FRIDAY, JULY 28th, 1921.

POSITIONS REVERSED:

Not very long ago it was universally acknowledged that the public school teacher, taking into account his education and his natural abilities, was the poorest paid of all the great army of workmen. His salary was just enough to meet current expenses, and as a result his vacation, instead of being an asset, was a positive liability.

Now things look brighter in the educational world. The teacher is being paid something like what he is worth to the community. He has no longer to go into other work during his vacation to make the ends of that vacation meet; but may, out of his savings, attend summer schools and keep up with his growing profession.

And now positions are reversed. A few years ago it was an all summer struggle to find teachers for the public schools. Teachers were always in demand. Now, according to reports from the county superintendent's office, practically all the vacancies are filled by the beginning of the summer, with plenty of applications to choose from.

And so the advance in the salaries of teachers has resulted not only in advantage to them but to the whole educational system and all concerned.

The law enforcement league in petitioning the board of aldermen for a tax on public dance halls was making a mild request. If anything should be taxed a luxury should be — and will the dance devotee deny that the so-called poetry of motion is a luxury?

The Brevard post office has risen to the rank of second class. That sounds fine, but it will take a microscope to see the advantages to the public. In fact, the public will be disposed to kick violently about the absolute closing of the delivery window on Sunday. But this will have decided advantages for the fellow who has the work to do, with precious little harm to the fellow who has to wait till the next day for his mail.

The bus line suspended operations just when it began to be needed most. It made an experiment during the dull season and stopped on the ground that it did not pay. If all businesses were conducted on this theory, what a vast army of failures there would be!

Chasing a news item is very much like chasing a debt. And when you get it you hardly ever get all of it. That's very much like a debt, too.

GROWING OF SMALL FRUITS SHOULD PROVE PROFITABLE.

The cultivation of small fruits is, according to Miss Florence Kern, one of the best ways to insure safe returns from an investment, with a reasonable profit. Small fruits, she says, is one of her hobbies.

The particular kinds of small fruits in which Miss Kern has become interested are grapes and raspberries. She has tried her hand at both on her land in the western part of Brevard and has had very satisfactory results. She believes it will pay people generally to raise them and bases her belief on her own success.

A few seasons back, Miss Kern set out a handful of raspberry plants. They grew well and multiplied amazingly. One variety called the Columbia, a large purple berry, was

cultivated carefully in regular rows but another variety, the ever bearing, was left much to itself, grew up in profusion, and now makes a thick hedge, with red berries shining among the leaves from early spring-time till killing frost.

Here, then, is a crop easy to grow. The fruit, as everyone knows, is delicious in the raw state and is fine for canning purposes. But not least among its advantages is the fact that the raspberry, as well as the grape, defies the vicissitudes of this early spring climate, and will thrive and produce when large fruits, like apples and peaches, are killed by frost.

In a year like this, when apple and peach orchards are barren, the hardy small fruits ought to make friends with farmers and horticulturists, is Miss Kern's conviction.

**THE PRAYER CORNER:
The Blood on The Door Posts**

The blood on the door posts was to be a mark of safety. When I see the blood, I will pass over you. It was very important therefore, that the blood should be upon the door posts in plain sight. There was no other safety. It would not be sufficient for a man to say, "I belong to the people of Israel and God intends only to slay the Egyptians. There is no need of my troubling myself to put blood on my doorposts. My home will be safe. My first born will not be harmed. Would this man's house have been passed over by the destroying angel? No; God had appointed a way of deliverance, and if any of His people had refused to accept that way, thinking that some other way would do as well, or that they were safe without any mark, they would have put themselves outside the protecting walls of the covenant.

Men may say of Christ's Blood now: "I will trust myself in God's Hands, for He is merciful; He is my Father, but I will not look to Christ's Blood for salvation; I can see no need of that." He who says this rejects God's way of salvation, and there is no salvation in any way but that which He has appointed through Jesus Christ. We cannot say we trust in God's mercy while we reject His Son. Christ is the mercy of God to the world. The angel looked that night for the blood, and only the houses marked by it would he pass over.

No matter how good the people inside were, if they had disregarded God's appointment, and had taken some way of their own, there would have been death within their home at midnight. The blood must be on the doorposts and the people must put it there with their own hands. It is so now — God's angels look for the blood, where that mark is found they give protection and blessing; where that is wanting there is nothing to shelter from wrath.

A PRAYER

Almighty God, our Heavenly Father. Thou hast told us in Thy Holy Word, that Thou gave unto us eternal life, and this life is in Thy Son. He that hath the Son hath the life; he that hath not the son of God hath not the life.

We believe Thy word, that there is none other name under Heaven given among men whereby we must be saved but the name of Jesus, in whom we have redemption through His blood, the forgiveness of sins according to the riches of His grace for the Blood of Jesus Christ Thy Son cleanseth from all sin.

Help us, O help us to take shelter in the blood, for without it there is no safety, the precious Blood of Christ, as of a lamb without blemish and without spot, and to abide there for only in abiding can we be saved. Sprinkle the blood upon our hearts and upon our homes that washed in the blood of the Lamb, we may serve Thee faithfully here and enter in at last the place of many mansions and unto Him that loved us, and washed us from our sins in His own Blood shall be glory and dominion forever and ever amen, C. D. C.

Farming Is a Business

And like every business, it requires forms records and blanks that give you the facts about your farm, just as a business man has them about his business.

We print forms and letterheads (every business farmer should have his own letter head) on Hammermill Bond, the Utility Business Paper.

Let Us Show You What We Can Do for You

PHYSIOLOGICAL ACTION OF TANLAC EXPLAINED

World's Leading Authorities Show Just What Tanlac Really Is and Explain Effect of Each of Ten Ingredients on the Human System. Power of Medicine Conclusively Proven.

A day never passes but what thousands of people ask the questions: What is Tanlac? Why its phenomenal success? Why do we hear so much about it? And Why has this preparation so far outstripped all other medicines of its kind?

The answer to these questions is easy and can be explained in just one word — merit. Tanlac is scientifically compounded and represents years of work, study, experimentation and research by some of the foremost chemists and pharmacologists of America.

The Tanlac formula is purely ethical and complies with all National and State pure food laws. It is purely vegetable and is made from the most beneficial roots, herbs and barks known to Materia Medica. The Tanlac Laboratories are among the largest and most modernly equipped in this country.

Ten Ingredients in Tanlac. Altogether, there are ten ingredients in Tanlac, each of which is of recognized therapeutic value.

In referring to one of the more important ingredients of Tanlac, the Encyclopedia Britannica says: "It has been the source of the most valuable tonic medicines that have ever been discovered."

In referring to other of the general tonic drugs contained in Tanlac, the 13th Edition of Potter's Therapeutics, a standard medical text book, states that "they impart general tone and strength to the entire system, including all organs and tissues."

This same well-known authority in describing the physiological action of still another of the ingredients of Tanlac, which is of value in treating what is commonly known as a "run-down condition," uses the following expression: "It is highly esteemed in loss of appetite during convalescence from acute diseases."

There are certain other elements in Tanlac which, because of their influence upon the appetite, digestion, assimilation and elimination, improve the nutrition and vital activity of all the tissues and organs of the body and produce that state of general tonicity which is called health.

The United States Dispensary makes the following comment regarding another ingredient: "It may be used in all cases of pure debility of the digestive organs or where a general tonic impression is required."

There are certain other ingredients described in the Dispensary, and in other standard medical text-books, as having a beneficial action upon the organs of secretion, whose proper functioning results in a purification of the blood streams passing through them. In this manner, objectionable and poisonous ingredients of the blood are removed and the entire system invigorated and vitalized.

Tonic and Body Builder.

Tanlac was designed primarily for the correction of disorders of the stomach, liver and bowels. At the same time, however, it is a powerful reconstructive tonic and body builder for it naturally follows that any medicine that brings about proper assimilation of the food and the thorough elimination of the waste products must, therefore, have a far-reaching and most beneficial effect upon the entire system.

Perfect Silver Polish
is found in Silver Cream

It will clean more silver, clean it better, quicker and at less cost than any other silver polish made. It contains no acid, ammonia, grit, cyanide of potassium, or other injurious substances. It has had a thorough test of thirty-five years and is pronounced by those who know as the best.

Price 30 cents.
