Many in America Completely Hypnotized by the Communist Propaganda

By SECRETARY HUGHES, Before Canadian Bar Association.

MANY persons in the United States who have managed to make for themselves reputations in the intellectual world have been so completely hypnotized by the Communist propaganda, that the propaganda itself has been able to establish something of a reputation for sanity and respectability.

This latter manifestation is one of the most amazing features of the whole situation regarding Communism. The most important fact about Communism, so far as Americans are concerned, is that it is the antithesis of democracy. Dictatorship is the inescapable conclusion of Communist operations. It is the goal of the Communist movement. It lies at the end of the road, the objective constantly in mind and constantly preached.

But men and women possessed of American names, possessed of intelligence and education, are part and parcel of the Communist propaganda. They take orders from the Communist machine. They function as lackeys of Lenin and Trotzky.

I suppose I shall be disputed by the coterie of the elect if I say that within a large group of literary more-or-less-celebrities it is almost impossible to find presentation for any thought or argument that does harm to the Soviet cause. There is a well-recognized group of this character, and its power is enormous.

It includes book reviewers, dramatic critics, writers of special departments, and of so-called newspaper columns, writers of books and a certain type of public speakers and even ministers of the Gospel.
