

Printed Paragraphs.

...holding her tongue a woman can keep a man guessing.

All girls sing like birds—but did you ever hear a crow sing?

It's a waste of time to get angry if you have anything else to do.

It's unreasonable to expect a dark man to be light on his feet. As a lawbreaker the lawyer has the rest of us beaten at the start.

Beware of Ointments For Catarrh That Contain Mercury.

Mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescription from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally and made in Toledo, Ohio, by F. J. Cheney & Co., Testimonials free. Sold by Druggists; price, 75c. per bottle. Take Hall's Family Pills for constipation.

Easy.

"You can always spot the villain in a show."

"Sure, with the spotlight!"

TEN YEARS OF PAIN.

Unable to Do Even Housework Because of Kidney Troubles.

Mrs. Margaret Emmerich, of Clinton St., Napoleon, O., says: "For fifteen years I was a great sufferer from kidney troubles. My back pained me terribly. Every turn or move caused sharp shooting pains. My eyesight was poor, dark spots appeared before me, and I had dizzy spells. For ten years I could not do housework, and for two years did not get out of the house. The kidney secretions were irregular, and doctors were not helping me. Doan's Kidney Pills brought me quick relief, and finally cured me. They saved my life."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

What Says the Mississippi!

"You're once more in the swim; You'll run again, you'll run again!" He thinks it says to him.

"You're foolin' Taft an' al' lo' them, Just havin' of your fun; You'll get some points from me, I guess; Just watch me how I run!"

"But where's the Ananias Club? Disbanded, or asleep Your only hope to collar it And drown it fathoms deep!"

The Trust At Breakfast.

"What is my government fine this morning?" asked the trust magnate, as he toyed with the breakfast bill of fare.

"Twenty millions," replied his secretary.

"Send them word at once that I can't see my way to meet it. My eyesight is failing. Only this morning while taking a spin in my automobile, I ran over a cow and two ordinary human beings and had to stop to apologize!"

Oh, The Children!

Surely, when through tangled brake Notice Teddy tears, He will spare, for pity's sake, Little infant bears! So, 42-'07.

EASY FOOD

Ready For Instant Use Without Cooking.

Almost everyone likes a cereal food of some kind at breakfast and supper, but the ordinary way of cooking cereals results in a pasty mass that is hard to digest, and if not properly digested, the raw mass goes down into the intestinal tract where gas is generated and trouble follows.

Everyone knows that good food properly digested keeps the body well, while poor food, or even food of good quality that is poorly prepared and not digested, is sure to bring on some kind of disease.

The easiest food to digest in this line is Grape-Nuts, made from wheat and barley, and cooked thoroughly at the factory, some 12 to 16 hours being consumed in the different processes of preparation. The food, therefore, is ready for instant service and the starch has been changed to a form of sugar, so that it is pre-digested and ready for almost immediate absorption.

A Chicago young lady writes that she suffered for years from indigestion and dyspepsia from the use of food that was not suitable to her powers of digestion. She says:

"I began using Grape-Nuts, and I confess to having had a prejudice at first, and was repeatedly urged before I finally decided to try the food, but I have not known what indigestion is since using it, and have never been stronger or in better health. I have increased in weight from 103 to 124 pounds."

People can be well, practically without cost, if they will adopt scientific food and leave off the indigestible sort. "There's a Reason."

Grape-Nuts Food is crisp and delicious to the taste. It should be served exactly as it comes from the package, without cooking, except in cases where it is made up into puddings and other desserts.—Book of delicious recipes, and "The Road to Wellville," in pkgs.

Southern Agricultural Topics.

Modern Methods That Are Helpful to Farmer, Fruit Grower and Stockman.

Hog Raising in the South.

The following article is from Coleman's Rural World:

Two years ago I took an extensive trip through the South, going as far as the land would let me go. It is not necessary for me to say that I saw a great many things which interested me, for this was my first trip in that direction. In almost every branch of agriculture I found something that appealed to my interest. But, being a swine specialist, my observations were more centered on things pertaining to that industry. All localities which I visited were not highly adapted to hog raising, but most places seemed to be ideal.

My location for a hog farm is not in the heart of the corn belt. I prefer a country where land is cheaper and more adapted to forage crops. Forage crops are more cheaply raised than corn and generally bring a larger net income. Good corn land is not always the best for such crops as cowpeas, soja beans, sand vetch, winter rye and other such crops which I might mention. Although I found but little of the best corn land I hardly found a place in the South where the above named crops would not flourish.

As a person is always more impressed by the failings of strangers than of his old acquaintances, I was surprised to see how few of the farmers were availing themselves of their superb natural conditions, but were allowing their hogs to make themselves upon free range, with only enough grain at the last to make them go on the market. They would give as their reasons for doing this that the grain or growth made upon free range cost nothing, while raising so much corn is hard on the land. I found that oftentimes these free range hogs would not weigh 200 pounds at a year old, while two years was often required to obtain such weight. In the corn belt hogs are made to weigh as much at seven months when pushed, and it is very easy to make whole droves of them to weigh it at eight months. As to the injury to the land, hogs require a balanced ration for most profitable results, the raising of such rations also giving a balanced ration to the soil by way of proper crop rotation, to say nothing of the fertilizer saved by keeping the hogs on land intended for cultivation. The proper raising of hogs would increase the farmer's income and would insure him larger crops by virtue of increased fertility.

I am glad to say that I found a great many farmers who were taking advantage of their favorable conditions and are experiencing results by which I have derived my favorable conclusions regarding the adaptability of the country for swine raising. I was much impressed with the excellent quality and flavor of the pork produced on these well-managed plantations. Yet notwithstanding this fact I am informed by a reliable authority that a large proportion of the meats consumed in the South are shipped in from Northern markets. I have wondered if our farmers here in the corn belt would be able to compete with their Southern neighbors in hog raising if those farmers would take advantage of all their opportunities and favorable conditions.

The Pecan Trees. Mr. J. B. Wright, of Cairo, Ga., says: "The care of the pecan is all-important. On it will depend success or failure. It is not an exaggeration to say that our acre properly cared for is worth ten acres that are neglected. There may be profit in growing pecans with indifferent attention, but the greatest success can only be achieved by the most careful attention to all details. And when I emphasize the importance of this, I do not mean that pecans are more difficult to grow than any ordinary fruits and nuts; on the contrary, the opposite is true. The pecan will stand more neglect than the apple, the peach, or the plum, but it is neither wise nor profitable to neglect it. There is a pecan tree near here that is forty-eight feet and eight inches high. It has proper care and has yielded 350 pounds of nuts. There is another tree that is also sixteen years old, and is only four feet and six inches high. It has never had any care since planted, and has never borne a nut."

A Farm With a Name. While you're resting and praying, think up a name for the old home. Call it Wildwood or Woodside, or Hill Crest or Sunny Slope or Rose-lawn. The Maples (if you do make it true to name), Orangedale, Olivet, Wayside or any one of a thousand names which may be used. They have more than a sentimental value.

Ads Quantity and Quality. A handful of cottonseed to every peck of peas will aid in both quality and quantity of lay.—Charles Cotton Moore.

How to Succeed. The man who goes into any project as into a tub of cold water, one toe at a time, with many grimaces and withdrawals, will never make it go. But the man who, first having weighed a project well and studied it from all sides, plunges boldly into it, as a strong swimmer into the flood tide, and makes straight for his goal without hesitation or looking back, is the man who, ten chances to one, will succeed.

Certainly Not. "It is reported that Tupley has lost his fortune." "Then he has no business with an affinity."

Comparison. The man who steps aside from work and makes of life a dream is like an old department clerk—A dead leaf on the stream.

that, as there was practically no difference in the score, the quality of the butter was not injured by feeding as much as five pounds of cottonseed meal or six pounds of cottonseed. The test also showed that this cottonseed butter melted at 100.1 degrees Fahrenheit, while that from cows fed no cottonseed melted at 96.8 degrees Fahrenheit, thus showing the former to be a better shipping butter."

Turnips.

We will bear the censure of repeating some things quite often. This is the way we have to reach the most people, for some will read it one time that will not see it at another, and also to impress them upon your attention. We repeat, plant turnips. Our people do not appreciate this crop as they should. Half the diseases we are called upon to prescribe a remedy for among horses and cows are traceable directly to a lack of variety in their food. People think turnips are poor food because eighty-five per cent. of them is water. However, the other fifteen per cent. has a most wholesome effect upon the system. They are nutritious, also. This summer, having quite a lot of them, we began throwing a bushel or more daily into our cow pasture. Although there was plenty of grass in the pasture, our two cows ate every one, and they improved in milk every day the turnips were given. They would low for their turnips if we didn't give them at the usual time. Horses will eat them, and they will help any horse, especially one that is troubled with blood or skin disease. It has been said no hogs will have cholera if fed regularly on turnips, or rather having turnips as part of their food. As a food for man, we leave this to your own liking, but we say that sliced thin, boiled and covered with cream sauce, they are delicious and healthy.—Southern Cultivator.

The Care of Implements.

We have frequently urged that better care should be given to farm implements. Expense as lumber is at the present time, it is not true economy to leave the tools out, exposed to sun and rain. Farm and Ranch tells of a hay press which has stood the wear and tear of ten years' use. There are wagons in daily use which are much older than others that have been abandoned as past use. The Farm and Ranch tells as follows of a hay press that has stood the wear and tear of ten years' use:

We saw a hay press running out a bale every forty-two seconds that had seen heavy service on the big Marshall hay ranch, of Dallas County, for ten years. But when telling of this record of service, Mr. Marshall was careful to state that this press had never been exposed to a single rain. This press is hooded under an iron cover which the owner devised for the purpose. Wherever the press goes, this protection from rain and sun goes, too, for all is built together. How many pieces of valuable farm machinery receive the protection they deserve?—Florida Agriculturist.

The Pecan Trees.

Mr. J. B. Wright, of Cairo, Ga., says: "The care of the pecan is all-important. On it will depend success or failure. It is not an exaggeration to say that our acre properly cared for is worth ten acres that are neglected. There may be profit in growing pecans with indifferent attention, but the greatest success can only be achieved by the most careful attention to all details. And when I emphasize the importance of this, I do not mean that pecans are more difficult to grow than any ordinary fruits and nuts; on the contrary, the opposite is true. The pecan will stand more neglect than the apple, the peach, or the plum, but it is neither wise nor profitable to neglect it. There is a pecan tree near here that is forty-eight feet and eight inches high. It has proper care and has yielded 350 pounds of nuts. There is another tree that is also sixteen years old, and is only four feet and six inches high. It has never had any care since planted, and has never borne a nut."

WHAT IS PE-RU-NA?

Is it a Catarrh Remedy, or a Tonic, or is it Both?

Some people call Peruna a great tonic. Others refer to Peruna as a great catarrh remedy.

Which of these people are right? Is it more proper to call Peruna a catarrh remedy than to call it a tonic?

Our reply is, that Peruna is both a tonic and a catarrh remedy. Indeed, there can be no effectual catarrh remedy that is not also a tonic.

In order to thoroughly relieve any case of catarrh, a remedy must not only have a specific action on the mucous membranes affected by the catarrh, but it must have a general tonic action on the nervous system.

Catarrh, even in persons who are otherwise strong, is a weakened condition of some mucous membrane. There must be something to strengthen the circulation, to give tone to the arteries, and to raise the vital force.

Perhaps no vegetable remedy in the world has attracted so much attention from medical writers as HYDRASTIS CANADENSIS. The wonderful efficacy of this herb has been recognized many years, and is growing in its hold upon the medical profession. When joined with CUBEBS and COPAIBA a trio of medical agents is formed in Peruna which constitutes a specific remedy for catarrh that in the present state of medical progress cannot be improved upon.

This action, reinforced by such renowned tonics as COLLINSONIA CANADENSIS, CORYDALIS FORMOSA and CEDRON SEED, ought to make this compound an ideal remedy for catarrh in all its stages and locations in the body.

From a theoretical standpoint, therefore, Peruna is beyond criticism. The use of Peruna, confirms this opinion. Numberless testimonials from every quarter of the earth furnish ample evidence that this judgment is not over-enthusiastic. When practical experience confirms a well-grounded theory the result is a truth that cannot be shaken.

Peruna is sold by your local druggist. Buy a bottle today.

No better friend than the man himself.—German.

BABY WASTED TO SKELETON.

In Torments With Terrible Sores on Face and Body—Tore at Flesh—Cured by Cuticura.

"My little son, when about a year and a half old, began to have sores come out on his face. They began to come on his arms, then on other parts of his body, and then one came on his chest, worse than the others. Still he grew worse. At the end of about a year and a half of suffering he grew so bad I had to tie his hands in cloths at night to keep him from scratching the sores and tearing the flesh. He got to be a mere skeleton and was hardly able to walk. I sent to the drug store and got a cake of Cuticura Soap and a box of Cuticura Ointment, and at the end of about two months the sores were all well. He has never had any more of any kind since, and I can sincerely say that only for the Cuticura Remedies my precious child would have died from those terrible sores. I used only one cake of Soap and about three boxes of Ointment. Mrs. Egbert Sheldon, R. F. D., No. 1, Woodville, Conn., April 22, 1905."

God sends enough to all.—Latin.

CHICKENS EARN MONEY

If you give them help unless you understand them and know how to cater to their requirements, you cannot spend years and dollars learning by experience, so you may buy the knowledge required by others. We offer this to you for only 25 cents. You want them to pay their own way even if you merely keep them as a diversion. In order to handle Fowls judiciously, you must know something about them. To meet this want we are selling a book giving the experience of a practical poultry raiser for (Only 25c) twenty-five years. It was written by a man who put all his mind, and time, and money to making a success of Chick raising—not as a pastime, but as a business—and if you will profit by his twenty-five years' work, you can save many Chicks annually, and make your Poultry Yard as soon as it appears, and money to making a success of Chick raising. It tells how to detect and cure disease; to feed for eggs and also for fattening; which Fowls to save for breeding purposes; and everything, indeed, you should know on this subject to make it profitable. Sent postpaid for twenty-five cents in stamps. BOOK PUB'G HOUSE, 124 Leonard St., New York City.

Feeding Horses With Cottonseed Meal and Hulls.

Columbia, S. C., Special.—Experiments in every part of the South show that Cotton Seed Meal and Hulls, when properly fed to horses and mules makes the finest and cheapest feed in the world. Maj. Henry C. Hammond of Augusta, Ga., is writing about feeding some of his after telling about the time when his two colts were born, he says:

"At that time oats were about \$36.00 per ton, and corn about \$26.00. I began feeding my mares on these expensive grains, ground with a little cottonseed meal dusted in. They took to it all right, and before the colts were six weeks old they were nibbling at their mother's feed. Since more colts have come. The oldest are now five years old, and none of them have ever passed a day in their lives without eating some cottonseed meal. They have never been out of fix. The older ones weigh 1,100 pounds and are 16 hands high—decidedly larger than dams or sires. They have carried me 50 miles a day without breathing deep. Here is a clean-cut, decisive example of cottonseed meal as a component part of a horse's ration. I will simply add to the above testimony that for the past five years my stable has consisted of ten pleasure and work animals—one, a mule, could pull a lion out of his den and every one of them have been fed daily with a pound or more of cottonseed meal. I have never had a sick one in that time, or one that was not ready for work. I have had the good fortune to win some "blue ribbons."

Worried. Farmer's Wife—What is the matter with my husband, anyway? Doctor—I shall diagnose his case directly. Farmer's Wife (as the doctor labors with extraordinary care)—Do not make it too expensive doctor.—Fliegende Blatter.

An Opinion. "The girls are still wearing open-work." "Does it really harden them in winter?" "I presume it does those who survive."

BACKACHE AND DESPONDENCY

Are both symptoms of organic derangement, and nature's warning to women of a trouble which will sooner or later declare itself.

How often do we hear women say, "It seems as though my back would break." Yet they continue to drag along and suffer with aches in the small of the back, pain low down in the side, dragging sensations, nervousness and no ambition.

They do not realize that the back is the main-spring of woman's organism and quickly indicates by aching a diseased condition of the feminine organs or kidneys, and that aches and pains will continue until the cause is removed.

Lydia E. Pinkham's Vegetable Compound

made from native roots and herbs has been for many years the most successful remedy in such cases. No other medicine has such a record of cures of feminine ills.

Miss Lena Nagel, of 117 Morgan St., Buffalo, N. Y., writes:—"I was completely worn out and on the verge of nervous prostration. My back ached all the time. I had dreadful periods of pain, was subject to fits of crying and extreme nervousness, and was always weak and tired. Lydia E. Pinkham's Vegetable Compound completely cured me."

Lydia E. Pinkham's Vegetable Compound cures Female Complaints, such as Backache, Failing and Displacements, and all Organic Diseases. Dissolves and expels Tumors at an early stage. It strengthens and tones the Stomach. Cures Headache and indigestion and invigorates the whole feminine system.

Mrs. Pinkham's Standing Invitation to Women Women suffering from any form of female weakness are invited to write Mrs. Pinkham, Lynn, Mass. Her advice is free.

MISS LENA NAGEL
