GREENSBORO, Oct. 24 -The most brutal. unfeeling murder we ever heard of, was perpetrated in the Western part of this county, on Saturday evening last. A young woman by the name of Martha Pinnix, daughter of John Pinnix, started on that afternoon, to go from one neighbor's house to another; but not arriving, her friends and neighbors, becoming alarm on the south-east corner of Green and ed, made diligent search from Saturday Lexington streets, was horribly burned night till Monday morning, when her dead on Tuesday evening by the explosion body was found in a thicket in the woods, having been shot through the head with a was asleep near the lamp, and that she shot gun, and her throat horribly cut. She had evidently been enuced into the woods by some devilish fiend in human shape, and then brutally murdered.

We'refrain, at present, from prudential considerations, from publishing the names of any suspected of this foul deed, or to give currency to the many rumors connec- Claggett, clerk of the steamer Belvidere, ted with the matter. # PANTHER KILLED.

A Panther, measuring nine feet from tip to tip, was killed in 12 miles of this place. says the Dahglonega Signal, near the foot of the mountain a few days since, by a lad about twelve years old. His father had sent him out to drive up the cattle; he had not proceeded far before he beard the cattle bellowing at a tremendous rate, and making in the direction of home. He quickened his pace with gun in hand, when in about sixty yards of the cattle, he discovered something squat, leaving nothing Massachusetts, and the seventh was but the head visible, which he supposed from Tennessee. SOUNDING THE ATLANTIC. The Steamer Arctic, which arrived at New York on Tuesday, has sounded plished without difficulties, as many of the instruments used were new inventions. The bed of the ocean in the section traversed by the Arctic, is a platan,

The bottom in the deepest part is a so soft that the sounding instruments ginal Grocer. frequently sank several feet into the the bottom, at every sounding, in quils which were attached to the end of the sounding instrument. Toward the shore on each side, this mud changes into a fine green ooze. No other substances were met with, no rock, nor anything that might prove fatal to a telegraph wire. There seems to be now nothing to hinder the great work, to unite Europe and America by means of a telegraph wire, an undertaking so grand that few thought it possible .-The whole distance across was found to be 1,649 sea miles, from St. John, N. F., to Valentia Harbor, Ireland. The greatest depth was found nearly in the centre between these two places. The profile of the Atlantic bed, on this route, is of by far easier grade than many of our rail road profiles.

### PROSPECTUS OF THE "SOUTHERN SENTINEL,"

A Democratic and Miscellaneous Journal, to be published weekly, at Wilson, N. C. THE existing condition of political parties, and of partizan strife, naturally suggests the establishing of such a journal as the "Southern Senti-nel" proposes to become. The present, indeed, is a crisis in our political history, never witnessed be fore. The Constitution has been invaded; the law trainpled and spat upon; religious herry assailed ballot boxes broken and burnt; the landmarks o our political ancestry partially effaced; the wisseated; strange and questionable men have been pushed into high positions; and fanaticism, unchained from its axe and its faggot piles in the North, is heard to how among us in the South. These evils, so far as it humble abilities shall serve

the Constitution, as it has been interpreted by the wise men of the past and by the Fashers of the Democratic faith. It will defend not only political five, ten or mere copies.
