FOURTH OF JULY. The town authorities and Light Infantry Company, the German Volunteers, the Rifle Cadets and the Pioneer Cadets have made arrangements

to celebrate the approaching 4th of July. M. Wappell, Esq. will deliver the Oration, Julius W. WRIGHT will read the Natio al Declaration of Independence, and DoBRUTZ CUTLAR, Esq. the Mecklenburg Declaration. We suppose the Programme will soon be made public. The Journal of Thursday has the following :-The alarm of fire last night, proceeded from the

burning of a Soap and Candle Factory on the Southern verge of the town, and a little east of Second Street. The establishment belonged to Mesars. Costin & Gafford. The building in which the business was carried on, was totally destroyed, and a dwelling bonse near, occupied by the Superintendent with his family was also pretty much rained.

"The loss is estimated at about \$5,500, of which \$3 500 is covered by insurance. Measrs. Costin & Gafford request us to return

their thanks to the "Howard" and "Go-a head" fire companies for their exertions on the occasion. They regret that the lateness of the hour made them unable to offer the firemen such refreshments as they would have wished."

DR. DEEMS.

We learn from the southern papers, that our townsman Rev. Dr. DEEMS, will deliver addresses July, and at Emory College, Oxford, Georgia, on the 21st of the same month. Our people here know how f rtunate these Institutions have been in obtaining the services of Dr. DEEMS, whose fine talents and high character we are pleased to find are appreciated abroad as well as at home. TAKE NOTICE.

Our readers will please take notice and observe the vast advantages that the free States possess over the slave States, in the matter of sobriety, econcy, order, cleanline s, honesty, chastity, and all sorts of purities and amiable personalities .-The following is from the New York Tribune, a paper that cannot be suspected of exaggeration or misrepresentation in the statements below, however the editor way be disposed to "draw a long bow" in other matters. Read it fellow-citizens and sinners of the South, and hide your faces in shame. Read it, and "then to breakfast with \$6 000. what appetite you may."

Mr. GREELY of the Tribune says: have been at least twice sixteen attempts at murier, besides violent assaults and rum hole fights without precedent. This whole affair was the unluckiest thing possible for Gen. Walker, though it did provide a ready made crowd for bim, on the evening of his advent. If he had come here last week he would have been lionized, but we can't do everything at ouce.

The weather is most extraordinary. It has been moist and fizzling all the week, and to-day we have a hearty shower. Coal fires have been comfortable. All this has tended to check business, and the week has been extremely dull, tho this is usual in the latter part of June. The southwestern trade generally opens about the second week in July. Pyrotechnics are beginning to sell. The high price and small supply of fire crackers will probably induce the offering of some substitute. Nothing can be manufactured here generally which will compete with the wonderfully cheap products of Chineso industry. Who in this country could produce a pack of fire crackers for two cents? Some goods manufactured here expressly for the Western trade have been sold very low, owing to the diminished demand from that quarter during the season. We have seen well made Marsellles caps for spring wear, selling at one York shilling, at retail! Probably the producer got sixpence.

The Burdell marriage case progresses slowly with some hard swearing on one side or the oth er. Thus far the complexion of it is decidedly favorable to Mrs. Cunningham, and if this suit results in her favor, it may diminish the popular started for the country, as the weather has not held out any inducements to such a course as yet. The number of fashionables preparing to make the tour of Europe this summer is unusually large. We are informed that the Trustees of Columbia College contemplate establishing in this city, a free university course, with lectures by men of known ability, designed particularly for the benefit of artisans, engineers, etc. When this shall have been completed, New York city thick to feed out to the hers and chickens when will afford inducements to the student almost as cool. In twenty-four hours after using this food, great as those of any German city. We have had the poultry will be clear of the lice, as will also a few murders this week, but the public mind has been too much excited to notice them. The weather is favorable to self-destruction; one almanac says 'expect suicides about these days." **.

DESTRUCTIVE CONFLAGRATION.

A very destructive fire broke out in this city on yesterday morning, between two and three o'clock, which consumed almost an entire block of small gamblers prey on the credulous buildings. The fire originated in the house of S. The block was occupied by J. W. DEPARTMENT OF STATE, Washington, April 28, 1857. My Loan: I have the honor to acknowledge the receipt of your lordship's note of the 10th instant, stating that the attention of her Majesty's Government and of the British public has of late been awakened to the irregularities attending the papers. During a part of Wednesday half the enlistment of seamen on board the mercantile vessels of the United States, and the nature of their

> Your lordship expresses a hope that some remedial measure may be suggested for these abuses. In reply, I have the honor to state that it is believed the laws now in force upon the subject of seamen employed on board the merchant vessels of the United States are quite sufficient for their protection. The execution of the e laws in foreign countries for the most part devolves upon Consuls. It is possible that these officers may discharge of their duty in her Majesty's ports .-This Department, however, is not aware of any such delinquencies; but, upon being satisfied of proper remedy. It is presumed that scamen required for the British mercantile marine in her Majesty's own ports are more or less subject to the same grievance .-I should be glad to concur in any measures for the relief of this useful class of persons, but the laws of this country, intended to prevent their maltreatment, are as effective, it is believed, as those of any other. DEATH IN THE CARS. The following affecting incident is related in a private letter from a gentleman traveling in the

"We had a peculiar and affecting scene in the cars, which cast a deep sadness over the whole day. At Michigan city, where we changed cars, we observed them moving a sick girl. The party consisted of a brother of about twenty years, a sister of about sixteen, and the mother. The invalid appeared about twenty-five, very emaciated, but with those lustrous eyes so common in her disease, consumption, and which fascinated while it pained us to look at her. The tenderness and devotion of her people was really beautiful. After we had gone some fifty miles, while she was reclining on her mother's breast, who was gently and carefully smoothing her hair, she suddenly raised herself and fell back dead .-Then followed such a scene of wild and frantic of the passengers, that no power of mine can describe; and this was continued for fifty miles or more. We old tough hearts found there was one little spot not quite hardened."

Many of the provincial capitals have a population ranging from 500,000 to \$1,000,000.

A SUBSTITUTE FOR STEAM.

A professor in Baltimore has invented a motor that the Patriot thinks may prove a substitute for steam. It is produced by a compound of de sulphated bi sulphuret of carbon, coaltar, and volatile or fixed oil, which, under certain influences of heat, becomes powerfully expressive and thus gives momentum. The heater where the gas or fluid is introduced, is submerged in a cistern of heated oil, kept hot by a gentle fire. In this condition the gas expands, gaining its power, and passing through pipes and valves, acts upon the piston, giving motion to the engine. The appliance are simple, easy of comprehension, free from complication and not subject to accident or disarrangement. Thus a steady active force is at all times kept up. The cost of this fluid is estimated at ten cents per gallon, and it is demonwill run an engine of the capacity here noticed.

Correspondence of the N. Y. Times FROM CHINA. The Murderer of Mr. Cunningham Breen Progress of the Rebels. UNITED STATES STEAMER SAN JACINT

Hone Kone, China, Saturday, April 25, 1857. The movements of the rebels are just now attracting morn than ordinary attention. Dr. Parker has recently received despatches from the American Consul at Foo Chow Foo, advising the ending, forthwith, of an armed vessel to the place to protect and afford a refuge to our citizens and their property. The rebels are encamped within half a mile of the city walls, numbering some seventy-five thousand strong. A battle was fought recently near the city, resulting in the defeat of the Imperialists with a loss on their side of twelve handred. Owing to the disturbances, the remittances from the tea district had been sent back, and it was feared that the trade in that article would be greatly injured.

The rebels still continue to menace Canton; as vet they have not attacked the city. There are two parties of them in the district of Cheng, (near Canton.) who are about uniting their forces and making a joint attack on the city. His Excellency Governor Yeh is making all possible preparation for the defince of the "fourth city in the some instances, have been delinquent in the world." A large portion of his army had been disbanded, owing to the inability of the Government to pay and provide for them His excellency now finds the greatest difficulty in procuring their existence, will not hesitate to apply the troops, owing to the above named causes, Famine prevails at Canton, and the people have difficulty to sustain life. SENATOR BUTLER AND THE NEGRO WO-MAN'S PRAYER.

The Newberry Rising Sun, gives the following needote of the late Senator Andrew Pickens Butler, of S. C. "During his passage from Charleston to Wil-

mington, on his first trip as Senator to Washington, the boat was overtaken by a storm, which rendered her an unmanageable wreck. She had een forty-eight hours at sea, and the captain the trough of the sea, and expected every moment to founder, Judge Butler had all called forward, and desired that each should know one another, so that if any reached the land, he, she or they, might report the fate of the others. An elderly negro woman, (the stewardess, perhaps,) said, "Old master, this is no time for introductions ; you had better pray." He said, 'I cannot, but pray old lady, if you can.' She instantly knelt down and poured put a fervent prayer to God for deliverance. In a moment after the lights of the steamer sent from Wilmington in search of the missing boat were seen, and they were saved. Mrs. Thompson, who heard the Judge's narration after his return home, said to him. "Brother Pickens, that old woman's prayer saved you."

OVER THE FALLS. The Holyoke (Mass.) Mirror, of the 18th, gives the following account of a daring attempt to cross | 25 cents per bottle. the Connecticut river at that place, and death of the navigator :

"On Frinay morning, about 7 o'clock, an Irishman of twenty years of age, who had been but a few days in this country, attempted to cross the river in a small boat from this place to South Hadley Falls, in search of work. Not having any oars at hand, he substituted some strips of board, little caculating the force of the current, as also of the wind, which was blowing strongly at the time. When near the opposite shore, he allowed his boat to head down stream, thinking to land at the abutment at the head of the canal; but before he was aware, his boat was beyond his control and rapidly nearing the fatal falls. He was seen to struggle manfully against the current for a while, and heard to scream loudly for help, but all to no purpose. When he knew that he must go over the falls he lay down in his boat and resigned himself to his fate. His boat came out of the foaming waters much broken, and floated away down stream, but nothing could be seen or has since been discovered of the body of the man."

ILLNESS OF GEN. WOOL A letter from Troy says: You will be surprised and alarmed to learn that Major General Wool lies in a very precarious state at his residence in this city, laboring under a sudden and severe fit of illness, so severe that his recovery is a matter of doubt. The General during the past week has been suffering from a bad cold, which, on Sunday, increased and resolved itself into pneumonia or inflammation of the lougs, which contiqued until yesterday, when the symptoms took a dangerous turn, and a new ally, bronchitis, set in, stronger than all the Mexicans who were leagued against the old veteran at Buena Vista .-This complication of diseases has rendered the General very low and feeble, and his life is really in very great danger. General Wool has an attending physician, Dr. Thorn, of this city; as consulting physicians, Dr. James McNaughton, of Albany, and Dr. Watkins, of Troy.

thought proper to make known one of the mos extraordinary cures, in my own case, that has ever been truly recorded. In the month of October last I was afflicted with a severe gathering in my breast, which formed a large abscess, and also communicated to my Lungs and very much afflicted them, and discharged large quantities of corruption, external and internal. My breath could also pass through my Lungs and out through the cav ity of my breast with apparent case, attended with a violent cough, day and night, loss of appetite, and extreme debility, so that my physicians thought my case entirely hopeless and beyond the power of medicine. I remained in this wretched condition for a long time, until I was wasted to mere skeleion, and there seemed to be no hope for me; but having read in the public papers of the many wonderful cures performed by your COM-POUND SYRUP OF WILD CHERRY, I immediately sent to Baltimore for five bottles and ommenced its use, and to my great satisfaction and my anxious lamily, the abscess or opening is my lungs began to heal, and the cough subsided and on using ten bottles I was restored to perfect health. I believe, that to your valuable medicine, under the blessings of Divine Providence, I am indebted for this great change, and I am happy to say, that I am now enjoying as good health as I Over five years have claused, and I still remain

Rats, Roaches, Bed-Bugs, Insects, &c. NEW YORK, April 12, 1856 -- Mr. HENRY R. COSTAR, No. 888 Broadway .- Dear Sir: Having a great many Rats around my stable and shop, I thought I would try your Bat Exterminator, and bought one of your boxes, and my man fixed it acrording to your directions. The next morning he found over 150 dead rats. I have bought others Rat Poison and found them humbugs, and think it will do more than you say it will in your advertisements. I have also tried it on steamboats, and satisfied them that it is the greatest thing of the age. Respectfully Yours.

J. S. UNDERHILL, No. 435 10th st. Notice to ALL CONCERNED .- The demand for "Costars" Remedies for the destruction of the above pests, having occasioned an unlimited correspondence in regard to prices, etc., the proprietor has determined to unblish the same in his advertisements hereafter. "Costar" prefers that every city, town and village shall be supplied through its own Druggests and Dealers, but, in cases where this is impracticable he will forward small orders by Mail or Express, on receipt of the price, with sufficient to pre-pay the same. See advertisement, with retail prices, etc , in another column. DEAR SIRS :-- We began selling Perry Davis'

Pain Killer with very little effort on our part; sales were small at first but as it became known n our community, the demand increased very rapidly far beyond our expectations, and every person that bought it would come aft r more, and speak in the highest terms of it as a valuable remedy for all those diseases your pamphlet spoke of. From these recommendations we were innced to use it in our own families and now continne its use with great satisfaction. We have sold more of the Pain Killer than we ever have since or before of any other medicine in the same high-toned Pictorial Weekly Paper, which ought length of time; and we do not hesitate to say to be read by every Family. Published at \$2 a that it has given better satisfaction to the purchayear, \$1 for half a year, and to c ubs of four three | ser than any other article we have ever sold -Harry of businees has prevented on: sending certificates, but we have in our vicinity from fifteen hundred to two thousand living witnesses who testify to their neighbors, day by day, of the value of Davis' Pain Killer. Keep a large supply in the West, it is just such a medicine as the people want, and they have already found out that they can cure the Fever and Agne for twenty-five cents. It will cure a cold in one hour-a severe cough in one right-and has proved to be the hest medicine in use for a deceased stomach and many other purpose
