

Calles Inaugurated President of Mexico

General Obregon and General Calles entering the stadium in Mexico City for the inauguration of the latter as President of the republic. At the right General Calles taking the oath of office.

No Doubt About This Ship Being Aground

Above is shown the Sunderland (England) salvage ship Reclaimer as she ran aground near the buoy in the Hudson in the River Tees. The ship struck in the early hours with great force and ran clear aground, her prow sticking high over the rocks.

JULIANA'S ROMANCE

Recent photograph of the Princess Juliana, only child of Queen Wilhelmina and hence heir to the throne of the Netherlands, who has just caused excitement in Holland by falling in love with Gabriel Alaro, cantor of a Jewish synagogue in Amsterdam. She is thirty years old and a widow. She was dragged back to the palace and put under surveillance.

RED FLAG IN PEKING

The Soviet flag, during hammer and sickle, raised over the Russian legation in Peking. The Russian legation is directly across from the American legation. There has been much agitation in diplomatic circles as to the exact status at the Soviet...

Flag of Judea Formally Raised

The flag of Judea being officially hoisted to the masthead of the S. S. President Arthur, in service to Palestine, by Judge Jacob S. Strahl. Many prominent New York Jews attended the ceremony.

Plucky Women Saved the Church

Twelve members of the Ladies Aid society of the Cunningham (Kans.) Methodist church saved their church from going under the hammer by going into the field and husking corn, raising \$1,000 that prevented foreclosure. The women below...

FARM STOCK

MANY CATTLE UNDER STRICT SUPERVISION

(Prepared by the United States Department of Agriculture.)
More than 8,000,000 cattle throughout the country are now under supervision for the eradication of tuberculosis.

State and federal veterinarians are carrying this work forward at the rate of nearly a half-million cattle tested each month. A recent summary prepared by the United States Department of Agriculture on the work up to the end of September reports that 449,484 cattle were tuberculin tested during that month, of this number 16,732—about the usual proportion—were found to be tuberculous. Animals found to be diseased are immediately segregated for slaughter in accordance with regulations governing the disposal of such animals which are sources of infection.

States most active in the current work are shown by the report to be: Iowa, where during September 64,079 cattle were tested; New York, with 54,238; Wisconsin, with 45,854; and Illinois, with 43,438 cattle tested.

The large number of cattle owners who have placed their animals on the waiting list shows that the work is popularly supported. At the end of September this list included 2,681,543 cattle. The limited official forces engaged in this work are making strenuous efforts to comply with the increasing demand for tuberculin testing.

Horse's Feet Need Good Care in Severe Weather

Human beings have no monopoly on foot ills. Horses likewise know what it means to have sore and tender feet, especially in freezing and thawing weather.

For that reason, the animal husbandry men at the New York State College of Agriculture suggest that special attention be given in winter to old 'Dobbin's' hoofs.

Roads that have frozen rough after a thaw are extremely hard on horse's feet if the feet are not protected by some kind of calked shoes. For heavy hauling work in the winter time, the feet should be protected by a good set of well-fitted calk shoes.

Under particularly heavy hauling conditions, where sharp obstacles stick out of the road and cause soreness in horses' feet, the college recommends the use of leather padding under the shoe. But the use of leather padding is restricted quite largely to city streets, where the wear is unusually hard.

For the average winter work about the farm, however, it is not absolutely necessary to have work teams shod, but it is advisable to keep a careful watch on the hoofs, keeping them well trimmed and shaped.

Untrimmed hoofs break off after a time, making the feet sore and resulting in lameness. A rasp, a paring knife, and a pair of pliers are all the tools required to keep the hoofs down.

Raising Pigs in Severe Weather Is a Handicap

Cold weather at farrowing time is a big handicap in raising pigs. When the temperature gets much below freezing inside the house, pigs less than a week old are sure to show serious effects from the cold. It is a good plan to set up a stove and keep fire enough to maintain a temperature of about 53 degrees. Pigs which get chilled at the time of birth are in for trouble. Scours is the most common result. Pneumonia, enteritis, and all other diseases of small pigs are hard to combat, unless the health of the pigs is good.

Extra time spent with sows when due to farrow will pay big wages. Put in part of the night in the hog barn when necessary. If by reason of three or four hours' work, seven pigs are saved, where only five would survive without attention, the labor gives returns of several dollars per hour.—E. F. Ferrin, professor of animal husbandry, Minnesota college of agriculture.

Live Stock Notes

Sell the non-producing sows.

Feed the sows liberally, especially those which are suckling pigs

A rolling stone gathers no moss; but neither does an animal at rest, and good pasture.

Wean calves that are from four to six months of age and give them a little extra feed.

Timothy hay was not intended for sheep. They will do much better on one of the legumes.

Long fiber, lots of fiber to the square inch, and a well covered body are points to be considered in examining the ewe for wool producing ability.

Cooked potatoes may be fed to hogs with corn and tankage. In tests made at the South Dakota experiment station approximately 300 pounds of cooked potatoes replaced 100 pounds of shelled corn in the fattening pen.

Remarks of Br'er Williams

Er you kin send yo' voice clear round de worl'; if de airships kin fly 'cross de big sea, an' ef man kin almost raise de dead, what does you think must be waitin' on us in de worl' ter come? W'y, jes' studyin' 'bout it is 'nuff ter give you de ol' time fiber-tigibits an' de rattlin' of de brain!—Atlanta Constitution.

Wright's Indian Vegetable Pills contain only vegetable ingredients, which act gently as a tonic laxative, by stimulation—not irritation. 372 Pearl St., N. Y. Adv.

Despisers of Mankind

The despisers of mankind—apart from the mere fools and mimics of that creed—are of two sorts. They who believe their merit neglected and unappreciated make up one class; they who receive adulation and flattery, knowing their own worthlessness, compose the other. Be sure that the coldest-hearted misanthropes are ever of this last order.—Charles Dickens.

Watch Cuticura Improve Your Skin. On rising and retiring gently smear the face with Cuticura Ointment. Wash off Ointment in five minutes with Cuticura Soap and hot water. It is wonderful what Cuticura will do for poor complexion, dandruff, itching and red, rough hands.—Advertisement.

Monkey's Costly Prank

Spectators gathered about the window of a bird and animal store in New York on a recent Sunday afternoon on observing that a monkey had escaped from a cage and had begun opening bird cages and devouring canaries. The monkey had dined on \$128 worth of canaries before he could be captured by a small boy lowered through a transom by a policeman.

Be Careful of Infection from Cuts, Burns, Wounds and Sores. Apply Hanford's Balsam of Myrrh; it prevents infection and heals. 3 sizes, all stores.—Adv.

Electrical Energy Great

Roughly speaking, 55,000,000,000 kilowatt hours of electrical energy will have been produced in the United States by the end of 1924. This annual figure is based on the 26,842,195,000 kilowatt hours produced during the first six months. The revenue brought in from the total for the first six months was \$688,890,000. The amount of energy required seems to be constantly increasing, with occasional fluctuations due to let-ups in certain industries at times.

Preparedness

A certain New Yorker, an advocate of deep breathing, is accustomed to take morning walks, during which he at intervals raises his hands high above his head and then lowers them.

A visitor from out of town watched this performance in amazement for a time and then, approaching him timidly, said:

"Is it possible, sir, that affairs have reached such a state in this city that residents have to practice what they shall do when they're held up?"—American Legion Weekly.

JOSEY

OPEN-FORMULA FERTILIZERS

GUARANTEED ANALYSIS
8-3-3 FOR TOBACCO
ACID PHOSPHORUS 8.00%
AMMONIA 3.00%
SULPHUR 3.00%
SULPHATE 1.00%

8-3-3 FOR TOBACCO
This mixture, put out by us in 1924, has produced more favorable comment, than any Tobacco Guano which we ever made before.
For 1925, we have the same formula—and are adding to it; Magnesium—which will be a cure for Spod. Brown.
On sale by the leading merchants, almost everywhere. If there is no dealer near you, write us.

Long Fall-Fails to Kill

Young children are always tumbling about, and young birds have similar accidents. Mr. Oliver Pike, well-known bird observer, writes that he has seen young gullmots "tumble off the lofty ledges where they are hatched and fall perhaps a hundred feet or more to the beach below. Yet in spite of the height they are rarely killed.

A giant spider crab, measuring 12 feet across, has been found in the ocean off Japan.

Hall's Catarrh Medicine

is a Combined Treatment, both local and internal, and has been successful in the treatment of Catarrh for over forty years. Sold by all druggists. F. J. CHENEY & CO., Toledo, Ohio

CROUP!

Relief Begins in Three Minutes

Mother! Don't be frantic with fear when your child wakes up at night choking with croup. Just give a pleasant tasting spoonful or two of Cheney's, as millions of mothers have done. See how thankful you will be when that labored breathing stops and in a few minutes the little one is sleeping peacefully again. Mothers who once use this quick dependable remedy always keep an inexpensive bottle on hand.

For Coughs, Croup, Colds
