Wants To Join Navy

The Navy Recruiting Office, Los Angeles, California, Dear Sir—I am a boy of 19, I am not popular with the fair sex, having only six steady girls. My income is only \$30 a week with no chance for advancement, as my father owns the factory. I have graduated from college, and my father wants me to go to Paris on my vacation in company with my best girl. He has already rented a studio for me in the Palais d'Artistes, where all the artist models hang out. So you see, sir, my life is very miserable.

So, I wish to state that I do most earnestly desire to join the navy, away from the evils of the land, far from the arms of women. Sir, I pray that you will not turn me down. Eustace Stonefeller, Asylum for the Insane, Ward Cucoo, Napa, California.

Side Dress... An early crop is SAFER—SURER

IN almost any year, an early crop of cotton is a good crop. It is a strong, fast growing crop, less subject to insect damage and diseases than a late, slow growing crop. This year, cotton must be set early if heavy boll weevil damage is to be avoided. With your cotton up to a stand, the biggest help you can give it is a side-dressing of Chilean Nitrate, 100 pounds to the acre right after chopping. 200 pounds would be better, of course. Nothing takes the place of Chilean Nitrate for side-dressing cotton. There is nothing like it for picking up a crop and pushing it ahead fast, setting the crop early and reducing the danger of boll weevil losses to a minimum. See your dealer now! He wants to supply you with exactly what you need. Specify Chilean "Natural" Nitrate. If he hasn't any on hand, he can get it for you immediately.
