**County Board Education Di**rects Superintendent To Seek WPA Aid

The apparent lack of interest by private investors in the old Creswell school building may result in the building of a new brick county school bus garage in Plymouth and a gymnasium for Creswell, according to the members of the county board of education. Superintendent H. H. Mc-Lean has been authorized by the county board to make an effort to get WPA financial assistance in taking down the building and using the material for the construction of the garage and Creswell gym.

High insurance rates on the old building, which was condemned for use by school children, are important factors in deterring individuals from purchasing it for use as storage space.

If the WPA projects can be secured, not only for dismantling the nates were John Hassell and Chesbuilding but also for construction of the garage and the gym, then it is believed this will be the best possible solution of the razing of the structure as required by the terms of the agreement with the PWA, which helped finance the new building.

Mr. McLean and the board members desire to get the most out of the old building for the benefit of the educational system in the county, and it is believed securing WPA aid in erecting the garage and gym will be the best solution to the prob-

If the building was sold to outside individuals, it would necessarily be at a sacrifice, and since the educational system already owns the land and has need of the proposed buildings, the board feels the county would be best served by following this course.
