Cyclones, storms and cloud-pursts have been getting in their work throughout the pountry. There is no telling what may lappen with a man like Harrison for Pres. ident, Tom Reed boss bulldoser in the Honse, and Uncle Jerry Rusk running the weather department. They are getting things fearfully mixed -Star.

We have been requested to use our influence for Hon. W. M. Bond, of Edenton, for Solicitor, but as our townsmgn, Mr. C. 1. Pettigrew, is in the field for the nomination, we are holding back, We believe that his chances are as good as anyone's, and believing him to be in every way worthy and capable of filling that office acceptably, we are for him as long as he is in the field, and should he withdraw, then our influence will be turned to the next best man.

Mr. Pettigrew's ability as a lawyer, his patriotism and devotion to the Democratic rty is too well known all over the Firs District for us to say much in his favor not PENITENTIARY STATEMENT. already known, but we would earn-sily beseeh the people to support him, and ask News and Observer. that the County Convention endorse him as its nominee and instruct its delegates to receipts and disbursements of the State vote for him at the convention in Edenton penitentiary for the quarter ending May 32, on the 29th just.

THERE never was a time in the history of this country, says the Wilmington Etar. when the farmers took as much interest in governmental matters as they are but in these other places, the investing of now taking. This is attributable to two things; one the campaign of education foundation, and that, with the advent of which was mangurated in the Western States some time ago by leading Democrats, where great popular meetings were held and tible and eminent speakers discussed the tariff and other issues in which the people were interested. These meetings although under Democratic auspices were non-partisan in their character and were whom were Republicant and most of them firmers. In this way the required acquired firmers. In this way the people acquired in the South, and not only benefit the much information on subjects to which State but make fortunes for those invest. they had previously given but little atten- ing, But it may be said that it was out. tion, and which many of them heard discussed before from a partisan standpoint our State have not enough money for the only. They were thus educated out of capital required to mangurate such large pour of the errors into which they had enterprises. This is true, hat ano her boun of coated, and they began to see difterently, to think differently and to think ferently, to think differently and to think ey, other investors will quickly join us, for themselves, instead of allowing others. The treable is, the people of North Caroliando their thinking for them, as they had no seem to think with the old Scotch adage en in the habit of doing.

The other was the organization of the Carmers' Alilance, which was expedited by is public affairs awakened by the discus- ngit.

public questions listened to.

The result has been that Ohio, a strong Cepublican State, was revolutionized and Iowa, one of the strong at of the strong Republican States, was nearly revolutionized, the Democrats electing a Governor for the first time in churty five years, and requiring but a few votes of having a ma. ority on joint ballot in the Legislature. andiana, Michigan and even Kausas have become debitable ground.

as well, they naturally Grifted into the fighting the battles of the toiling millions against the rings, jobbers, monopolists and money kings, who owned the leaders of the Republican party and dictated its policy. The Democratic party had been for twentyfive years, even when in a hopeless injuor. ity, fighting the battles of the people for low tariff taxes, for retrenchment in expenses, for a better monetary system and more currency to meet the demands of business, to grush monopolies, destroy trusts, restrain transportation corporations from de. manding oppressive tribute from the people for services rendered, to prevent frauduleut and corrupt pensions by which the people are robbed of millions of dollars annually, to recover the millions of acres of the publie domain which had been stolen under forms of law from the people, to protect the working men in factories, mines and shops from the hordes of pauper labor imported by the protected owners of these factories, mines and shops,

For these, and other reasons, thousands of farmers and others who earned their money by hard labor, who had under a defusion been voting with the Repuis ican party, severed their connection with it and are now found within the Democratic

The farmer or other toiler has no grievance against the Domocratic party, which has been since its first organization and is to day the party of the people, not the party of the farmers only, for it knows no special calling nor class, but is for the people for whom this government was I and authority, and in whose interest it and go out. should be administered. If the Democratic party were in the ascendency to-day, had control of the respective branches of this government, and its policy prevailed, there would be no legislative class favoritism, no class discrimination, no bardens imposed on one class for the benefit of another, no pinnder of the many to emich the few, and there would be no occasion for the farmer cers. appearing in the political areng as a fargier, nor the laborer as a laborer, nor the man ufacturer as a manufacturer, nor the wool grower as a wool grower, for its policy, which would treat all alike, would do justice to all and leave no ground of complaint for any. When Democracy is triumphant at 3 o'clock P M. and its policy becomes the policy of this government, then the redemption of the farmer and of all the toilers will come, but not till then.

The News and Observer says that it learns that Raleigh and Durham men in. vested about \$30,000 in last week's sale of town lots in Kimball, Tenn. Now, there whosever an outside town is on a boom, will rush off to make investments, seeming to forget that North Carolina offers the grandest field for profitable investment, of any State in the Union, if not of any coun. try under the sun But the answer to this will be: "We know this to be the fact. millions of dollars is a guaranten of their We know that they have the manufactories and business enterprises of all kinds, coupled with the business push and enterprise, which always follow capital real estate is bound to ingrease in value We therefore consider such investment both secure and profitable "

This reasoning is in the main, correct, but we have better opportunities in our which nature has endowed with every roside capital that started these healities on our own faith by jutting in our own mon. "Far away cattle hae long horas."
