For Summer Sports

Simplicity is the key-note of this practical two-piece frock for Summer sports wear. Of striking heather-toned jersey, the inverted platts on the shoulder, and the buckled belt relieves it of much of its severity of line, while the skirt, with the popular kick platts, allows the perfect freedom necessary to sports.

POINTED PINE PARAGRAPHS

O. H. L. Wernicke
President
Pine Institute of America, Inc.

Careful working of a young pine forest for turpentine will not arrest its growth. It will produce more gum in its twentieth year than in its first year of working, and then do it for another twenty years more. Then it will be first-class lumber stumpage!

Ordinary working of a pine forest for turpentine will produce the most gum the first year, and make second-class lumber stumpage out of it in five years!

Give one young man ten thousand dollars and he will be broke in five years. Give another the same amount and he will be rich in twenty years.

It is all in the way you handle your money or your pine trees.

Let Your Baby Howl, Says Child Specialist

London.—"If the baby wants to howl let it howl."

"If baby wants to take risks (of breaking his neck, perhaps) parents must allow it to do so, as a safety first policy is likely to kill the spirit of adventure and weaken the desire for achievement."

So says Doctor Evelyn Saywell, one of London's few woman doctors.

Incidentally Doctor Saywell is recognized as one of Britain's leading authorities on child welfare, and there were many striking points in her lecture recently on "The Psychology of Infancy" at a meeting organized by the National Society of Day Nurseries.
