## Buick Open Cars are Stormtight

Perfect protection is provided from rain and wind. The lower frame of the windshield fits into a permanent rubber grommet. Moulded rubber seals every joint between the frames and posts. At the top a new weatherstrip, steel reinforced, excludes all air that might enter between the windshield and top, and side curtains button to the windshield, instead of the posts, covering the slight crack between them.

In addition to these and numerous other refinements, Buick four-wheel brakes afford a greater degree of safety on all models.
