Transfer of Clara Barton's Home Held Invalid

The late Clara Barton, founder of the American Red Cross, on the lawn of her home at Glen Echo, Md., near Washington. A five-year legal fight has just ended with the court decision in Washington that Mrs. Mabelle Rawson Hiron is without legal rights to the property, which was conveyed to her by Dr. Julian B. Hubbell, Miss Barton's secretary, after Doctor Hubbell and Mrs. Hiron had visited a medium and received "messages from the spirit world" advising him to deed her the home that she might make it a national shrine to Clara Barton. Doctor Hubbell charged that Mrs. Hiron forgot all about the memorial plan and even sold some of the land.

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Often Rejected

Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. The mild and healing influence of Dr. Kilmer's Swamp-Root is soon realized. It stands the highest for its remarkable record of success.

An examining physician for one of the prominent Life Insurance Companies, in an interview of the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people, and the large majority of those whose applications are declined do not even suspect that they have the disease. Dr. Kilmer's Swamp-Root is on sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.

Physique Value

When Frank A. Vanderlip was presiding over the largest financial institution America has ever known, the National City bank of New York, he said:

"In picking a man for a highly responsible executive position, I always take into account both his physical condition and his physique. Unless he has built up a strong, healthy body, I don't want him, because during the terrible stress and strain of a great crisis, when you need his services most, he is likely to cave in."—Hearst's International Cosmopolitan.

First Salt Made in 1791

Louisiana has for years been a source of salt in the United States, the first crude refining having been done on a small scale in 1791 from the salt water springs in that state. The Indians found their salt in this way, however, long before the advent of the white man. In 1812 a more successful method was worked out. In 1862, under the direction of pioneer troops of the Confederate army, rock salt was discovered at Avery island, just 15 feet beneath the surface of the ground.
