throughout the whole of Europe, Australia, the East Indies, and most other parts of the civilized world. It was for this reason that the Professor, a few months ago, determined to make New York the location of a great American depot for the preparation and sale of his medicines, rivalling in extent and usefulness bis celebrated establishment in London, which, as all travellers know, is one of the "institutions" of that city. We have reason to congratulate ourselves, and especially our sick and afflicted fellow citizens, upon his felicitous resolutions. For proceeding step by step, on strictly scienti-

fic principles, the Professor, at the early part of his career, attained to a discovery, which placed him above all competition in the triumphs of the healing art. He noticed how much of the boasted medical knowledge of the present day was empirical, and how little was readly known of the laws of human physiology. Continuing his investigations, a happy thought struck him, like an inspiration, and he located the sest of every disease,-no matter what nature and diagnosis,-inthe blood. The blood has vitality:- the blood is alive; it is indeed in the language of Scripture, "the life of man." If that stream of existence is impure, how can the human being be otherwise than feeble, exhausted, emaciated and afflicted by various forms of disease? To purify the blood, and keep it pure, it is virtually, to banish sick ness from the earth. Here, then is hope for the sufferer. The poor invalid, despairing of recovery, may go forth into the world a renovated and strong man. NEW YORK MARKET. March 3.—The Journal of Commerce reports o Saturday night: Cotton-The market has been active. without change in prices; yesterday afternoon and to-day

4 500 bales were sold at 94 to 124
Navat Stores,—There is a moderate business
doing for home use—Spirits turpentine are firm; we notice sales of 280 bbls at 40, a 42, the lower rate for a lot on the dock. In poor order. In rosin we notice sales of 750 bbls. strained common at \$1,60 per 810 lbs. delivered from yard. Rice.—The market centinues dull at \$4 a = 5 for fair to strictly prime.

Flour - Southern Flour is held firmly, but the

demand is limited to the home trade; the siles are 1,800 bbis. at 8.37; a 8.62; for common to good brands and 8 87; a 9 50 for extra. Corn-Is heavy, and quotations are mostly nominally at 68 a 74 for common to prime Jersey and Southern, 17,000 bushels mixed New Orleans were sold at 70c for distilling; 500 bushels old

Western mixed at 76, in store
The money market is unchanged, with a fair demand from horrowers, and a good supply of capital to loan on prime securities at call on short The Central Bank of Tennessee, about which

The Central Bank of Tennessee, about which we cautioned our readers several weeks has been discredited, as everybody here thought it would be the agents or owners who have been puffing it to get out its circulation now refusing longer to receive them. There are two or three other foreign institutions, one especially in Maryland, hanging by the eyelids, whose bills everybody should refuse. OHARLESTON MARKET.

March I.—Cotton.—The demand to-day continued equal to Saturday's and holders apparently as willing to meet buyers at similar prices.—
The sales, amounting to 2 500 bales at 84 a 104.
