**HERE'S GALIAS AGAIN:**

An event takes place in Washington on next Friday, the fourth day of March, which has not taken place since Roosevelt, by the wave of his magic wand, made Taft president of these United States.

The American people are the most wonderful people in the world. They can go through and do go through political campaigns and each party go at each other's throats and sometimes men are murdered because of their political belief. As soon as the storm of the political battle is over, they settle down and become reconciled to the verdict of the ballots polled.

In three days after the most bitter political fight, if a foreign foe should invade our shores, there would be no political party. There would be a union of all creeds and classes. No one would stand back on his duty to his country. This was proven when Spain had her fingers throttling the throat of Cuba. President McKinley called for volunteers to go over there and eat embalmed beef and drive the Spaniards out of those islands. The same would have happened if Wilson had called for volunteers to go to France to eat mule and mop the earth of German militaryism. But the selective draft system was brought about and John Smith and Bill Jones sons went along with the Astors Vanderbilts and Mellons, if they had any. Or had gone to the woods as some did and be hunted out and sent to the Penitentiary. Got away and have gone to Germany like Bergdoll, where they ought to be; every mother's son of them.

We have been promised by the republican politicians that after the fourth of March, that things would open up. Factories that have been shut down or running on half time would resume operation on full time. The ugly wolf of want will be driven away from the laboring man's door. He will again go to work with a full dinner pail. The farmers in the South will be able to sell their cotton for enough to pay their guanno bill. All they will have to do will be to climb that money tree and shake the money down.

Probably the downward drag of everything is caused by the North Carolina Legislature passing the State Wide Stock Law. And doing other things too tedious to mention. Anyway in a few days it will be only history. It has come into being, flourished for sixty days, will be soon forgotten. Except by the members who in their conversations, when they want to feel big, and make the other fellow think he is more distinguished than the rest of us, will say, "When I was in the Legislature". I know if I had ever had the honor of serving in that august body, I would talk about it until I turned everyone green with envy, or made them think I was an awful bore.

Two years from November we will elect some one to go down there and draw his or her pay. Maybe we will elect a heavy weight, and maybe he or she won't weigh as much as a bantam rooster would on the planet Mars. And they say an ordinary man just weighs a few pounds on that body.

But the distinguished gentleman who we last sent down to Raleigh

has done something that will make a name for himself that will land him in Congress, as long as Uncle Joe Carr. And why not? Uncle Joe was born in North Carolina. Gallias.

**THE GREAT THING:**

"The great thing about a building and loan association is that it is co-operative, which means that its earnings are divided equitably among all its members in proportion to the money they have invested, so that the little fellow gets exactly the same treatment as the largest shareholder. It is an institution in which you can buy shares today on exactly the same terms as the people who started the association twelve years ago and have worked years to make it a success. Can you show any other institution of which the same can be said? In most business enterprises the people who start them and make them a success expect to get a larger share of profits than those who come in later after success has been accomplished, but in a co-operative savings and loan association this is impossible, and anyone who takes shares today is treated exactly the same as those who might have taken shares years ago. It is never too late to begin. Adv.

**UNION NEWS:**

The people in this community were sorry to hear the "No Fence Law" was coming. Ranging stock is our stake for living.

Mr. Lamar Reid and Miss Dora Pearl Kimsey paid the Rocky Mountain people a visit some weeks ago.

Mr. Water Chapel and Carl Reid made music at Mr. John Kimsey's a few nights ago. They say the music was splendid.

Mrs. J. L. Lyday has returned home from her sons on Freezing Creek. They were seriously ill with measles but are fast improving.

Jack Riddles.

**PRAISES THE MOUNTAIN SANITARIUM:**

Dear Mr. Editor:—

Will you kindly allow me to say a few words in honor of the Mountain Sanitorium. I was a patient there for fourteen days and I can respectfully say that I sure was cared for and I can truthfully say that the nurses at the Sanitorium are more like our good mothers than anything I can compare them to in the human line of work.

Now I have been hearing a great lot of gossip about the way these people serve the Lord. Well no one that has not been there, can tell any thing about this and if I may say so, that if and all who think these people wrong are as good and true to the Almighty God as it seems that Dr. Stokes and his staff are, this old world would make a great change from what it is to a higher state.

Friends I have been hearing that these people say that there is no Hell and that they also gave me literature on this subject. Now good people of Transylvania, I am in no ways ignorant of this, for I have not received any literature and I wish to say that some body knows more about me and my business than I do myself.

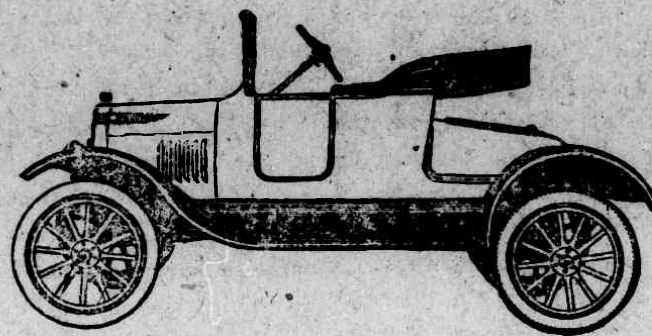

In conclusion I wish to say that I had much rather a surgeon would ask God to help him in operating on me than to use God's name in vain, and all kinds of foul language, for I or any one, who is being operated on. Life is in his hands and if God sees fit He takes the soul from out this foul surgeon's hands to take care of it Himself, I or any one that cares for himself had rather die whole and out from under this kind of a man's hands than to take such a risk as it is to be operated on.

Friends and people of the County look at the lives this man has saved and we can most readily see that God is helping him in his work.

May we all bear in mind that I have not been influenced or received any literature while there.

Wishing Dr. Stokes and the News much success, I am sincerely yours, Lloyd Cantrell.

# THE FORD RUNABOUT

**THE FORD RUNABOUT** needs no advertising. About all we have to do is to tell you we can supply the demand with something like promptness and the selling is over. We have never been able to get enough from the factory to meet the demand and do not suppose we ever will get enough. There are more than four million - five hundred thousand Ford cars in operation today, and of this number about three hundred thousand are in foreign countries, the rest right here in America, but we have one hundred and five to one hundred and ten millions of people and it looks from the way demand comes in that we will have to sell that many Runabouts before we can satisfy that demand.

It is one great, little utility. It fits into every man's wants, from the physician to the worker in the factory, from the country blacksmith to the millionaire railroad owner, from the contractor and his employees to the millionaire sporting man's entourage, almost as necessary these days as the handkerchief.
