EDITORS.

Ouite naturally we have been reading what the editors have had to say about the meeting at Morehead two weeks ago. Rev. J. O. Atkinson, of the Christian Sun, published at Elon College, among other things said :

"The one note of the editors, sounded most often among one another last week was: Be a man, have sand; let courage rule and truth bome, whatever be the cost or consequence. It you cannot find the the truth and tell it, lay down your pen and quit the newspaper business. If you have not the courage of your convictions, you'd better join some other profession. Dare to stand up and proclaim the eternal verities if it costs you a hundred subscribers a whack. Who fawns should go with his folly and leave the editor's chair forthwith. Take your orders from no man; dare to think some on your own account, have an idea to your credit and tell the world of it as a part of your duty, obligation and responsibility. Don't shirk; don't Co. squeal; don't swallow greased bait. Have regard for the feelings of others; stab no man in the back; sting no man for the sake of the writhing, for the man who pours bitterness and dregs into the cup of human experience is not worthy to wield an editor's pen. Charity as well as courage, fraternity as well as fearlessness are among the noble virtues. Such the strain, such the burden of public utterance and private counsel among the editors at Morehead last week. There is certainly no fault to be found with their ideal. We do not believe there is a coward in the lot. They do not look it; they meet you with open face and frank speech. They are afraid to be cowards, afraid they will lose their standing in the fraternity and their prestige in the profession."

Wood's Descriptive Fall Catalog, ready about August 1st, tells all about Farm and Vegetable Seeds for Fall plant-ing. Mailed free on request.

Rich fabrics, fine laces, exquisite needle-work, and, above all, the skill of the artist in cutting and finishing are required for the new modes, which are developments of the Directoire models, says The Delineator for September. Self trimmings are very much in evidence in all fashionable wardrobes. Tucks, plants, shirrings and puffs are introduced on waists, skirts and sleeves in seeming confusion, and very effective, too, are these ornamental features in the soft, pliable materials that are so much used. Skirts are extremely varied as to style, width and length. Their width grows, especially around the bottom. Little wraps made of every material that is modish are worn. The newest wrap is a novel affair showing a semi-fitted cape forming sleeves not unlike the kimono. The blause continues to hold its own, in spite of changing styles and continual prophecies that its day is waning. The dressiest of these garments are termed "luncheon" or "matinée" blouses, and are particularly suited to semi-formal occasions. The softest silks are fashionable for these dressy blouses, such as taffeta, having a silvery sheen and soft weave, or crèpe-finished silks in pale colors, the dark shades being used for blouses to accompany the street costume of voile, cloth or mixed stuffs.
