BREVARD WINS FROM INSTITUTE

By one of the fastest games of baseball ever played upon the Brevard diamond, the Brevard Kids walked away with the score 7 to 3 in their favor. The game was the third and last of a series of games the two teams had scheduled for the season. This gives the Brevard Kids the series by two to one.

The feature of the game was the excellent playing of Frank King on short and the pitching of G. C. Kilpatrick for Brevard. The pitching of Woodford Zachary for the Institute was good. There was a large crowd present and the rooting of the Institute girls was enjoyed by all, while Ralph Fisher with his bunch kept the racket on the first base line. The defeat, though hard for the well kept practised team of the Institute, was taken coolly and the yelling of the girls at the close of the game was very sportsmanlike, and well fitting as a farewell greeting.

INTERNEED GERMANS TO BE NEAR BREVARD

CAMP'S FOR BOTH HOT SPRINGS AND BREVARD

Number of Germans on Davidson River Property and Time Not Definitely Learned.

The government has decided to establish one of its camps for interned Germans on its property on Davidson river, about four miles from Brevard.

Press dispatches announced this fact during the past week and Mayor W. E. Broese brought similar news from Washington, where he conferred with the secretary of labor and other officials regarding the matter.

Mr. Broese was informed that owing to the congested conditions at Ellis Island it would be necessary for the government to avail itself of improved property at once and for this reason the Hot Springs hotel has been leased for a year.

Engineers have been on the Davidson river property making surveys with the view to immediate improvements for accommodating a large portion of the 3,000 interned Germans. A lake with a 75-foot dam is contemplated and around the shores of the lake it is probable that buildings of a permanent nature will be erected. Following the war the site may be converted into a government hospital.

Mr. Broese said that while the government had an appropriation for building material it had no provision for employing the labor and that he pledged in the name of this community labor by carpenters sufficient to erect a plain structure 23x12x8 feet, which he thought could be erected by 25 carpenters in about three days. The money so spent will be refunded by an appropriation covering such expenditures.

The interned Germans will probably be given work to do in the way of building roads through the government's property, thereby giving Brevard a direct highway to the top of Pisgah, the highest point in the Pisgah National Forest.

It was first decided to place the Germans at Barona, near Hendersonville, but this idea was given up owing to property titles.

When it was decided to locate the Germans at Konauga, Secretary of Labor Wilson, of Washington, gave out the following statement:

as to the status of the Germans and the government's purposes:

"With the coming of warm weather it was realized that opportunities should be provided that would afford the individuals interned a chance to work and obtain recreation; apparently they would enjoy greater liberties than are possible at the various immigration stations, where they are now interned. This government desires to treat interned persons with the greatest courtesy and make the conditions under which they must live as pleasant as possible.

"Consequently, I detailed Frederick C. Howe, commissioner of immigration at the port of New York, to select a suitable camp site. He covered New England, North Carolina and New York and recommended the place which I have selected.

"To this camp will be consigned the 1,800 officers and men from the German interned ships who have been temporarily held at Ellis Island, Boston, Philadelphia and New Orleans. In addition there are approximately 1,200 individuals who are being held at the immigration stations who must be cared for. There are alien enemies, alien neutrals and alien allies who have come to this country through the regular channels of immigration, but are inadmissible under our laws.

"In establishing these interned persons in camps a policy of segregation will be pursued. Alien enemies will be separated into one class; alien neutrals and alien allies into a second class, and aliens who have been found on examination to be feeble minded, into a third class. It will fall to the immigration bureau to provide for the internment of all alien enemies whom it is not deemed necessary to intern as military prisoners. As a result alien enemies resident in this country whom the department of justice deems advisable to restrain, but against whom immediate prosecutions are not brought, will go into the camps established by this department. To care for these several classes of individuals will probably make additional camps necessary.

"Under the Hague treaty this government is empowered to work the interned men, or to farm them out to individuals or corporations. When worked by the government they will receive the pay of soldiers, and when farmed out will be remunerated at prevailing wage rates. After making deduction for their maintenance, the interned men will be given at the time of

their discharge by the government whatever sums they have earned.

"The men in the camp in North Carolina will be used to cultivate the tract, and will be farmed out for lumbering and road building. In view of the necessity for guards the two latter occupations appear to be the only ones in which they can be conveniently worked by private capital.

"Arrangements have been made already with the department of agriculture for the employment of a number of men at road building on the Vanderbilt tract that adjoins the camp which has been taken over by that department as a forest preserve."

No excuse nowadays, either, for the merchant who is satisfied with 5 or 10 per cent profit from his advertising when with 1 per cent of extra effort he could obtain 20 or 30 per cent profit.
