

# MY DAUGHTER WOULD CRY AT EVERYTHING

Nervous and Irritable. By Taking Lydia E. Pinkham's Vegetable Compound Became Entirely Normal

Clinton, Wisconsin.—"My daughter was in a very run-down condition, and was irritable, and would cry at every little thing she was so weak and nervous. As Lydia E. Pinkham's Vegetable Compound had helped me when I was a girl I gave it to her to build her up, and the results were all that we could wish for. I wish that every mother with growing girls would try it for these troubles girls often have. I had taken it myself before my girl was born, and she was one of the nicest babies any one could wish to have. I recommend the Vegetable Compound to women and girls and cannot praise it too highly."—Mrs. T. A. HOLBORN, Box 45, Clinton, Wisconsin.

Mothers can depend upon Lydia E. Pinkham's Vegetable Compound to relieve their daughters of these troubles they so often have. They know from experience the value of the Vegetable Compound in the treatment of these complaints and many, like Mrs. Holford, give it to their daughters.

## BACK ACHY?

Lame and achy in the morning? Tortured with backache all day long? No wonder you feel worn out and discouraged. But have you given any thought to your kidneys? Weak kidneys cause just such troubles, and you are likely to have headaches, too, with dizziness, stabbing pains and bladder irregularities. Don't risk neglect! Use Doan's Pills! Doan's have helped thousands. They should help you. Ask your neighbor!

**A North Carolina Case**  
Mrs. J. E. Laster, E. Johnson St., Smithfield, N. C., writes: "I had backache and my kidneys were out of order. I tried many things, but they didn't help. I was a nervous, irritable, and weak woman, and often spots appeared in front of me so I could hardly see. After I used Doan's Pills the backache left and my kidneys again acted in a normal way."

## USED MANY MODES OF TRANSPORTATION

Suburbanite Has Exciting Time in One Day.

"The younger generation, and probably most of the older people who have gone about to any extent in recent years, take modern traveling facilities as a matter of course and give little or no thought to the marvels of transportation today," reflected the suburbanite, "and most of us go through our daily trips to business and elsewhere so mechanically that we fail to realize fully how remarkably diverse are the present-day means of passenger conveyance."

"A man will think nothing nowadays of riding in a variety of vehicles in the course of a single day, from an elevator to a subway, being carried along the surface of the ground, above it or under the surface, and utilizing several kinds of power. But an experience I had not long ago made me realize more than most of us do, or than I probably would have otherwise, how wonderfully diverse are the means of travel available to the people of today."

"In one day I rode on the surface of the earth, under the ground and the Hudson river as well, and also flew above the earth, being transported in trolleys, electric trains, steam trains, automobiles and an airplane, and employed the advantages of three types of power which play such important parts in the daily life of most of us—electric, gasoline and steam."

"I started out in the morning from my home in northern New Jersey and walked a short distance to a trolley line, then boarding a trolley car in which I was carried, by electric power, over the surface of the ground to a Hudson tube station. There I got on an electric trolley which transported me along the surface. Later I changed to another which took me through an uncovered depression, sped along a subterranean passage, through a tunnel beneath the Hudson river and to the Pennsylvania station, New York."

"There I changed to another train which traveled underground for a distance, being drawn at first by electric power. Afterward it rose to the surface, and, the locomotive having been changed, took me the rest of the distance to Mineola, L. I., above the ground—by steam power."

"At the railroad station in Mineola I got in a taxicab, which, by still another kind of power—gasoline—transported me to Mitchell field."

"There I hopped off in an airplane which, also using gasoline, of course, bore me back over much of the same route I had followed to the field, with some deviations; soared over the community in which I live—almost above my own house—and then flew back to its starting point."

"Later I returned to my home by the same kinds of conveyances I had employed on my trip to the flying field, impressed with the marvelous transportation facilities available to modern people as I only could have been by such an experience."

## Rialto Bridge

The Rialto bridge is a famous marble bridge across the Grand canal in Venice, built by Giovanni da Ponte in 1500. It consists of a single arch, 90 feet wide and 24 feet high, and rests upon 12,000 piles. The name Rialto is derived from Rivo-Alto, one of the islands on which Venice is built. This island was long the financial and commercial center of the city, and gave its name to the bridge that connects it with the mainland. There was situated the exchange; and it is probably to that building (and not to the bridge) that Shakespeare refers in his comedy of "The Merchant of Venice." "Signor Antonio, many a time and oft, in the Rialto you have rated me about my money and my usances; Still I have borne it with a patient shrug; For suffering is the badge of all our tribe."

## Bell Shattered Windows

A church in Cincinnati, Ohio, claims to have the largest bell in America and, next to one in Moscow, the largest one in the world. This bell is 10 feet in diameter and 12 feet high and it weighs 80,000 pounds. When it was hung a number of years ago its deep tones shattered windows in nearby buildings, and threatened to shake the supporting tower to pieces. Since then no one has dared to ring it. It is sounded by tapping it with a hammer. Sounds thus produced are no louder than those from smaller bells. Rung in the regular manner its peals, in the tone of E-flat, could be heard over a radius of 15 miles.

## Rough and Rocky

Tourist—I thought you said this was a good trail, a path of romance? Tomaso—Well, it is so, ain't it? Tourist—You mean the world's worst road. It resembles a jazzy imitation of a disorderly stone quarry. The romance has been joggled out of it, and me.

Al Jennings, once notorious Oklahoma train robber, told the senate committee that Jake Hamon in 1920 told him Harding would be nominated and that it cost Hamon \$1,000,000, of which \$250,000 went to Senator Penrose.

## BABY IS HONORED

The little daughter of Minority Leader Linton S. Marshall, of Mercer county, New Jersey, recently was a guest of the New Jersey legislature. In honor of the occasion the house passed this resolution, which probably is unique in state legislation: "Resolved, that Miss Marilynn Marshall, daughter of the Hon. Linton S. Marshall, assemblyman from Mercer county, be adopted as the daughter of the 1924 house of assembly of the State of New Jersey."

## ANOTHER QUEEN ESTHER

Miss Esther Halton of Fort Worth, Texas, who was crowned queen of the present which featured the opening of the southwestern exposition and stock show. Queen Esther is the tenth queen of the Southwest.

Above is shown Rose Coghlan, for many years a favorite of the American stage, with Claude Alvine of the Alvine Dramatic school. Miss Coghlan has just celebrated her seventy-third birthday, and has started to stage a "real comeback" in the theatrical world. She makes no secret of her age and says she expects to live to a hundred or more.

**Don't Let That Cold Turn Into "Flu"**

Rub on Good Old Musterole

That cold may turn into "Flu," Grippe or, even worse, Pneumonia, unless you take care of it at once. Rub good old Musterole on the congested parts and see how quickly it brings relief.

Colds are merely congestion. Musterole, made from pure oil of mustard, camphor, menthol and other simple ingredients, is a counter-irritant which stimulates circulation and helps break up the cold.

As effective as the messy old mustard plaster, does the work without blister. Just rub it on with your finger-tips. You will feel a warm tingle as it enters the pores, then a cooling sensation that brings welcome relief.

To Mothers: Musterole is now made in milder form for babies and small children. Ask for Children's Musterole. 35c and 65c, in jars and tubes.
