Maxwell

\$595

F. O. B. DETROIT

The world's record—twenty-two thousand and twenty-two miles without stopping the motor—is held by a Maxwell stock touring car.

No other car at any price has ever approached this wonderful record of endurance.

In addition to this proven sturdiness, remember that the Maxwell averages between 25 and 30 miles per gallon of gasoline.

Moreover, the Maxwell is complete. It has electric starter and lights; demountable rims; one-man mohair top; speedometer; roomy, comfortable seats and an attractive appearance.

Are you particular about details? Do you demand evidence of value? If so, you will investigate the Maxwell, the features, record and reputation of which proclaim it the world's greatest motor car value.

When you buy a

CHEVROLET

\$525

(DELIVERED)

You are Really Buying the Lowest Priced Electrically Equipped Car on the Market

For if the new Chevrolet were bought by you without modern equipment, at factory price and then equipped afterward it would cost you at retail prices:

FOR-

the starter and electric lights	\$125
the speedometer	15
the freight	35
Total	\$175

Then if you could purchase it with inferior material you would save:

ON-

the top	\$15
the fenders	10
the body	50
the windshield	8
the horn	2
springs cantilever	10
Total	\$95

These two totals amount to \$270 which means when deducted from \$525 [the Chevrolet delivered price] means that such an equipped car would cost you \$255.

But you don't buy a Chevrolet that way—we don't sell them that way.

When you buy a Chevrolet you get a modern, completely equipped car of graceful design, attractive appearance, easy riding qualities and a superb, proven mechanism. You get a regular automobile, a complete car—for a low price—the lowest price for an electrically equipped car in America.
