Dear Sir:

Do you realize that spring is here and that the farmer as a whole is away behind in his work? That means that the neighbor from whom you have been getting that plow, harrow, drag, corn planter or cultivator is going to need the machine himself and you must look elsewhere for tools with which to do your farming.

The best place to look for those tools is where they try to see that the tools work right and where you can get the some times needed extras and repairs. Yes, our machines some times need repairs. We try to carry those most likely to break. We have a most complete set of repair catalogues. We will be glad to aid you in getting repairs for any machine you may own.

**TOOLS—You Need the Tools, we Need the Business.**

If you do not have the money, we will arrange for you to get the tools and pay for them later. We will sell you a disc harrow for less money than it can be bought in Knoxville, Richmond or Chicago and save you the freight besides. We know that we are selling the BEST all-around plow in the country, the briers, begger lice, etc. will not hang up on the wing, choking down your team. We have just four more peg tooth or drag harrows. No field is ready to plant till it has been disced and dragged with a peg tooth harrow.

We again will have that Buckeye disc cultivator. Remember, they were hard to get last year. Don't wait till you are ready to go into the field before ordering. We have six. We have received our mowers and rakes for this season.

**GUANO**—Please do not let the little advance in price of Acid and Guano stop your using what your land needs. Corn will again be a good price. HOOVER says that wheat may bring \$3. If it does, then corn will sell higher than it is right now and you know it is very high.

**SEEDS**—We were able to get Burpees seeds for this year. We are glad to get back to Burpees Seeds. They seem to be the only one that really GROW. We have a small supply of Grass Seeds. Clover is climbing every day. Other grass is not so high. We have Hickory Kink, Coke Profic and Yellow Corns.
