A FAIR OUESTION

Stirred by the growing tendency of his fellow townsmen to use the newspaper for everything but advertising, a South Dakota editor recently asked them pertinently, in a page one box:

"If a member of your family died, would you send out the obituary in a circular letter? If your wife entertained, would you run a slide on the screen of the movie show? If you were to enlarge your store, would you tell folks in a hotel register? If you were to have a wedding at your house, would you tack the news on a telephone post?

"Then why in heck don't you put your advertising in the newspaper,
