ELECTION DAY.

To-day will decide important issues, and will result, as all elections do, in the exultation of some and the depression of others.

We do not feel it a duty to urge the voters "to the polls." Our fellow citizens have long since appreciated the inestimable privileges of the elective franchise, secured as a right by our Constitutions and Laws, and can need no persuasion to induce them to exercise their sovereignty at a time when, of all others, the consequences of their action will tell, for weal or woe, upon the present as well as future genera-

tions. BARS AND INLETS. Depth of water on the Bars and Inlets of Cape Fear, as reported by Class No. 5, Bar Pilots, Aug. 1, 1856.

"STILL THEY COME." We are requested to insert the following Card, which is another demonstration of conscientiously entered the Know Nothing or American Order, and now they as con-

-at all times an event to be deprecated, but at this period peculiarly pernicious and dangerous, and threatening the rudest shock to our system. What the result will be I will not venture to predict, but I will say that I do not see the least probability of Mr. Fillmore's election by the House of Representatives. I think, therefore, it would be the part of wisdom and patriotism in the Whigs (by which I mean those who affiliated with no other party) to throw their votes for Mr. Buchanan, as the at Madrid, where there has been some desstrongest of the candidates opposed to the Northern sectional party. This they may do without renouncing their old political faith, without stain of honor or suspicion of apostacy. The motive being the integrity of the Union, the defeat of a party which is founded on geographical discriminations and bound together by dangerous

sectional schemes, the act will be vindicated by disinterested patriotism." BURNING OF THE JOHN JAY ON LAKE BRIE-ADDITIONAL PARTICULARS. One of the passengers gives the followng account of this melancholy disaster : There were 75 to 80 passengers, and the

stages had to return across the isthmus at Ticonderoga, [four miles] for a second load, which detained us until near 6, instead of the usual time, about 4 o'clock. We started about six, the company com-

posed chiefly of traveling parties of pleasure, and of the 80 at least 50 were ladies, all in high spirits: After running some two miles, and just as we were opening into the wider part of the lake, the boat took fire and those on board had not time to reach the forward deck, and the pilot and captain were scon forced from the steering wheel. Their intention and hope was to round a rocky point just beyond which was a beach and landing [Garfield's] and a litsettlement called Hague, but the boat struck violently the point of rocks and rebounded into deep water, and was heading

out into the lake. The captain, on the burning of the wheel rope, had run aft and shipped the tiller, which, when the boat struck, hit him in the abdomen and knocked him overboard. He was afterwards

found insensible on the rocks. About this moment, the boat heading out instead of towards the beach, and the flam. es raging fearfully, pressing the passengers forward to the extreme bow, the alarm became general. Trunks and every thing moveable within reach were thrown over as fast as possible, and ladies and gentlemen leaping after them. Many had got outside the guards near the bow and were holding on the railing, ready to leap when the fire should compel them. Among those

were part of Mr. Phœnix's family, and Mr. Sheffield, but the latter, with Miss Phœnix among other, was soon forced overboard by the passing crowd, but was rescued by one of the approaching skiffs. Mr. Phænix fell, or was forced off with the trunks, and was rescued, he knew not how, with a severe contusion of the shoulder. By this time

THE SPANISH INSURRECTION. The London Times of the 19th of July (the day on which the steamer sailed) has the following additional information with regard to the insurrection in Spain.

" For some time past it has been evident that affairs in that country were approaching a crisis, and that some trifling event would result in an explosion. The explosion has come in the shape of a coup d'etat perate fighting (continuous fighting, it is said, for thirty hours) between the people, supported by the national guard, and the troops of the line. According to the des-

patches from the Spanish capital on Thursday the fighting is over, the deaths are numerous, the national guard has been disarmed. But the blaze has extended to the provinces. At Saragossa the people, joined by the garrison, have been victorious, and, according to the intelligence from

Barcelona, Catalonia is in a state of insurrection. The accounts which come from Paris declare that ESPARTERO, instead of having resigned, had been ignominiously dismissed by the QUEEN, and that O'Don-NELL had consented to become the Minister of a coup d'etat. We are also cautioned against trusting too implicity to the telegraphic accounts, which are unduly favorable to the reigning dynasty. One version

of the origin of the affidir is that Christina had been intriguing against Espartero, and that a formidable bill of indictment had been presented against him by the French Minister at Madrid, the Marquis de Turgot. Espartero was summoned to the royal presence, the Queen received him haughtily, surrounded by armed soldiers and, after hearing his explanation, commanded him to leave Madrid within twenty-four hours. His whereabout is unknown, but he is beieved to be at Saragossa or Logrono. It s said that the Queen had sent for Narvaez -a proof that her confidence in O'Donnell's capacity to quell the storm was failing.

All Spain is declared under martial law." MORMONISM IN ST. LOUIS.

The following affair was related to us this morning by a gentleman whom we consider good authority. A few weeks ago a man calling himself Abraham, and claiming to be high priest of the Mormon Church, at Salt Lake City, arrived in this city ostensibly to purchase goods. He visited freely among the Mormon families here.

A few evenings ago he went to the house, and still finding them intractable, said that, as they were spiritually his wives, he would exercise the authority of a husband, and so closed the door and locked it, and attempted to force them to his will. The daughter resisted successfully, and after scratch-

FREMONT IN CALIFORNIA.

THE APPARENT DEFALCATION OF THE STATE OF CALIFORNIA .- The New York News, discussing "Fremont in California," connects Fremont with the San Francisco house of Palmer, Cook and Co.

(a connection well known in Wall street, the New York Express says.) this house being part proprietor of the Mariposs claim, and says :

"These scheming financiers-Palmer, Cook and Co-who are understood to have the best of reasons for opposing the acts of the Vigilauce Committee of San Francisco, were furnished by the State of California with funds-one hundred thousand dollars-to pay interest on her State debt due in New York on the first of July. This interest has never been paid, and the State is in default through the acts of her agents."

ment of the interest due on the State debt, is made use of for other purposes. What disposition has been made of this large fund, we will leave our readers to infer. That Fremont received the nomination-that funds are plentiful for his election-is all well understood; but what the action of the State of California, or of the Vigilance Committee of San Francisco, will be when they hear of the defalcation of this firm, we shall probably learn by the next steamer.

"That Fremont pretended to make an effort on Wall-street to save the credit of the State of California, when it was known that the interest on her State debt would not be paid is well known; and besides this general knowledge, the New York Times stated that Mr. Fremont was through the street trying to raise sixty thousand dollars to apply to this object, and save the honor of his State. But the honor of the State, like the cred-

it of the applicant, was gone; and every Wallstreet man who had looked at the bankrupt records of our courts, the Tax Commissioners' list,

BORDER OUTRAGES.

The New Orleans papers state that serious disturbances have taken place on the Sabine, on the borders of Louisiana and Texas. About forty lawless characters calling themselves "Regulators" have killed Dr. Mages, Charles Sexton, John Fielden, ---- Baxter, Burwell, Alexander, Sheriff, and five or six others. Many others have been compelled to fly. The Governor has been applied to and it is expected he will send troops to put down these lawless doings.

OLE BULL

It is said that Ole Bull who has fiddled thou sands of dollars out of the people of the South feels such a lively interest in the election of Fremont that he was contributed \$500 towards establishing a German Fremont paper in Wisconsin. It is also said that he has determined to take the stump.

THE YELLOW FEVER.

The Yellow Fever is prevailing in Key West, Fla. A letter from that place, dated July 25th, and published in the Charleston Standard, says "There are now some fifteen or twenty cases under treatment, and the existence of an epidemic is no longer a matter of doubt." The disease was introduced by a Havana barque on the 19th of June, and several deaths had occurred up to the date of writing the letter.

Coal in abundance is being discovered in al most every portion of our State, and coal mining will, ere long, be added to our already fruitful resources, and engage the attention of capitalists. THE COMMERCE OF THE LAKER.

From a recent report of the Committee on Con From a recent report of the Committee of Com-merce of the House of Representatives we learn that the increase of Lake toppage for the year ending June 20, 1886, was a fraction less than nincteen per cent. A greater amount of toppage enters and clears on the Lakes between the Unit-ed States and Canada than between the United States and Canada than between the United States and any other foreign port. The Lake tonnage for 1855 was 845.000 tons, which, walnes at 845 per ton, is \$14,858.000. The present water of Lake commerce (exclusive of Presque Isle and at 540 per ton, is 514,888 000. The presque lale an Mackinac, not reported) is 5608,310,320. The value of property exposed to perile of Lake new gation is greater than all the merchaodise export ed from the United States to all foreign countries or imported from all foreign countries to the U
