

Chicago's Biggest Bogus Liquor Plant Found

Chicago police have just discovered probably the largest bogus liquor distilling plant in that city. From the basement of the place a tunnel ran to a garage where the fake whisky and gin, in counterfeit bottles and with counterfeit labels, was bottled for distribution. The illustration shows the inside of the bottling room, and a case of bogus Gordon gin starting through the tunnel.

Insects in Gotham Frolic Ball

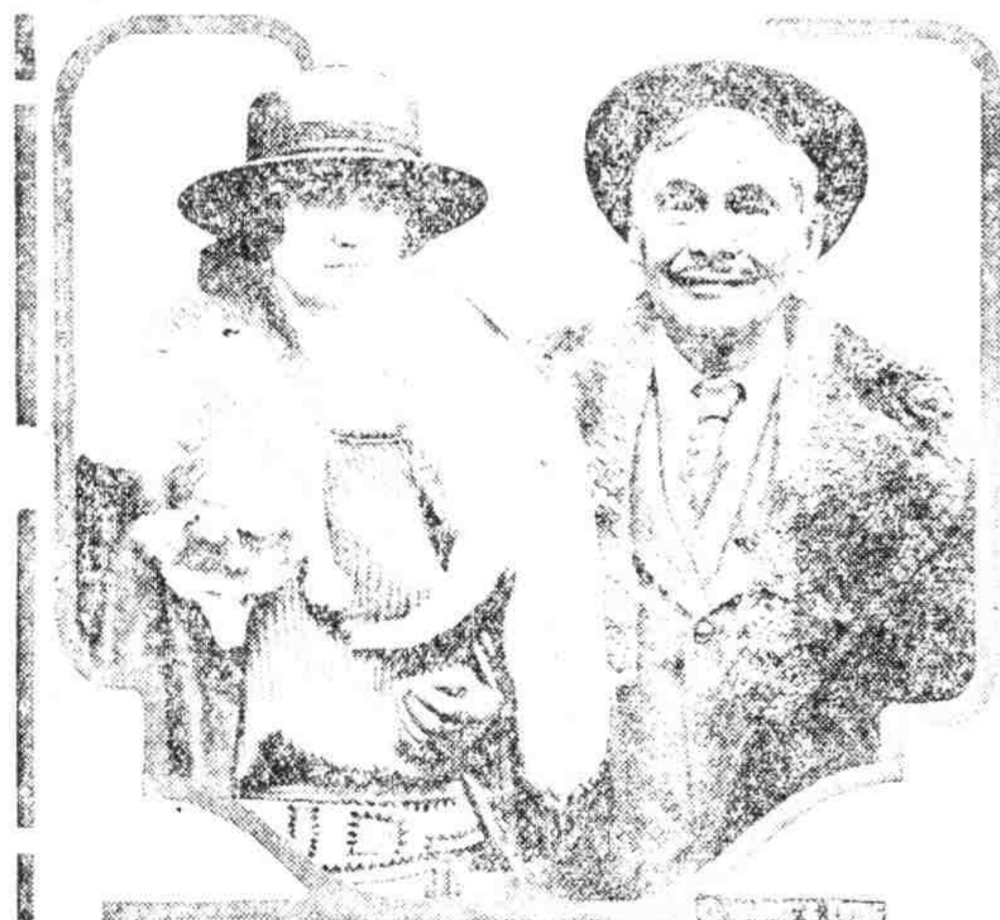

Miss Marie Herbert and Miss F. J. Long, as "moths," and Miss Mary Wood, and Miss Cheryl, as "butterflies," were took part in the insect ball given at the Waldorf-Astoria on Feb. 9 by the Entomological Club of New York.

SHE'S A REAL WALKER

Illustration of a woman wearing a heavy winter coat, likely advertising a brand of clothing or footwear.

Richest Indian Gives Away Fortunes

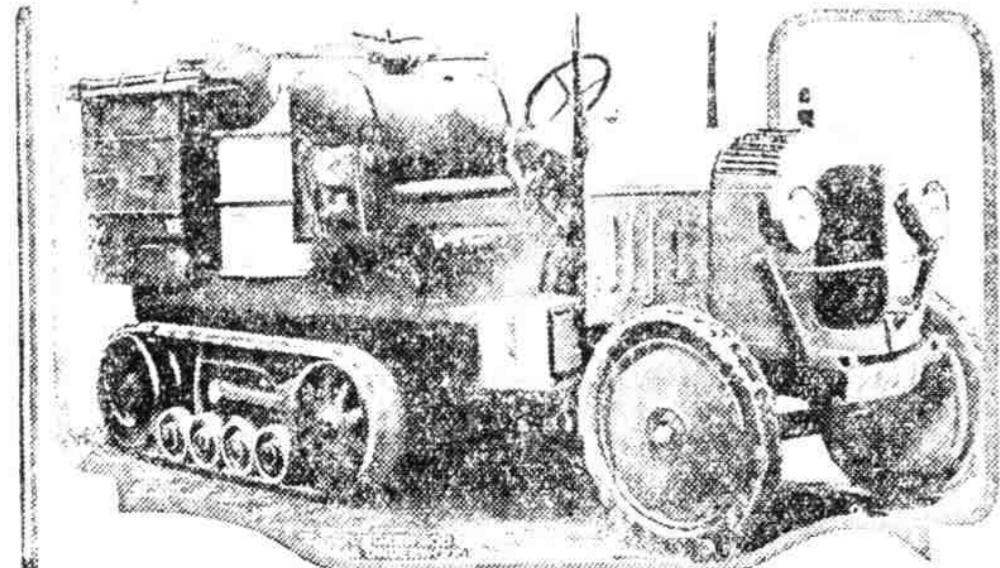

The wealth of the Indian, who has been said to have a net worth of \$1,000,000, is being used to help the Indians of the reservation. He gave \$25,000 to his wife and the Indian school at the reservation, the Marrow, in a display of his generosity. He is the richest Indian in the United States.

VICTIM OF CEM ROBBERY

The woman who was the victim of a robbery in the cemetery, where she was carrying a large sum of money, is shown in this photograph.

Car That Crossed Sahara Desert

Photographed in the Sahara, one of the cars which recently crossed the great African desert. The cars were all of different type, to make the journey a test of their relative value, but all were built by Citroën of Paris which organized the expedition. But 21 days were required for the trip.

You can beat the Weevil

Farmers in States where the boll weevil first appeared have proven that cotton can be successfully grown even in badly infested sections. If you are willing to faithfully follow the rules for weevil control, rules discovered by the U. S. Department of Agriculture and vouched for by all county and State authorities, you too can make money this season on your cotton, despite the boll weevil.

Remember, you can not neglect one of these rules and expect to get the best of the weevil. For the information of our good friends who grow cotton, we briefly state below the ten rules to be followed. Tear them out of this paper, and keep them ever before you.

1. Grow not more than 8 or 10 acres of cotton to the plow until you learn for yourself how many you can handle profitably.
2. Prepare land early. Break heavy lands in the Fall, sandy lands earlier than usual.
3. Plant early, using delinted seed for quicker germination and better stand.
4. Plant early fruiting varieties, such as Cleveland, Cook or Express.
5. Fertilize liberally, both to hasten maturity and to set unusual quantity of fruit. You must depend on phosphoric acid for an early crop. 8 to 10 per cent on sandy soils and 9 to 12 per cent on heavy soils. Apply when rows are bedded, at least two weeks before planting.

6. Cultivate crops every week or ten days, especially during early stages, to promote growth.

7. Kill weevils when they first emerge from winter quarters. They will first appear in small areas near woods, haystacks or shelter. Poison them quickly or pick them by hand.

8. Gather and destroy infested squares. When squares flare open and turn brown the young weevils are in them. This is your chance to do the weevils the most damage. Gather all squares, whether on stalks or on ground, and destroy them.

9. Use calcium arsenate poisoning on small acreage under advice of your county agent. While the U. S. Dept. of Agriculture says this is the best method, you won't succeed with it unless you follow instructions.

10. Destroy stalks early. Gather cotton and immediately plow up or otherwise kill the green stalks on which the weevils feed. Because of the part fertilizer plays in making the early crop which is so necessary, you will want to be more careful than ever to choose a dependable, reliable mixture. Our 40 years experience goes to Royster's Fertilizer a quality that wins the lasting friendship of farmers who understand the food requirements of plants. Look for the F.S.R. trademark on every bag.

What is good health worth to you?

HEALTH is priceless. You wouldn't knowingly part with it for anything in the world.

Why then do you risk it needlessly for the sake of a few cups of coffee? Coffee contains caffeine, a harmful drug which often interferes with nerves and digestion.

There's an easy, pleasant way to avoid this menace to health, without any sacrifice of comfort or satisfaction. Drink Postum instead of coffee.

Postum is a pure, cereal beverage—wholesome and delicious—a safeguard for health.

"There's a Reason" for Postum

Made by Postum Cereal Co., Inc. Battle Creek, Mich.
