INSANITY TEST APPLIED TO USE OF POCKET-BOOK

Pastor Gives Sure Method Of Finding Out Whether Anyone Is Becoming Financially Crazy.

A sure test for financial insanity is outlined by Dr. J. A. Geissinger, pastor of the Methodist Church of Anaheim, Cal. The day the thrift movement was instituted in the public schools of Anaheim, Dr. Geissinger issued the following statement to the citizens of that municipality.

"A common test for insanity is to set the person suspected of being mentally unbalanced to filling a tank. The faucet is turned on but the vent is left open. If the suspect continues to try to fill the tank without closing the vent he is no longer considered a suspect. He is known to be downright crazy. Financially there are a lot of Americans who are surely 'cocoed.' The boys and girls who line up in this movement will have the satisfaction of knowing they are not as insane as their fellows who let the leak run.

"This is a specially good move for boys and girls, for the time to form habits of thrift, as well as any other good habit is as early as possible. But it would be a good thing for the older people, too. America needs a new

emphasis upon thrift as much as any other one thing.

"This thrift movement isn't an attempt to raise a crop of tightwads. Thrift is defined as 'a prudent use of resources.' Not only material resources, but all of them. The American people have been shamelessly reckless. They have had no regard for their health. They have had no regard for their natural resources, their forests for example. They are eating up their spiritual capital now. And on the ground that you can't teach an old hen new clucks, it is best to begin with the boys and girls."

Put off foolish expenditures today in order that you may make wiser, well-considered purchases tomorrow.

The prosperity of your town depends upon the prosperity of the individuals. Do your part.

Use of Poison Gas in World War Child's Play Compared to Future

By BRIG. GEN. A. B. FRIES, Chemical Warfare Division

The use of poisonous gas at the end of the World war was a child's game compared to what it will be in the future. The old type cloud gas that required the burying of cylinders in deep trenches, requiring the work of many men for many days to prepare an attack, is obsolete, but the modern method is a totally different matter.

A new American invention is the toxic smoke candle. It is a solid, safe and foolproof. It may be crushed, smashed, or punctured with bullets or shells without harm. It is only when a fuse is lighted and a heating mixture is agitated that a gas is given off. The candles may be very light or they may be heavy; they can be so small as to be carried in a knapsack, or so large as to require the efforts of many men. Its attacks are highly efficient, more than 50 per cent of the total weight being poisonous gas.

Then there is a liquid gas, called "Dew of Death." If three drops of this liquid gas be absorbed into the skin, it will cause death in most cases, while smaller quantities will put a man in the hospital. This gas and the common mustard gas, which likewise burns the skin, can be sprinkled from airplanes in practically unlimited quantities.

AIR ROUTE OPENED TO BAGDAD

Regions Isolated by Deserts Made Accessible by Aerial Transport.

London.—Regions that would have to wait many years before they could be traversed by railways are now quickly mastered by aerial transport. News comes from the air ministry that a new air route has been opened up across the desert between Palestine and Mesopotamia. Notification has been received of the arrival at Bagdad of three airplanes of the royal air force which have flown over this route.

The new route is about 530 miles long. It starts from Ramleh, passes through Amman and Kasr Azrak, where landing grounds have been prepared, and proceeds thence in an almost straight line across the Arabian desert to Baghdad on the Euphrates, and thence to Bagdad.

Farmer Showered With Burning Whisky Dies

Wilkes-Barre, Pa.—The explosion of a perfume still in his cellar resulted in the death of Joseph A. Fries, of Parsons, near here, who was showered with the burning whisky. It became known today through a physician's report.

Wakes Up, Finds Auto Hanging on Bed Post

Delaware, O.—How would you like to be suddenly awakened by a crash and find an automobile hanging on your bed post?

Such was the experience of Levi Nackel who resides three miles northwest of Ashley on the old Mansfield road.

Nackel was aroused by the noise of the automobile crashing through the wall of his residence and into his room loomed and glaring headlights of the automobile. The car collided with the bed upon which Nackel was sleeping and shoved it across the room to the opposite wall.

Nackel's house is located at the end of a short detour road from the state road to the Mansfield road. The men failed to make the turn at the end of the road and crashed through the wall of Nackel's house. No one was hurt.

For Industrial Cripples. Up to May 1, 1921, a total of 24 states had enacted laws accepting the provisions of the federal act for vocational rehabilitation of industrial cripples and providing state appropriations to match the federal grant.
