

**YOUR HEALTH**

**DIPHTHERIA**

Some days ago there appeared in a well-known periodical an advertisement that ran something like this, "Total Ignorance." Ignorance feeds the ranks of Bolsheviks, I. W. W. A., criminals, loafers, and all the other crotches that infect human society," but ignorance isn't wholly confined to solid ivory heads, all ignorance doesn't come out of Russia, ignorance isn't always a crime—its just Lack of Knowledge, and ignorance is more general than we admit. In fact, ignorance is the "nigger in the business woodpile today." This is the way the business advertiser looks at ignorance. Ignorance, lack of knowledge, is the wrench so often thrown into the gear of Health work. Carelessness also has a place in retarding effective disease prevention.

**Some Definite Information In Regard To Diphtheria**

The season for diphtheria is on, during September and October we have usually far more diphtheria than at any other season of the year.

**The Probable Cause**

The most probable cause for increase in Diphtheria at this particular season, is that schools open at this season of the year, and therefore, the congregation of large numbers of children. Diphtheria is a spit-borne disease, and of course children at play, swap spit often. There is no doubt, but, that diphtheria carriers (viz—Those who are not sick and probably never have been sick with diphtheria, carrying germs of diphtheria in their nose and throat), first spread the disease.

**To Prevent And Cure Diphtheria**

All school children should have cultures made from the secretions of the nose and throat on entering school. Those positive to diphtheria, should remain at home and be treated till the secretions are negative to diphtheria. Every child who has the least sore throat or cold should stay at home till well. Call your doctor early. If he pronounces the case diphtheria, insist that he give your child State Board of Health Diphtheria Antitoxin. It costs only 25c for the syringe. The balance of the cost is paid by your taxes. It would be well for citizens to "Take time by the forelock" and see if their

druggist and physician has State Board of Health Diphtheria Antitoxin this is already paid for by taxes on hand in case that it is needed at once.

We have just received a letter from a party who paid his druggist \$13.25 for antitoxin that would have cost only \$1.00 if he had used State Board of Health Diphtheria Antitoxin. There are three products that your druggist can furnish free to his patrons, smallpox vaccine, typhoid vaccine and diphtheria antitoxin. It does look like good business advertising for your druggist to do this. Some people cannot see a dollar in the distance on account of the penny right before their eyes.

Diphtheria is curable if antitoxin is given in time. All suspicious cases, those cases in which there is no membrane in sight, but have other symptoms present, should have antitoxin at once. Take no chances by delay.

I would advise all school teachers to be on the alert for any symptoms of disease at all times and would like to state that I have recently quarantined some cases of scarlet fever. In view of the fact that the school were closed for so long a period last term because of influenza physicians and teachers should cooperate in reporting and isolating any suspicious case.

W. J. WALLIS, Co. Health Officer.

**BE RID OF THAT ACHE**

If you are a sufferer with lame back, backache, dizziness, nervousness and kidney disorders, why don't you try the remedy that your neighbors recommend? Ask your neighbor?

Mrs. Z. V. Burrell, Whitmire St., Brevard, says: "Several years ago kidney trouble got the upper hand of me and I was in pretty bad condition. I had a dull heavy ache across my kidneys most of the time and I felt tired out. It was almost impossible for me to straighten after bending and blinding dizzy spells came over me when I could hardly stand. I was more tired mornings than when I went to bed and I had headaches and nervous spells. My ankles and hands swelled badly and my kidneys acted too freely. Hearing of Doan's Kidney Pills I began taking them and in a short time I was feeling like myself again."

**DOCTOR ADVISED HIM TO TAKE**

**A. F. Roberts, Successful Cattle Dealer Gains 16 Pounds In 60 Days By Taking Tanlac.**

"One of the best doctors in Colorado advised me to take Tanlac, and it has not only overcome my troubles but I have gained sixteen pounds since I began taking it sixty days ago," said A. F. Roberts, who lives at Rocky Ford, Alberta, Canada, a few days ago.

Mr. Roberts is one of the largest cattle dealers in his section of the country and before moving to Canada a short time ago, he had spent most of his life in Colorado, U. S. A.

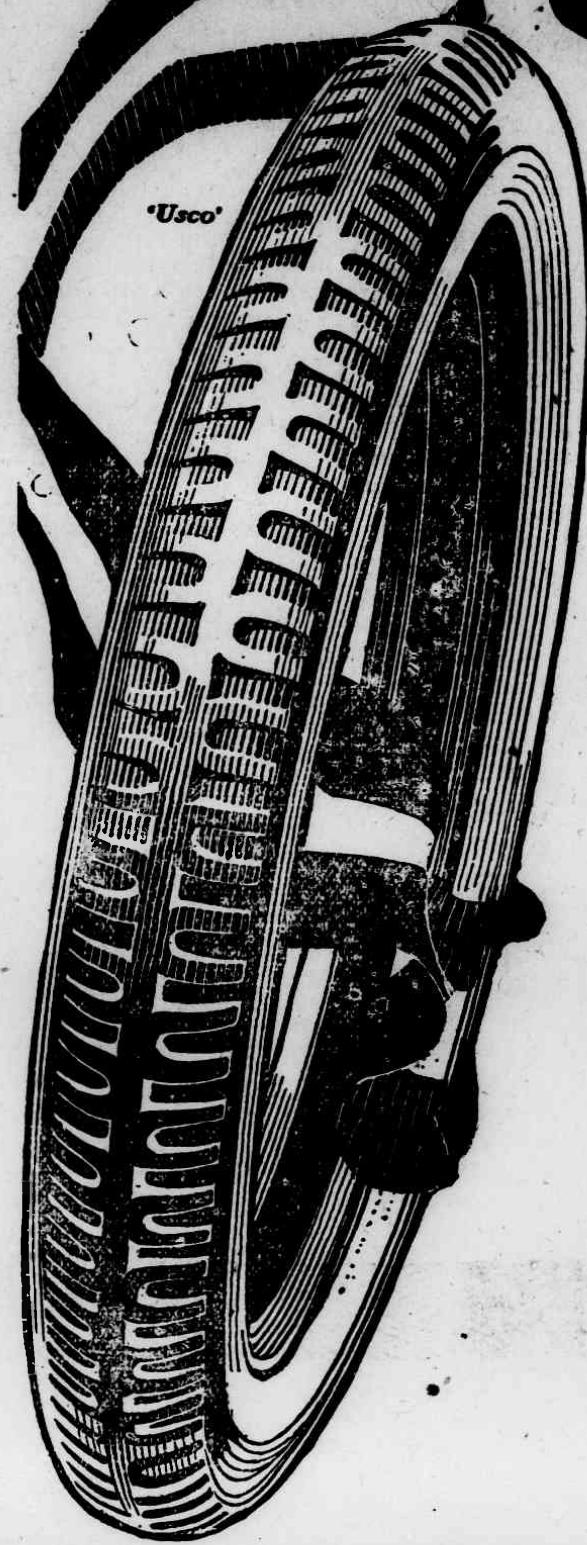

"I can now understand why Tanlac enjoys such a wide popularity in both Canada and the United States," continued Mr. Roberts, "and since it has done me so much good I know that it is a very dependable medicine and deserves all the praise that is being given it. For the past two years I have suffered from stomach trouble and when I commenced taking this Tanlac it was almost impossible for me to retain anything I ate. I was very nervous and never got a good night's sleep and finally got so weak and rundown that I was hardly able to get about. I often had dizzy spells and was bothered a great deal with constipation."

"My physician certainly knew what he was doing when he prescribed Tanlac for me, for it has done the work for me as I am as healthy and as strong now as I ever was in my life. In fact it has done much more for me than I expected it would do. I have a fine appetite and everything I eat agrees with me perfectly and I never have the slightest sign of stomach trouble of any kind. I am no longer bothered with constipation and never have those dizzy spells any more. I have regained all my strength, too, and that nervousness has left me and I sleep like a log every night. In fact, I am simply enjoying perfect health again and I give Tanlac credit for it all."

Tanlac is sold by leading druggists everywhere. adv.
