

STATE NEEDS TO HAVE A CAPITAL

EVERETT SUGGESTS CAPITALIZING GOVERNMENT TO AVOID BORROWING.

BOND ISSUE WOULD PROVIDE

Says There Isn't a Corporation in the State That Has No Capital Stock.

Raleigh.—"The State is the only corporation I know of operating without capital, and I can't see why it wouldn't be a good idea for us to borrow about five million dollars and provide a sinking fund to retire the debt," declared Secretary of State W. N. Everett, who has been thinking a good deal about financing the commonwealth here of late.

"We have depended on current revenues for current expenses ever since the colony was established two hundred years ago—borrowing in anticipation of revenues, and never being in very good shape financially. I believe we ought to have an operating capital of at least five million dollars to eliminate the necessity of borrowing so much money."

There isn't a corporation in the State that has no capital stock, Mr. Everett points out. Nobody going into business will depend entirely on his income to finance his business, and it ought to be the same with public business. The State ought to have some capital to go on, and a bond issue that could be liquidated in a few years would provide a revolving capital.

In the days before the income tax for State revenues, the income period was distributed pretty well over the entire year and it was not usual that any great sum of money had to be borrowed. But since the State no longer levies a property tax, the income period is scarcely six weeks in length and the rest of the year the State must borrow in anticipation of revenues.

Bonds might be sold for a small rate of interest, which would offset the larger interest rate that is required for small borrowings, over a period of ten months. He has not yet arrived at the point of advocacy of the matter as a legislative policy, but he does think that it might work to the advantage of the State to have some capital to do business on.

Rush Printing of Advance Sheets.

R. C. Strong, reporter of the Supreme Court, announces that he has made arrangements with the printers who are getting out advanced sheets of the court reports to give the printing of these advance sheets preference over the other work in their establishment and will have the pamphlets ready for distribution in six days or less from the time they receive the proofs except for delays not attributable to them. This will enable the Reporter to have these pamphlets in the hands of the profession very soon after they are handed down by the court, in weekly issues.

Governor Issues Appeal for Japan.

Generous contribution for the relief of the desolated peoples of Japan should be North Carolina's expression of appreciation for the unusual material blessings that have come to the people of the State declares Governor Morrison in a proclamation issued calling upon the people to respond to the call of the Red Cross for aid to the earthquake sufferers.

First to come to the aid of the sufferers in a similar disaster in San Francisco 17 years ago was the Japanese Red Cross Society, through which the American organizations will work in the distribution of the five millions asked for the relief work. Little difficulty is anticipated in raising the county, State and national quotas, with five million as the aggregate total. The Red Cross appeal is as follows:

"Stupendous disaster to Japan necessitates appeal to all the people of this country. President's proclamation places responsibility of representing America in this crisis upon Red Cross chapters. Nation asked for at least five millions and North Carolina twenty-five thousand of that amount. Enlist war-time workers and co-operation of all organizations in making immediate urgent systematic appeal to your community. Wire estimate of representative committee what amount your city will give and beginning Thursday wire daily total contributions to date."

Hagwood Given Parole.

Executive clemency was extended by Governor Morrison to Reuben S. Hagwood, convicted in the Wake county for larceny and housebreaking at the December, 1920, term of court and sentenced to three years on the county roads. He has served 31 months of his sentence and the commutation was recommended by Judge John H. Kerr, by the late H. E. Norris, solicitor, and by Mrs. Kate Burr Johnston, State Commissioner of Public Welfare.

Unveiled Aycock Memorial Nov. 1. North Carolina school children's memorial to Charles Brantley Aycock, the Governor who laid the foundation for the great State system of public schools, will be unveiled with impressive ceremonies on Capitol Square, November 1, the day being the 64th birthday of the "Educational Governor," who died 11 years ago.

Two close friends of the late governor will be the chief speakers for the dedication, Dr. Edwin A. Alderman, president of the University of Virginia, who will present the monument, and Josephus Daniels, who will deliver the memorial address. Governor Cameron Morrison will accept the memorial on behalf of the people of the State.

The monument, executed by Gutzon Borglum, the foremost of American sculptors, will be erected to the left of the Fayetteville street entrance to the Capitol grounds, the entrance being remodeled to preserve the balance with the monument to the State's other great educational leader, Dr. Chas. D. McIver, which stands across the way.

The central piece of the memorial will be portrait of Governor Aycock done in bronze, and standing seven and one-half feet high. On either side will be tablets memorializing his contribution to the progress of the State. The entire structure will be mounted on a marble pedestal. Work of setting up the monument is expected to begin at an early date.

The complete monument will cost approximately \$18,000. The commission for the work was given to Mr. Forglum about two years ago, and the design accepted about a year ago. The model was sent to Europe for casting and has but recently been returned. Members of the memorial committee are: George C. Royal, Nathan O'Berry, B. R. Lacy, Dr. J. Y. Joyner, Dr. Albert Anderson and Judge Francis D. Winston.

Condemn Old Trinity Building.

Old Trinity College, in which a State high school has been maintained for some years at Old Trinity, Randolph county, has been condemned by Special Agent Brockwell, of the State Insurance Department, after brief inspection of the building by him. According to his posted notice, the lower floor of the building can be used but none of the upper floors, which include the two big auditoriums, until the defects are remedied.

It is stated that the west wall of the building is out of plumb and possibly dangerous, but the main defect noted was that there are not sufficient means of egress from the upper floors, though there are three broad stairways leading downward from the main auditorium which is on the second floor.

The action of the insurance department's agent has caused consternation in the community in view of the fact that the school, with 13 teachers, is scheduled to open for the fall term September 17, and the lower floor of the building is sufficient for not more than half of the school. It is probable that some adjacent house will be used for the other grades.

The main problem developed is that when the building ceases to be used for school purposes, it is said, the entire property, including about 15 acres of land, will revert to the heirs of James Leach, who originally granted the land to Trinity College in trust for the maintenance of a school, the property having been sold by Trinity College five years ago to the Randolph county board of education.

There is much criticism of the condemnation proceedings just before the opening of the school, but it is claimed that the whole matter can be remedied by prompt and proper action of the school authorities in remedying the defects.

Many Chickens at State Fair.

A. G. Oliver, State poultry extension agent, has gone and done it. He has gathered together some \$2,700 in prizes for the poultry division of the North Carolina State Fair to say nothing of five hundred dollars that are offered members of the boys' and girls' poultry clubs.

That would be a sizable achievement in itself; but Oliver has done more. He has gotten more than a thousand dollars for the special classification that is open to all comers, and some of the biggest and best poultry breeders in the country have entered exhibits for the fair. Of course, they have an eye out for some blue ribbons and honors, but the money is also a real attraction.

General Manager E. V. Walborn, who has been going to State fairs over the country for quite a while, says that the poultry show this year will be just about the best of any of the State fairs. And he denies that he is trying to "string" anybody for what are known to the trade as "string" fowl exhibitors are barred from the State Fair. By "string" poultry shows is understood those exhibits that the fairs pay to get.

Plan Development of Pigeon River.

Washington, (Special).—Plans for the ultimate development of a project on the Big Pigeon river in North Carolina to produce about 150,000 horsepower have been filed with the Federal Power Commission by the Pigeon River Company in connection with its application for a Federal license. The project will be located near the North Carolina-Tennessee State line. A diversion dam and tunnel will comprise the initial development to produce 50,000 horse power.

MEET NEXT YEAR IN QUEEN CITY

TAR HEEL CONFEDERATES CONCLUDE SESSIONS IN WINSTON-SALEM.

SMITH AGAIN COMMANDER

Last Surviving Member of Staff of General Lee Discusses Great Southern Chieftain.

Winston-Salem.—After deciding to hold the 17th annual reunion in Charlotte and electing officers, the North Carolina Confederate veterans closed their final business session. The registration showed over 1,100 Tar Heel soldiers in attendance, besides a number of visitors from Virginia. It was generally conceded to have been the very best and one of the most interesting conventions yet held.

General William A. Smith, of Ansonville, was re-elected commander-in-chief by unanimous vote. Brigade commander chosen includes: first brigade, A. H. Boyden, Salisbury; second, P. J. Alston, Louisburg; third, George H. Hall, Red Springs; fourth, James W. Goodwin, Asheville.

The concluding prayer, which was a beautiful invocation, was offered by Major Giles Buckner Cooke, the last survivor of Gen. Robert E. Lee's staff, who is also an Episcopal minister.

In presenting the invitation of Charlotte for the reunion to be held there next year, Clarence Kuester assured the veterans that Charlotte be warmly received in the city that holds the title of being the birthplace of American independence. He assures the veterans that Charlotte loves them and is anxious to have them in the city again. He stated that it has been 14 years since a reunion had been held in that city.

After Mr. Kuester had finished speaking a veteran arose back in the hall and said: "Yes, we want to go to Charlotte, because it was there in May, 1877, that I married the sweetest woman in the world. She left me two months ago." And then he broke down and wept.

Mrs. J. A. Yarbrough in her words of invitation to come to Charlotte said that the second largest city in the state would welcome the survivors of the Confederacy with open arms and would do everything possible to make their stay pleasant.

Two Killed When Auto Turns Over.

Charlotte.—John Graham, veteran printer of the city, and make-up man in the composing rooms of the Charlotte Observer, aged 59 years, and John Clemmer, 24 years old, of Bessemer City, were killed and Crawford Phifer, J. T. McGhee, Naval recruiting officer of this city, and C. B. Carpenter, of Bessemer City, were seriously injured as a result of an automobile accident near the Hoskins Drug Store. Graham and Clemmer were killed instantly. The other men are in the hospital.

It is said the cars were racing when the one in which were Graham and Clemmer, struck a ditch and the too sudden appliance of brakes caused it to turn turtle. Graham had been connected with the Charlotte Observer and Charlotte News for 25 years or more.

Four Counties To Build Bridge.

Lexington.—Four counties would be united by a bridge which residents of Davidson, Montgomery, Stanly and Rowan counties within a radius of fifteen or twenty miles are seeking to have placed across the Yadkin River at Stokes Ferry at a point where the four counties join, twenty-five miles south of here.

A delegation from that section was heard with favor by the Davidson county road board, after the board's decision of Stanly and Montgomery had commended the proposal. Rowan will also be asked to take a favorable stand.

Sam L. Smith, postmaster and station agent at Tuckertown, was spokesman for the group here pointed out that the territory near the ferry has to go thirty-five to forty miles to reach the nearest river bridge.

If the bridge should be built it would be unique in that it would practically cross the spot in the middle of the river where the counties of Davidson, Rowan, Stanly and Montgomery corner. It is only about 600 feet across the river at this point, it being but a short distance above the Narrows of the Yadkin.

Short Circuit Kills Horses and Mules.

Laurinburg.—Two horses and two mules were killed here at a cotton gin as the result, it is said, of a short circuit.

A storm came up and the current was cut off. After the storm passed over the switch was thrown back in and instantly the whole earth seemed to become charged. The animals were killed instantly. It was thought for a short time that a driver standing on the ground was also dead but prompt arrival of physicians soon restored him to life.

DRUGGISTS CLOSE MEETING

After Recommending the Appointment of a Federal Narcotic Commissioner.

Asheville.—After recommending the appointment of a Federal narcotic commissioner, voting to affiliate with the International Pharmaceutical Federation, awarding the Ebert prize to Paul S. Pittenger, New York, and installation of H. V. Arny, New York, as president, members of the American Pharmaceutical Association ended their 71st annual session here.

The Ebert prize, an award of \$500 in memory of the late Albert E. Ebert, of Chicago, was awarded to Mr. Pittenger for the outstanding pharmaceutical research work of the past year and is one of the most coveted honors in pharmacy. The award was made for a paper on "biological standardization of local anaesthetics."

The final general session formally ended the convention, which is pronounced as one of the best in the history of pharmacy and marking a new era by reason of the adoption of the plan for reorganization, which was put in effect during the session.

W. L. Dubise, New York, who is an active member of the association for the past 43 years was elected honorary president.

L. L. Walton, Pennsylvania, was elected and installed as chairman of the house of delegates, at the final session, W. Bruce Phillips, California, was elected vice-chairman; W. B. Day, Chicago, secretary and E. F. Kelly, Baltimore, treasurer.

Officers nominated for the year of 1924-25, taking office at the 72nd annual meeting to be held in Buffalo and to be elected by mail ballot during the ensuing year, follow: For president, John Cully, Utah; Charles W. Holton, New Jersey; George Judsch, Iowa. Directors nominated for election in the same manner were: H. V. Arny, New York; J. G. Beard, North Carolina; Jacob Diner, New York; A. G. Dumez, District of Columbia; J. G. Godding, Massachusetts; Julian A. Koch, Pennsylvania; H. B. Mason, Michigan; E. L. Newcomb, Minnesota, and H. M. Whippley, Missouri.

Veneering Plant Destroyed by Fire.

Henderson.—A fire of unknown origin but believed to be from spontaneous combustion destroyed the entire plant of the Henderson Veneering and Manufacturing company, just west of the city. The fire was discovered shortly after its blaze had started, but the building having much veneering stored in the main plant the fire spread so rapidly that the building was soon all in flames and it was impossible for the fighters to make further headway than to save adjoining buildings. The Henderson Veneering and Manufacturing company was only located in the city a few months ago and had just gotten a good headway into the manufacture of coat hangers and trunk panels.

Kills Two Deer With One Shot From Gun.

Scotland Neck.—D. Albion Madry, who is with a party of hunters at Ray's Camp, near Williamston, had unusual luck. Going out early after squirrels he had the luck to have two deer jump up in front of him. He fired both barrels and brought down the two.

When R. J. Madry arrived at his office his phone was ringing madly, the call being from Albion Madry telling him the wonderful news and advising that he was shipping one of the deer to him.

Killed in Auto Wreck.

Marshallville.—Nelson Thomas, of Rockingham, was almost instantly killed and Misses Gladys and Maxine Carpenter, of Peachland, were seriously injured when the Ford roadster in which they were riding turned turtle on the Charlotte-Wilmington highway, a mile and a half west of Marshallville.

The party left Peachland about 5 o'clock, and were returning when the accident happened, as the driver attempted to steer around a car being driven by Bryce Griffin, who was coming out of a side road from J. S. James' residence. Eye-witnesses state that Thomas attempted to steer his car back into the highway too suddenly, which caused it to turn over, wedging his body and those of the young ladies beneath the wreckage.

Name Field Instructor.

Oxford.—Miss L. Tuttle, of Knapp, Wisconsin, has arrived at the Oxford Masonic orphanage to take up the work of field instructor at the orphanage. This is a new department just added to the corps of instructors, whose duty will be to look into the welfare of the children here and elsewhere, a kind of service department. She will visit homes, places of business and schools where the children are sent.

Kinston Minister Heads World Body.

Kinston.—Information was had here today of the unanimous election of Dr. Abram Cory, of Kinston, to the presidency of the International Convention of the Disciples of Christ. Dr. Cory heads one of the largest separate groups of religionists in America. The church has nearly 1,500,000 members. The election was by the World Convention at Colorado Springs, Dr. Cory is a former army chaplain. He served in the First infantry. He is the author of several popular novels.

DAIRY FACTS

Dairy Cows Respond to Good Feed and Treatment

A dairy cow will respond to good feeding and good treatment, perhaps better than any other farm animal. Each individual dairy cow should be a unit by herself. Unlike other farm animals, dairy cows cannot be efficiently fed in a feed lot, as the requirements for each cow may be different.

The best feed for dairy cows is an abundance of pasture grass when that is available. A good pasture provides a balanced ration. Some high-producing cows will require a little grain as a supplement to pasture.

During the time of the year when a good pasture is not available, a cow can be fed efficiently by providing:

1. An abundance of palatable feed.
2. A balanced ration.
3. Succulent feed.
4. A moderate temperature in barn.
5. Comfortable surroundings.

A dairy cow is fed for the following purposes:

1. For maintaining the body.
2. To supply material for milk.
3. For development of fetus.
4. For growth of animal, if immature.
5. At times to produce gain in weight.

Three general classes of food material are required for feeding cows:

1. Protein or nitrogenous material.
2. Carbohydrates and fat to supply heat and energy.
3. Ash or mineral matter.

A well-balanced dairy ration will contain the above food material in the proper proportions. In making up a feed for dairy cows, it is usually most convenient to balance the roughage and concentrates separately and then feed all the roughness each cow will eat and adjust the grain mixture to the amount of milk or butter-fat produced by the cow.

A good general rule to use as a guide in feeding is to feed from one-fourth to one-half as much of a balanced grain mixture per day as the cow gives milk per day. Cows giving rich milk usually give less per day but need a little more grain in proportion of the milk.—A. C. Baer, Professor of Dairying, Oklahoma A. and M. College.

Summer Suggestions on Care of Dairy Utensils

It is more or less difficult to give adequate care to the dairy utensils during the summer months. This is due to the fact that hot scalding water or steam is more troublesome to obtain. Proper care of these utensils is important during the summer months due to the temperature which favors the multiplication of bacteria. In the production of high-grade milk it is necessary that all utensils be thoroughly cleaned, for if any organic matter is left in any of them, it is almost impossible to produce the desired quality of milk.

If the utensils are cleaned with water just as it comes from the well or tap, some bacteria will remain which will multiply very rapidly during the warm weather of the summer months. The utensils should be sterilized, and this is done by exposing them to live steam for several minutes. In the cleaning of tinware they should be first washed with cold water and then with hot water and a washing powder that is alkaline in nature. Ordinary soaps are not satisfactory in the cleaning of the utensils of the dairy. After the tinware has been thoroughly cleaned it should be sterilized. Sterilization is the most important factor in the production of high-grade milk.—B. W. Fairbanks, Associate Professor Animal Husbandry, Colorado Agricultural College.

Series of Experiments to Decide Value of Corn

Recently a series of experiments was run to decide the value of grinding corn. In these tests it was found that cornmeal produced 7 per cent more milk and 14 per cent more fat than ear corn. Where corn and cobmeal were compared with cornmeal it was found that the cornmeal was slightly in the lead, having a 2 per cent better production in butterfat. Even though the corn is extra cheap, the cows will give a better account of themselves to the tester if they are fed corn that has been ground.

Regularity of Feeding Is of Much Importance

Regularity of feeding is of greater importance than time of feeding, in the care of dairy cows. The dairy cow should have regular meal hours. More roughage will be consumed if it is fed two or three times a day instead of only once.

Feeding of Minerals to Cows Is Not Profitable

Feeding of mineral mixtures to dairy cows did not show profit in pounds of milk produced at the Ohio station where it was carefully tried out.

To supply minerals to dairy cows it forms that can best be used is by feeding legume roughage, such as alfalfa hay, clover and soy bean hay, rich in minerals and nitrogen. This applies both in raising young animals and feeding for milk production.

ASK YOUR NEIGHBOR

Women Tell Each Other How They Have Been Helped by Lydia E. Pinkham's Vegetable Compound

Perrysburg, Ohio.—"I took Lydia E. Pinkham's Vegetable Compound because I suffered with pains in my sides all the time. I can't remember just how long I suffered, but it was for some time. One day I was talking with a lady I met on a car, and I told her how I was feeling and she said she had been just like I was with pains and nervous troubles, and she took the Vegetable Compound, and it cured her. So then I went and got some, and I certainly recommend it for it is good. Whenever I see any woman who is sick I try to get her to take Lydia E. Pinkham's Vegetable Compound."—Mrs. ADA FRICK, Route 3, Perrysburg, Ohio.

In nearly every neighborhood in every town and city in this country there are women who have been helped by Lydia E. Pinkham's Vegetable Compound in the treatment of ailments peculiar to their sex, and they take pleasure in passing the good word along to other women. Therefore, if you are troubled in this way, why not give Lydia E. Pinkham's Vegetable Compound a fair trial.

Find Secret of Old Dye. Thanks to the vegetable and chemical chromatics created in American and European laboratories, it is now possible to reproduce the wonderful blues and reds in Persian rugs that have been puzzling the world's scientists for centuries.

THE SAME OLD BACKACHE!

Does every day bring the same old backache? Do you drag along with your back a dull, unceasing ache? Evening find you "all played out"? Don't be discouraged! Realize it is merely a sign you haven't taken good care of your kidneys. Take things easier for a while and help your kidneys with Doan's Kidney Pills. Then the backache, dizziness, headaches, tired feelings, and bladder troubles will go. Doan's have helped thousands and should help you. Ask your neighbor!

A South Carolina Case

J. T. Roller, Prop. grocery stand, 108 Second St., Cheraw, S. C., says: "My kidney troubles were all right and I had to get up several times at night to pass the kidney secretions. My back was stiff and ached and pained when I straightened up. A friend advised me to try Doan's Kidney Pills and I bought a box. Doan's put me in A-1 condition."

The Cuticura Toilet Trio

Having cleared your skin keep it clear by making Cuticura your everyday toilet preparations. The Soap to cleanse and purify, the Ointment to soothe and heal, the Talcum to powder and perfume. No toilet table is complete without them.—Advertisement.

Edible Oil From Egyptian Plant.

A plant belonging to the lettuce family, now cultivated in Upper Egypt and which can be grown with profit in certain parts of the Sudan, is a new source of edible oil. The seed yields under pressure from 37.5 to 38 per cent of oil and certain specimens of fresh seed from the Sudan, which contained less than 4 per cent of water, yielded more than 44 per cent. The oil is odorless, of a light yellow color and without disagreeable taste. The seed is so small that it cannot be handled with ordinary equipment, but the oil product is so valuable that new machinery will no doubt be built to do the work.

The Change.

"Yes, Mabel has given up the idea of a career."
"You don't tell me! And she was so determined, had made all the arrangements to work her way through music in Munich and art in Paris! My goodness! So devoted to a career!"
"Yes, dear, yes, she was; but there was an awfully wealthy bereavement in the family of that young man who wanted to marry her, so she decided to console him!"

Wishing for sleep is a poor way to get it.

Try Postum instead of coffee. There's a Reason! Iced Postum is delicious.
