A Roof of Character

Your roof need not look like a thousand others. Ruberoid Strip-shingles will give it a distinctive appearance.

There are many ways in which Ruberoid Strip-shingles may be varied to give different pleasing effects. The soft old tones of Indian red and sage green—with which the crushed natural slate surface is permanently colored—may be combined in various ways. The shingle courses may be reversed as well, thus giving additional ruggedness and a massive appearance to the roof.

Many of our customers have found the adaptability of these shingles to varied designs a good sales point. It is one of the reasons that they

are fast becoming the most popular shingle on the market.

Lack of space and limitation as to color prevent us from showing here more than a mere suggestion of the many varied designs in which Ruberoid Strip-shingles may be laid.

As to the quality of these Ruberoid Strip-shingles, we need only say they bear the Ruberoid Man Trademark—a mark of quality that is backed by tests of more than a quarter century on thousands of roofs.

We are always glad to help you with your building problems. Phone us today for samples and prices.
