

THE CAREFUL FARMER

is the farmer who has already started his preparations for this year's crop. Make a careful inventory of your farming implements and necessary tools and then come to us for replacements of any kind and you will be sure to get just what you need. Working with inadequate or unsatisfactory implements and tools handicap and retard the progress that should be made, especially during the first part of the crop year. Replace wornout and damaged articles with new ones and you will quit work each day less fatigued and in much better spirits for having accomplished so much more.
