PLYMOUTH**

The indications are now that the 1943 farm program year will close on June 30th instead of October 31st as has been the case in the past.

This brings us to the serious question of meeting soil building goals, in order to get full payments, before June 30 of next year. The Agricultural Adjustment Agency has worked out a plan whereby producers may apply the practices, excluding the practice of turning beans, earned after June 30th of this year to their next year's goal provided they have earned their goal for this year before June 30th. All practices earned after June 30th above those needed to complete this year's goal will be credited on next year's goal in order to help producers earn their goal for next year before June 30th.

In view of these changes it seems wise to carry out as many seeding practices as possible. Seed all the vetch you can get. Seed all the rye and oats for turning in the spring, your pocket-book will permit. Use as much lime as you usually do and then increase that a little.

If you have gotten all the lime and vetch seed you can get under your 1942 payment get some more vetch seed and charge it to your 1943 payment. We will notify you when the seed are here and you can do the rest.

Tobacco marketing cards will be mailed to all tobacco producers in the county next week. A letter of explanation will be mailed with these cards. It is requested that each producer follow the instructions given in the use of the card in order to avoid penalties for violation later.

The tax on excess tobacco sold is 10c per pound this year.

Cotton marketing cards will be available when cotton is ready to be sold or ginned. The tax on excess cotton sold this year will be 8c per pound.

If you have excess cotton and tobacco that has been plowed up notify the County Office right away and we will have a reported check this as soon as possible.

SKINNERSVILLE

A revival meeting is being held at Rehoboth Methodist Church this week by the pastor, Rev. R. N. Fitts, of Creswell.

Mr. and Mrs. Vernon Everett and son Vernon, Jr., were in Norfolk last week.

JUNK
needed for War

In the barnyards and gullies of farms and in the basements and attics of homes is a lot of Junk which is doing no good where it is, but which is needed at once to help smash the Japs and Nazis.

Scrap iron and steel, for example. Even in peacetime, scrap provided about 50% of the raw material for steel. It may be rusty, old "scrap" to you, but it is actually refined steel—with most impurities removed, and can be quickly melted with new metal in the form of pig iron to produce highest quality steel for our war machines.

The production of steel has gone up, up, UP, until today America is turning out as much steel as all the rest of the world combined. But unless at least 6,000,000 additional tons of scrap steel is uncovered promptly, the full

rate of production cannot be attained or increased; the necessary tanks, guns and ships cannot be produced.

The rubber situation is also critical. In spite of the recent rubber drive, there is a continuing need for large quantities of scrap rubber. Also for other waste materials and metals like brass, copper, zinc, lead and tin.

The Junk which you collect is bought by industry from scrap dealers at established, government-controlled prices.

Will you help? First—collect all of your waste material and pile it up.

Then—sell it to a Junk dealer, give it to a charity, take it yourself to the nearest collection point, or get in touch with your Local Salvage Committee.

If you live on a farm, consult your County War Board or your farm implement dealer.

Throw YOUR scrap into the fight!

JUNK MAKES FIGHTING WEAPONS

One old disc will provide scrap steel needed for 210 semi-automatic light carbines.

One old plow will help make one hundred 75-mm. armor-piercing projectiles.

One useless old tire provides much rubber as is used in 12 gas masks.

One old shovel will help make 4 hand grenades.

MATERIALS NEEDED

Scrap iron and steel.
Other metals of all kinds.
Old rubber.
Rags, Manila rope, burlap bags.
Waste Cooking Fats—When you get a pound or more, strain into a large tin can and sell to your meat dealer.

NEEDED ONLY IN CERTAIN LOCALITIES: Waste paper and tin cans—wanted only in certain areas, as announced locally. NOT NEEDED (at this time): Razor blades—glass.
