### Study the Columbus Fifth Wheel Only International Wagons Have It

WE can demonstrate how the Columbus fifth wheel makes the best wagon still better. Look over this strong new feature, which you will find only on International wagons.

The famous fifth wheel on the Columbus, made of strong, malleable iron with hard-wearing surfaces, does these things: It offers a solid strain on the front bolster and sand-board; even supports the bolster, so preventing bending or breaking of the bolster; does away with pulling up of front bolster and bending of axle iron.

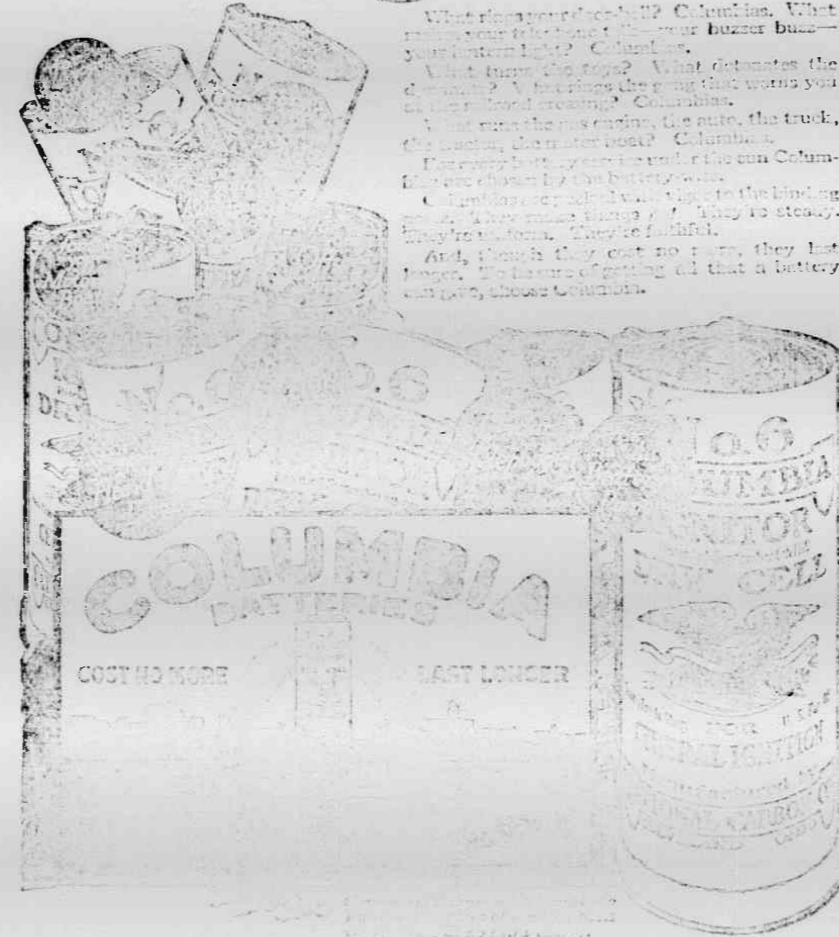

The top plates of the fifth wheel are widest, so the lower plates are protected and held close in between. The more you study the merits of this feature, the more you will appreciate its importance.

### Deering Mower Assails

A THOROUGHLY dependable mower is a big asset at haying time. A good mower should be able to cut grass in any condition satisfactorily, and in this respect the Deering New Ideal is a pronounced leader.

The double movement of the cutter bar which permits close cutting over rough ground, the combined main frame with all bolts drilled in one operation to insure perfect alignment of parts, the covered gears and the special quality steel bar and roller bearings, etc.

Still another point—the leather plate on the Deering mower extends the full length of the cutting bar, insuring the advantage of a complete shear cut, which is the most efficient as well as new. This does away with all closing of the grass between the knife section and the rear end of the leather plate.

Drop in and see us and we will show you the mower in detail.
