

Makes you Think

When you read in the paper of a fire which not only destroyed thousands of dollars' worth of merchandise, but shut off all revenue until new goods could be purchased and a new building could be built, it makes you wonder if you have enough insurance. Put it up to us—we will tell you, and write you up more if you need it.

COWS TUBERCULIN TESTED

Medical authorities insist that 25 per cent of tuberculosis in children is due to infected milk.
We protect our customers from this danger by having our herd tested yearly. We have just had our herd retested by a state veterinarian who gives every animal in our herd a clean bill of health. We appreciate the support our customers have given us in the past and will continue to give good services in the future.
