Subject matter to be studied during the week includes work in foods, clothing, household furnishings, music appreciation, culture, recreation, farm crops, livestock, farm machinery, farm equipment, and poultry. The program will be similar to the one last year in that class room work will be conducted in the forenoon with other exercises in the afternoon and evening. At noon each day, there will be a general conference period of one hour.

The course is in charge of Miss Martha Creighton, district agent, and L. R. Harrill, state club leader. The cost will be only \$5 per person and representation will be on the basis of one girl and one boy from each organized club in a county. The young people will be well chaperoned and under the supervision of selected home and farm agents while in Raleigh. FIRE CONTROL WORK STARTS HERE JULY 1

Execution of agreement between commissioners of Warren and Washington counties and the Department of Conservation and Development for the beginning of forest fire control work on July 1 will bring the total of North Carolina counties voluntarily undertaking such a program to 44, it was learned here today from State Forester J. S. Holmes.

This number is the largest ever coming under the state organization, the state forester declared, representing an increase of more than one-third over the 32 counties cooperating with the conservation department a year ago.

Alexander county which was working under a short-term agreement with the department in the control of fire is reported to have renewed the work for the next year, and Jackson County has also renewed its agreement for the next fiscal year. Caldwell and Hoke counties will make larger appropriations available for an increased scope of the work.

OPENS DISEASE WAR BY FREE VACCINATIONS

Free vaccinations against typhoid fever, diphtheria and smallpox will be given every Friday afternoon after July 5 by Dr. Claudius McGowan, it was learned here yesterday.

Dr. McGowan will cooperate with State authorities in an effort to decrease the number of cases in the State among these special diseases during this summer and fall. These diseases are prevalent nearly every year. Now is the time to secure this maximum protection, according to health officials.

The old idea which never did gain credence among reputable health officers, that summer is not a good season to be vaccinated against smallpox, has been forgotten. Any day in the year is a good time to be vaccinated, they aver. Only two classes of people who should not be vaccinated are dead people and those who have experienced a recent successful vaccination.

Citizens in Washington county are urged by county health officials to cooperate with Dr. McGowan in his campaign against these diseases by bringing their children to him or carrying them to their family physician and having them protected against these diseases.

POET AND PEASANT

"I notice that someone has been at work on the road in front of the Union depot," said the Peasant.

"Yes," replied the Poet, "but they certainly haven't done much good. A few loads of dirt have been put out there and last Tuesday a drag was drawn across it."

"I understand that Chief of Police Brown was rather peeved at what you had to say last week in reference to the road," said the Peasant.

"There seemed to be a misunderstanding," said the Poet. "I gathered my information from what I thought an authentic source, but I later learned

that instead of promising to keep up the road, Chief Brown merely asked permission to place cinders on top of the dirt in order to keep it from being brought over on the street.

It is hard for the man in charge of the highway to bring his drag across the railroad and turn around, I think that is the reason it is allowed to get in such a bad condition. The only remedy, and the thing to do to this piece of road is to pave it or place tar and gravel on it. Of course it is rather a short piece but experienced road men could fix it in a very short time."
