INHALATION IN CONSUMPTION. BRONCHITIS, Larvgitis, and other discusses of the Chest and Throat, successfully treated by the inhalation of Metilizated Vapors and Powders, by absorption and constitutional treatment, as practiced at the Stüvvesant Medical Institute, New York City.

The unprecedented success which has arrended

this method of feasing discusses of the Lungs and Throat, his induced its to depart from our send course, and avail offiselves of the colorina of the Press, in order to bring it to the knowledge of such as may be laboring under, or predisposed to such affections. The dawn of a brighter day has arrived for the consumptive; the doctrine of the incuraed for the consumptive; the doctrine of the incurability of Consumption having at length passed away. We have indubitable proofs in our posses sich, that Consumption, In all its stages; can be cured!—in the first by tubercular absorptions; in the second, by traffermation of tubercular into chilky and culecteous concretions; if the third, by clearices or seafs. Thuse wedned to the opinions of the past may assert, that even how Consumption is incurable; such are behind the age. To all this great truth must be apparent, viz: that the medicine lithaled in the form of vapor or powder, directly into Lungs, must be thore effectual than that taken into the stornesh; witere the disease that taken into the stomach; where the disease does not exist. The advantage of inflalation in Consumption and throat diseases is, that medicines in the form of vapor are applied directly to the lungs, where the disease exists; the stomach is thus left free to aid in restoring by administering to it healthy life-giving food. There is no case to hopeless that Inhalation will not reach! The means, too, are brought within the reach of all, the manner of administering the Vapors being so simle that the invalid is never required to leave home, where the hand of riendship and affection tend so

much to aid the physician's efforts. The inhaling method is soothing, safe and spee-dy, and consists in the administration of medicines in such a manner that they are conveyed into the Lungs into the form of Vapor, and produce their ction at the seat of the disease. Its practicalsuccess is destined to revolutionize the opinions of the medical world, and establish the entire cufability of

Consumption.

I carnestly appeal to the common sense of all afflicted with Ling diseases, to embrace at once the dvantages of Ithalation; and no longer apply nedicine to the unoffending stomach. I claim for Inhalation a place among the priceless gifts that nature and arthath given us, that 'our days may be long in the land," and as the only Ark of refuge for the Consumptive a method not only ra-tional, but simple, safe and efficacious. Such of the profession that have adopted. In-halation have found it efficacious in the highest degree, arresting the progress of the disease, and working wonders in many desperate cases. In verity a signal trittmph of our art over this fell

destroyer of our species.

"THE SOUTHERN CITIZIN." A New Political Commercial and Literary Journa JOHN MITCHELL & WILLIAM G. SWAN, EDITORS AND PROPRIETORS.

E Title of this Jouanal, with the names of ils Editors, may be nearly enough to indiate its aims. One of those Editors being an American cliften by birth; the other intending to become such b adoption; there is no question affecting the desinces of Americans, on which they will held stamp.

themselves debarred from openly express The one a Southerner by birth-the other by preference, they cannot be of those who know "No South, No North." They well know both; and in the struggle which the South is now called upon to make for her own rights and honor, they mean to stand with the South.

A thoroughly Democratic and States-Rights Journal, "The Southern Citizen" will neverthe-

less decline to be called "Partizan ;" unless the Constitution of the United States is to be called a partizan document. It will uphold the Federal Union, provided the sovereignity of the confederated States be respect

ed: if not, not. Holding that the Institution of Negro Slavery is a sound, just, wholesome Institution; and therefore, that the question of re-opening the African Slave Trade, is a question of expediency alone, the conductors of "The Southern Citizen" will inview of the late action of the Southern Comme cial Contention, at Knoxville, apply themselves to search offt and bring to light, all accessible information bearing upon that important subject-on the whole industrial condition and necessities of the South-on the actual state of the negro races of Africa, and on the policy and action of Eu will be guided in the matter of State Politics, he the general principles above indicated. It will belong to no cliffue of office seekers. In short, it will support the candidates for all officers, who will support the equal rights of the Sovereign tates, North and South—the equal rights of the Sovereign Citizens, wherever they may have been born, wherever they may worship or not worship. On Agricultural and Commercial affairs-on the progress of Internal Improvements, and especially of our Southern Rallroads, there will be an ample

and carefully compiled weekly teport.

Literary articles and Reviews, will frm a main feature of "The Southern Citizen." Intellectus grandeur, wherever it appears in the world, shall meet prompt and zealous racognicion. We do no need to shut out light and stiffe inquiry: but, in EMPTY BARREL'S

HOUSTON'S PATENT SKID SCALES. THESE Scales, for which the inventor has obI talned Letters Patent from the United States
Government, are intended to sufferfice the present
cumbrons and objectionable apparatus used for
weighing cylindrical packages, such as barrels,
tlettes, dec., containing articles usually soid by
weight. Also for weighing belos of cotton, hay,
or other Slittlar packages. The advantage claimed
for them over the ordinary Scales in tise, are that
no hoisting is required, as life artible to be weight
is immediately suspended by its own gravity, and
without strain, on reaching a given point beneath
the Scale beam—thus eaving a large amount of

inhalation, is to me a source of unalloyed pleasure. It is as much under the contol of medical treatment as any other formideble disease; ninety out of every linitized cases can be cared in the first stages, and fifty per cent in the second; but in the third stage it is impossible to save fiftore than five per cent, lot the Lungs are so cut up by the discase as to bil defindee to medical skill. Even, however; in the last stages, Inhalation allords extraordinary relief to the suffering altending this fearful scourge, which annually destroys ninety-five thousand persons in the United states alone; and a correct calculation shows that of the present

population of the earth, eighty millions are destin-ed to fill the Coustimplise's grave. Truly the quiver of death has no arrow so fatal as Consumption. In allages it has been the great enemy of life, for it spares neither age nor sex but sweeps off allke the brave, the beautiful, the graceful and the gifted. By the help of that Supreme Being from whom cometh every good and perfect gift, I am enabled to offer to the affleted a permanent and speedy cure in C usumption. The first cause of lubercles is from impure blood, and the immediate effect produced by their deposition in the lungs is to prevent the tree admission of air into the air cells, which causes a weakened vitality through the entire system. Then surely it is more rational to expect greater good from Hedicin es entering the cavilies of the lungs than from those administered through the stomach; the patient will always find the lungs free and the breathing easy, after thhelling remedies. Thus, Inhala-tion is a local remedy, nevertheless it acts consinationally, and with more power and certainty than remedies iministered by the stomach. To prove the powerful and direct influence of this mode of administration, chloroform is haled will entirely destroy sensibility in a few minutes, paralyzing the entire nervous system so that a limb may be amputated without the slightest pain; inhaling the ordinary burning gas will destroy life in a few hours.

The inhalation of ammonia will rouse the system-when Rinting or apparently dead. The order of many of the modificines is perceptible in the skin a few minutes after being inhaled, and may be immediately detected in the blood. A convincing proof of the constitutional effects of inhalation, is the fact that sickness is always produced by breath-The inhalation of ammonia will rouse the systemthe fact that sick ness is always produced by breathing foul air-is this not positive evidence that proper remodles, carefully prepared and judiciously administered through the lungs should produce the lungs and threat, have been under my care, and I have effected many remarkable cures, even after the sufferers had been pronounced in the last stages which fully sittle es the thit consumption is no dor ger a fatal discase. My riedtment of communion for is original, and founded on long experience and a thorough investigation My perfect acquaintance with the nature of tubercles, &c., enables me to distinguish; readily, the various forms of disease that simulate consumption, and apply the proper remedies, rately being mistaken even in a single case. This familiarity, in connection with certain pathological and microscopic discoveries, enables me to relieve the lungs from the effects of contracted chests, to enlarge the chest, purify the blood, mpart to its renewed vitality, giving energy and

one to the entire system.

Medicines with full directions sent to any part of the United states and Canadas by patients communicating their symptoms by letter. But the cure would be more certain if the patient should pay me a visit, which would give an opportunity to examine the lungs and enable me to prescribe with much greater certainty, and then the cure could be effected without my seeing the patient again. DR. MORSE'S INDIAN ROOT PILLS

DR. MORSE, the inventor of MORSE'S IN-DIAN ROOT PILLS, has spent the greater part of his life is traveling, laving visited Europe, Asia, and Africa as well as North America—has spent three years among the Ir dians of our Wra-tern country—it was in this to y that the Indian Root Pills were first discovered. Dr. Morse was the first man to establish the fact that all discover-arise from IMPURITY OF THE BLOOD—that our strength, health and life depressed by the life in the our strength, health and life depended by on this

CONSUMPTION

AND ALL

DISEASES of the LUNGS and THEOAT

CURED BY INHALATION.

Which conveys the remedies if the cavities in the lungs, through the air passaged, and coming in direct contact with the disease; neutralizes the turned of the court of the court, causes a free the blood, imparts renewed vitality to the nervous system giving that tone and energy so indispensable for the restoration of health. To be able to state confidently that Consumption is certable by inhalatioff, is this a source of usallayed pleasure. It is as much under the contol of medical treatment.

From the above, it is snown that Dr. Morse's Indian Root Pills bot only enter the stomach, but become united with the blood, for they find way to every part, and completely rout out and change the system from all impurity, and the life of the body, which is the blood, becomes perfectly healthy; consequently all sickness and pain is driven from the system, for they cannot remain when the body becomes so pure and their

body becomes so pure and clear.

The reason why people are so distressed when sick, and why so tunky die, is because they do not sick, and why so many die, is because they do not get a medicine which will pass to the afflicted parts and which will open the natural passages for the disease to be cast out; hence, a large quantity of food and other matter is lodged, and the stomuch and intestines are literally overflewing with the corrupted mass; thus undergoing disagreeable fermentation, constantly mixing with the blood, which throws the corrupted matter through corrupted mass; thus undergoing disagreeable fermentation, constantly mixing with the blood, which throws the corrupted matter through every vein and artery, until life is taken from the bedy by disease. Dr. Morse's PILLS have added to the mselves yietory upon victory, by restoring millions of the sick to blooming health shi happiness. Yes, thousands who have been racked or tormented with sickness, pain and auguish, and whose feeble frames have been scorched, by the burning elements of raging fever, and who have been brought, as it ware, within a step of the silent grave, now stand reader to testify that they would have been numbered with the dead, had not been for this great and wonderful medicine. Morse's Indian Root Pills. After one or two disas had been taken, they were as tonished, and ab solutely surprised, in witnessing their charming effects. Not only do they give immediate ease and strength, and take away all sickness, pain and anguish but they at once go to work at the foundation of the disease, which is the anguish but they at once go to work at the foun-dation of the disease, which is the blood. Therefore, it will be shown, especially by those who use these Pills, that they will so cleaner and purify. that disease—that deadly enemy will take its flight, and the flush of youth and beauty will again return, and the prospect of a long and happy life will cherish and brighten your days.

Dr. Morse's Indian Root Pills are sold by al

dealers in Medicines. Agents wanted in every town, village and ham-let in the land. Partles desiring the agency will S as above for terms Price 25 cents per box, five boxes will be sent on receipt of \$1, postage paid.

AFFLICTED READ !! DHILADELPHIA MEDICAL HOUSE, Restablished twenty-two years ago by Dr. KINKF.LIN, corner of Third and Union streets.

Philadelphia, Pa. TWENTY-TWO TEARS! Experience has rendered Dr. K. a most successful practitioner in the cure of all diseases of a private nature; manhood's debl'ty, as an impediment to marriage; nervous and sexual in firmities, discuses of the skin, and those arising

from abuse of mercury.
TAKE PARTICULAR NOTICE. There is an evil habit sometimes indulged in by boys, in solitude, often growing up with them to manhood; and which, if not reformed in due time not only begets serious obstacles to matrimoni al happiness, but gives rise to a series of pro-tracted, insidious, and devastating affections.

Few of those who give way to this permitious practice are aware of the consequences, until they find the nervous system shattered, feelstrange and anaccountable sensations, and vague fears in the mind. (See pages, 27, 28, 29, of Dr. R's book on "Self Preservation,")
The unfortunate thus affected becomes tooble, is

nnable to labor will accustomed vigor, or to ap-ply his mind to study: his step is tardy and weak; ply his mind to study: his step is tardy and weak; he is dull, irresolute, and engages even in his sports with less energy than usual.

If he emancipate hithself before the practice has done its worst, at lenter matrimony, his marriage is unfriitful, and his sense tells him that this is caused by his early follies. These are considerationally and his sense to the state of the sta tions which should awaken the attention of all who
