Expect Little Change In 1.500-Acre Total Allotment in County

Recommendations Forwarded To Raleigh Office After Study Last Week

Tobacco acreage allotments and oundage quotas for next year have een recommended by the Washingon County committee for the soil onservation program and forwarded Raleigh, where they await approvof the state organization, it was earned this week from the office of County Agent W. V. Hays. The acion of the county committee came after committeemen from all the ownships met in the county office last week and made recommendaions for the allotments on all farms

The county committee, elected last Thursday night, is composed of W. T. Phelps, of Creswell, chairman; R. The Rev. Wade Johnson, of Hali-fax, has been named pastor of the man; and Charlie W. Bowen, of

Recommendations by the township year allotments and poundage quotas. above 10 per cent were made, the reasons were required to be certified by the committeemen. Under AAA regulations, committeemen were not allowed to make recommendations above this percentage.

It is not believed that there will be much change in the total allotment of 1,500 acres for the county last year and the 780 pounds per acre. which was the average allowed last year, as the county received no increase in acres or in pounds. However, it is possible, the county agent said, that there may be some small allotments made to a few farmers who have tobacco land, barns, equipment, and the like.

It has been the custom for the past two years or more for Mr. Hays to meet with the committeemen, but this year this will not be done, and must be made directly to the committeemen.

Commenting on the tobacco sitnation and outlook in this county, Mr. Hays said "In 1933 we had approximately 600 acres of tobacco. The allotment for Washington County in 1934 was approximately 700 acres. With the control program, and for other reasons, the acreage in Washington County has been increased to approximately 1,500. This acreage came to Washington County as its quota of the state allotment. The increased acreage was partly responsible for the small poundage quota allotted the county in 1937 and caused most of the criticism over the poundage quotas. The county benefited under the increased acreage. Campbell, C. E. Ayers, P. W. Brown, but we were penalized in poundage when the total acres allotted was divided into the total poundage. We naturally had a smaller poundage Individual contributions: Ernest per acre. I am afraid the average publicity parade), E. G. Arps, W. S. my mind that most of our tobacco Moore, J. F. Zeigler, C.
