Grain futures are held to be a reason why a lot of men have failed to get ahead.

They seem to be able to do almost anything with radio except make hair stop falling out.

"Out and gone to the races" is an old expression. Gone to the races and out is an old story.

Eight hours work, eight hours sleep, eight hours play—if they would only play and not wrangle.

Radio competition is going to drive the phonograph to eliminate the scratch of the needle.

Radio means that in the next war generals will remain even greater distances from the front.

Why stay at home all the time when cowhide traveling bags are selling at ridiculously low prices?

Nowadays a man builds a garage on a vacant lot and if there's any money left he constructs a house.

It is always something. Those that are not looking for a job are having trouble with the servants.

A DAY'S WORK DONE

Do the EYES feel more played-out than the BODY when your days' work is done?

Can you read your evening paper without squinting, without becoming sleepy, or having your eyes burn?

If you are acquiring the habit of dropping off to sleep, over your newspaper, it is a sign that the eyes are tired, and demanding rest. It is evidence that the daily routine is getting to be TOO Much for them.

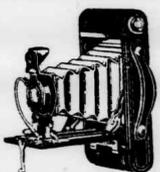

This condition is unnatural, and unless corrected, will seriously injure the delicate nerves and muscles of the eyes.

The thing to do, is to consult a RELIABLE OPTOMETRIST—one in whom you can place confidence. The right scientific attention will bring your vision up to normal.
